Introduction

When I draw a picture, I imagine the ideal of the motif I want to draw unconsciously. However, it depends largely on the senses, and in most cases it cannot be expressed well even if you try to draw it aiming at the ideal you imagined.

Then, if you can learn how to calculate and compose properly and direct it, isn't it possible to guarantee a certain degree of perfection? This book was planned from such an idea.

It is very difficult to verbalize "cute", and that is what tends to be drawn with "sense".

In my head, just like extracting the "cute" of a girl and applying it to the equation We will add a clear production.

If you can do that, you can do it without relying on the vague thing of "sense". You will be able to draw "more cute girls".

In this book, we considered "how to express a girl more cutely" and extracted the elements to draw a girl more cutely. By holding down the basic structural gestures explained in this book and adding effects to bring out the cuteness, you will be able to draw girls more cutely.

We hope that this book will help you to "draw a girl more cutely".

Universal publishing

How to draw a girl "cute"?

What is a "cute girl"?

"Cute" has different definitions depending on the person. However, there are some rules for "cute girls" that are appreciated by many as pictures. Therefore, based on that rule, this book defines "a cute girl" as "a beautiful girl who is 15 to 19 years old, full of feminine transparency, and is a 'cute girl', and what should I do with women in that category? We will verify whether it can be drawn as a 'cute girl'.

Example ①

The example is an illustration of a beautiful adult woman. It is a beautiful girl rather than a beautiful girl, and is different from the 'cute girl child' defined in this book.

The example is the example illusion of "cute" girl "defined in this book.

Example ②

Example ③

Example ③ is an example of a young girl. It is a girl who does not stop at the definition of "cute girl" in this book.

How can I draw a "more cute" girl?

There are two main elements that are important for drawing a girl "more cute". If you do not hold down those two elements, you will not be able to express "prettiness" even if you draw a girl, and it will not be an attractive picture. The illustration below is an example of a walking girl "more cute".

If you hold down two elements,
you can make a girl character ...

"More cute" can
be drawn !!

<< Elements for drawing "more cute" >>

- Accurately draw a conceptual human body structure that everyone can convince as a beautiful girl (hereinafter referred to as "structure")

- 2 Draw the moment when a beautiful girl directs herself or has a girlish gesture that appears naturally (hereinafter referred to as "fall" gesture).

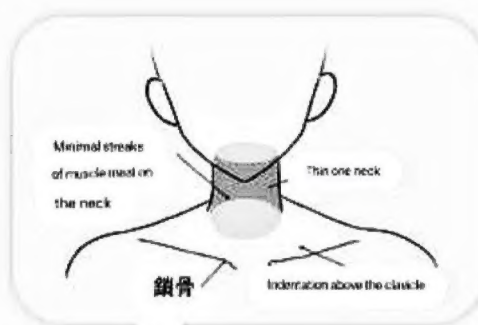

Let's hold down these two elements
and learn the points to draw
a "better" girl.

See the two elements in detail on
the next page!

❖ Element ⑩ : Structure

The ideal human body structure of a beautiful girl is a basic human body structure that eliminates variations due to individual differences, with the addition of the characteristics of a beautiful girl.

* "Structure" and "gesture" are displayed by their respective icons.

In this example, the basic neck and clavicle shoulder lines are added with the characteristics of a beautiful girl, such as "thin neck" and "minimum muscle streaks on the neck". It's a more cute human body structure. "

The cuteness of the girl's element is expressed by the gesture of fluttering her hair. The points that make this example "more cute" are explained in detail on page 18 and after.

* Element ② Gesture

The girl's "gesture" that appears naturally is a picture that captures that moment. In addition, "Cuteness" is intentionally added to express "Cuteness" as a picture.

By examining these two factors, this book will explain the points for drawing a 'more cute' girl.

❖ In Chapter 1 In Chapter

1, we will mainly explain the
"structure" for drawing a girl "more cute".

To go

* Since "structure" and "gesture" cannot be completely
separated, "structure is the center" in Chapter 1 and "gesture is
the center" in Chapter 2.

◆ In Chapter 2 ... In Chapter 2,

the points are held down with a focus on
"more cute", "attractive" and "facial expressions"
for girls.

❖ In Chapter 3 ...

Chapter 3 is a technic that deals with "items and costumes" that bring out the cuteness of girls. I will explain about it.

◆ In Chapter 4 ...

We have looked at the structure and gestures in 'quiet', but in Chapter 4, we found the cuteness of the girl in 'movement' to come.

Here, we will also introduce cute movements and poses between girls as "actions full of cuteness of multiple people".

You can draw more cutely!

Chapter

1

Bring out
the cuteness of girls

Face / body

I will mainly explain the ideal "structure" that adds the charm peculiar to a beautiful girl to the basic human body structure. In this chapter, let's take a look at the basics of drawing a girl more cutely.

"Cute human body structure" (face, neck, shoulders)

First of all, I will explain mainly the "structure" that is indispensable for drawing a girl "more cute". Let's take a step toward drawing an attractive girl by holding down the basics of "structure" and adding the characteristics of a beautiful girl to it.

Example ① is an illustration of a girl in a summer-like dress sitting and stretching one leg. Detailed "more cute" drawing points and tips for each part are explained on the page described in the balloon.

❖ Example 1 Draw from Making Atari

01.

Take a pose atari

If you think
about the character
and pose of
the girl you want
to draw, take
a simple Atari.

02.

Draw costumes and hairstyles concretely

Draw costumes and
hairstyles that match
the character you
were imagining more
concretely than Atari,
and gradually
shape them (draft ①).

03.

Confirmation of human body structure

Drawing + Atari of coloring

While checking the
structure of the human body, draw
details such as the
fingertips of the hands and
the back hair so as to
improve the cuteness of
the girl as much as possible
(draft ②).

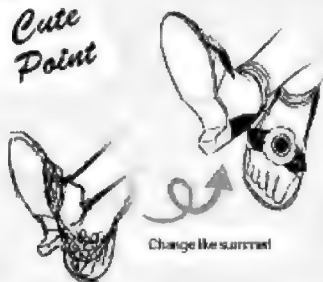

Make the flow of the back hair
flutter softly and make it look
more cute than the draft ①.

04.

Pencil case — coloring finish

Cute
Point

Change the summer!

This time, I did not make any
major changes or corrections
by drafting ③ → pen,
but I changed the design
of the sandals to match the
summery atmosphere.

Correct the line while
adjusting the draft ②
(upper figure), and
finish the coloring (see
the previous page)

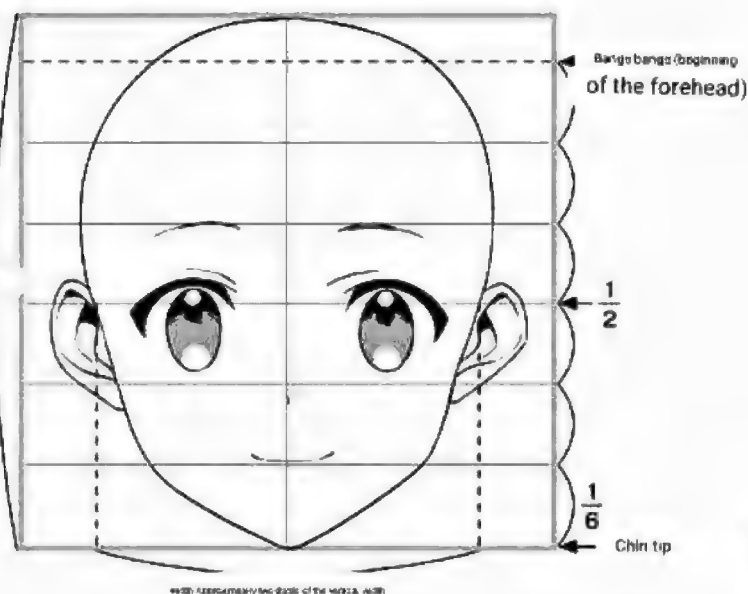

"The first impression is determined by the" face "!

Just as the first impression of a person is determined by the face in reality, the impression of the face gives a considerable weight even when drawing a character as a picture. Even if the outline of the face is off by 1 mm, the physiognomy will change drastically. In order to draw a cute girl, let's first master the basics centered on the head.

◆ What kind of face is "more cute face"? <<

Ratio of more cute face >>

<Front view>

Divide the distance from the bangs to the tip of the chin into 6 equal parts.

About one-third from under the nose

About 1/6 from the mouth

The inner corner of the eye is about half, the lower

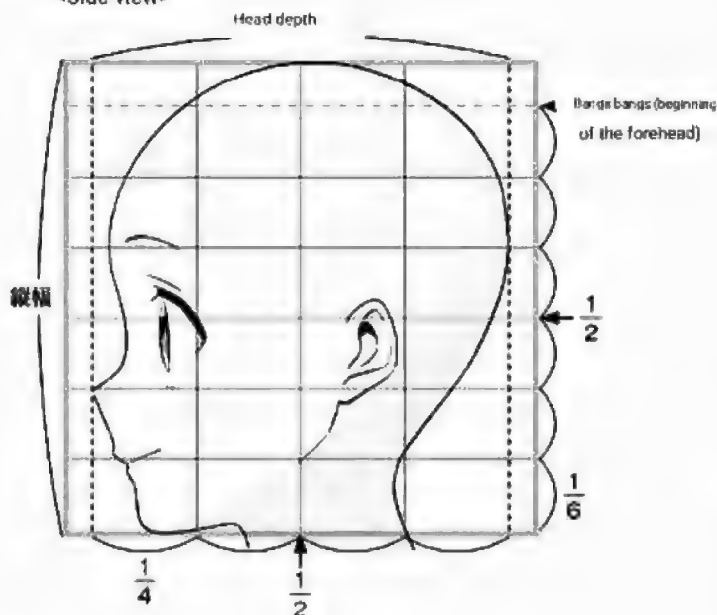

eyebrow is above the nose, and

the eyebrows about one third from the top

From the nose, about one-third from the top

Maybe almost the same position as the nose

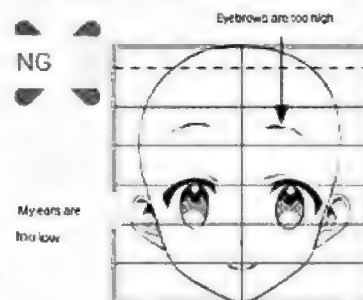

<Side view>

When the depth of the head (distance from the head of the nose to the back of the head) is divided into four equal parts, the ears are drawn behind the half position.

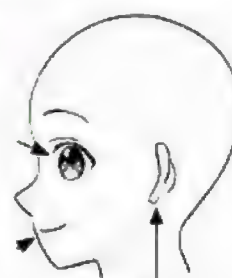

[Mistakes that are easy to fall in proportion]

▲ The face is young because the eyes, nose and mouth are lowered as a whole

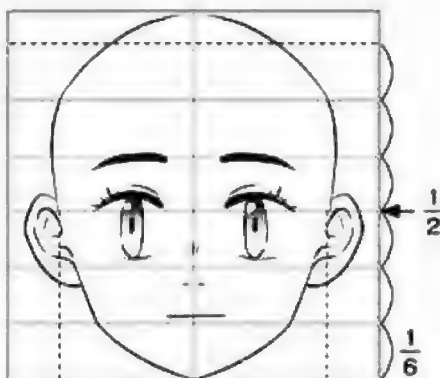

[A mistake that is easy to fall in profile]

I can't see the holes in my ears

The ratio of the face is OK, but
if you can't express the
main facial parts themselves
in a cute way, you'll
get a bad face

NG

Based on the
points of the main parts,
let's draw a "more
cute" face !!

◆ Main parts of the face (head) 1st eye /

eyebrow << Basic points to draw more cute eyes >>

Of all the facial parts, the eyes are
the parts that give off taste and individuality.
but the basic points are as follows.

There are four.

- Highlights that you can put in your eyes

Make it larger.

- ② Decrease the proportion of white eyes and

increase the proportion of black eyes (pupils).

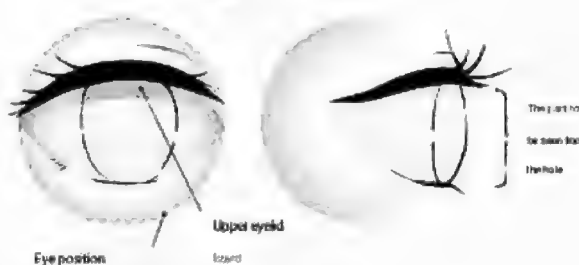

- ③ The 3D effect of the eyeball is represented by shadows.

Reveal.

- ④ The edges of the eyes are thick and
the eyelashes are clear.

<Thinking in 3D>

The eye is in a state of
"looking through the
hole" If you add a shadow
as if it were a
sphere, you will get a
three-dimensional effect.

Cute
Point

Upper lashes chromatic
but + lower lashes

Upper lashes Lower
lashes connection

The extent to which the edges of the
eyes are taken is also a part that gives out
individuality. The larger the border
range, the higher the impact on the eyes.

《Various eyes》

The eyes are glossy
with light in
various colors.

An image that blurs the
edges of the eyes and makes
the eyes moist.

If you put the glow in
a light color like light,
your eyes will shine.

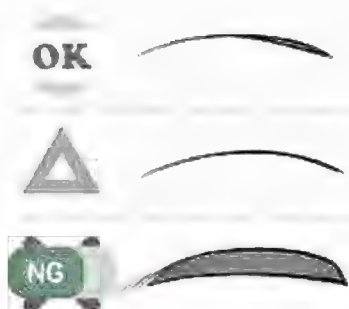

Integrate pupil and lizard
And give a soft
impression.

《Basic points to draw eyebrows more cutely》

Make it thinner from the inner corner of the eyebrow (closer to the middle of the eyebrow) to the outer corner of the eyebrow.

If it's just a line, it will be a dull eyebrow, so it's thick.

Aware of strength.

If you open your eyes wide, it will rise.

❖ Main parts of face (head) ② Nose

Is not very detailed

The point is

not to draw in detail

Draw realistically

The more

From cuteness

you draw, the

farther you go.

Omit a little more and be more cute!

The more you draw, the less cute you are.

Cute Point

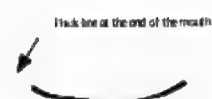

光

I can get a lizard

The nose can be a point, but if you remember that it is the 'top of the nose' and add shadows to give it a three-dimensional effect, it will be 'more cute'!

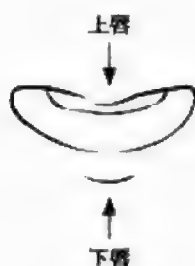

◆ Main parts of face (head) ③ Mouth

《Close your mouth》

The upper part, which shows the shape of the lips as a line, gives a soft impression. The lower part is expressed only by the strength of simple lines.

《Open your mouth》

The upper part is painted with different colors for the tongue and mouth. Good to see the teeth a little.

The mouth may seem simple at first glance, but if you devise it, it will be much more attractive.

Hold down the following three points to draw.

- ① Adjust the strength of the line.
- ② Omit teeth appropriately.
- ③ Deform the shape of the mouth that opens and closes.

An example that is too real and NG

NG

An attractive mouth with no strength

❖ Different types of faces

Different types of eyes Combining eyebrows, nose and mouth, "more cute" woman of your choice Let's make a child character of

you do

It gives the impression of a girl with a strong tsundere spirit. Yaeba can also be used for animal image characters such as cats

《Blind eyes + nose streaks + lower lip ants》

You can emphasize the length of the upper lashes by turning your eyes down, which makes your eyes look like a girl's child. The line on the lower lip that makes a streak makes it a girl character that seems to be quiet

《Descent eyebrows + Sauce eyes + Duck mouth》

It's a gentle girl's face. By lowering the bottom of the eyebrows (lowering shield), you can create a gentle image.

《Maro eyebrows + round eyes + lower lashes ants》

Maro eyebrows are perfect for non-human girls. By extending the edges of the eyes so that they reach the lower eyelids, the eyes look clear and large

Cute Point

The lower lashes are more girlish because they have more lashes, and the attractiveness is that the eyes look bigger.

◆ Main parts of face (head) ④ Ears

The ears are the same as the nose, and it is NG to draw too much. Except for the following required parts, omit them appropriately

- ① Earlobe
- ② Helix (the edge of the ear)
- ③ tragus (protrusion on the face side)

NG

OK

omit

If you draw too much,
the cuteness will decrease,
but if you draw too much,
it will be on the ears
of the mini character.

It is not suitable for the 6-headed female
child character treated in this book.

▲ The irritated ears in
this book. If the
person who draws it is
different, the way it
is deformed is also
different.

❖ Let's see from various angles

Let's look at the head based on "Cute Face" on page
20 from various angles. The "cute points" that can be
devised vary depending on the angle, but the ratio
of the face and the position of the parts themselves
do not change.

《Diagonally forward》

《Diagonally behind》

*Cute
Point*

An oblique angle gives the face a three-dimensional
effect, and emphasizes the length of the eyelashes
and the unevenness of the grooves in the upper eyelashes,
making the eyes more iconic.

NG

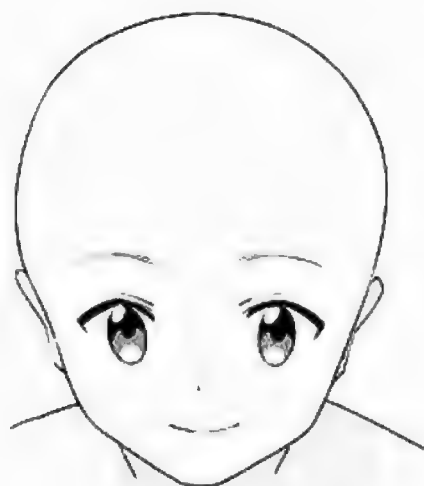

The eyes on the
back are too small

When facing diagonally,
pay attention
to the eye-sized
balance.

《Fukan》

Fukan is an angle to see the object from above. When you look at the head with a chin, the top of the head is large, and it becomes smaller as you go to the tip of the chin. The ears are visible at the top, and the neck is hidden behind the head, making it almost invisible.

Angle overlooking from above
视点

<Appearance>

Cute Point

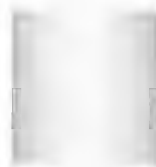

Fukan can bring out the difference in height from a female child and the cuteness such as superorder

《Aori》

Aori is the opposite of Fukan, and is an angle that looks at the target from below. Instead of seeing the top of the head, you can see the back of the chin, and the ears appear to be on the bottom. It is a composition that can emphasize the curved lines of the body and the length of the eyelashes.

Angle looking up from below

<Appearance>

The wind blows on the hair of "more cute" girls

Just drawing the hair straight does not express the charm of the girl well. We aim to make the hair more attractive from the basic points, and to blow the wind on the hair with plus alpha as an application to further improve the cuteness.

◆ Basic points to make your hair look more cute

The flow from the whorl is bundled and flowed.
This is Mage.

ばらけた髪

Against wind

A bundle of the same thickness will not give a sharp impression.

- Determine the position of the whorl
- ② Make a certain amount of bundles.
- ③ Remove a few of them on purpose and let them fall apart.
- ☪ If it gets in your eyes, make it transparent.

If you hold down these points, you can draw more cute hair.

Next, as an application, let's learn the points to make the hair blow the wind.

❖ The point of "wind" that makes girls' hair look more cute

By blowing the wind on the hair, the hair spreads softly and gives a more feminine impression.

- ☪ Determine the direction of the wind
- ② While making a big flow, draw a few bundles of hair that flows against it.
- ☪ You can see from which part of the head the hair grows in three dimensions.

First, draw a flow with a rough line, and then make it three-dimensional to make it easier to draw.

◆ Various cute hairstyles

There are different styles of
base hair. Girl's hairstyle and each
I will look at the tips to draw.

《Straight Medium》

Occasionally bounce the
hair on your shoulders outwards
to make it cute.

《Wave Medium》

It captures a bundle of hair in three dimensions
and makes it undulate as it heads
toward the tip of the hair

'straight short'

Let the tips of the
hair play a little.
A hairstyle that
makes it easy to see
the rope

《Wave Short》

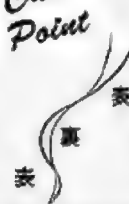

The point is that the wave
is based on the ear and
undulates from there.

《Straight Long》

Long has a neat
image and is
perfect for fluttering
in the wind!

Cute Point

Waves are drawn
with the image of
alternating the
front and back of a
bundle of hair.

《Wave Long》

Waves with long hair
can make a lot of waves
because the hair is long

<< About bangs >>

<Center division>

The point is that the forehead is exposed and the face is clearly visible.

<Flush to one side>

The cohesiveness of the bangs and the flickering of the forehead and one eyebrow give a bright and fluffy impression.

<Pattsun> The area

of the face that can be seen is small, and the bangs that emphasize the eyes. You can feel the innocence of childhood

Start up and let it flow>

Raise the root of the bangs and let it flow. It is characterized by a manly atmosphere and a feeling of unpleasant mouth

《Side down》

Curved and soft
impression

You can see the neck and shoulders overcoat

Roundness is the point of cuteness. Be aware of the

CLINE.

curve

(Outside splash)

Take down

If you pull down the hair near your ears without bouncing it out, it will look cute.

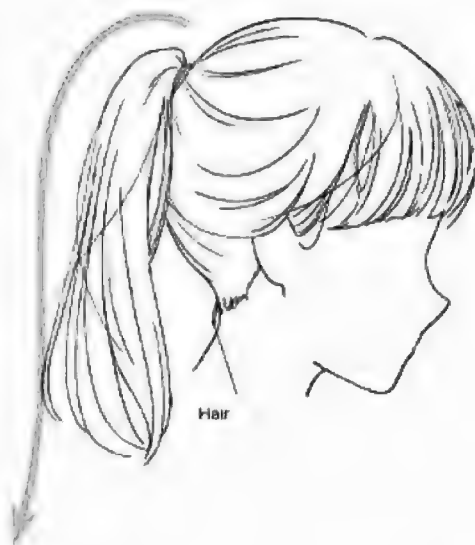

Notice

Side-down with hair on one side reveals the neck on one side, creating a curved flow.

《Bonnie Tail》

It gives a clean and healthy impression. It is attractive that the hair bundles away and the nape can be seen.

Go up and fall

The twin tail is a girly hairstyle that is perfect for girls. As you can see from any angle, the movement is stronger than the ponytail.

《Twintail》

《Side up》

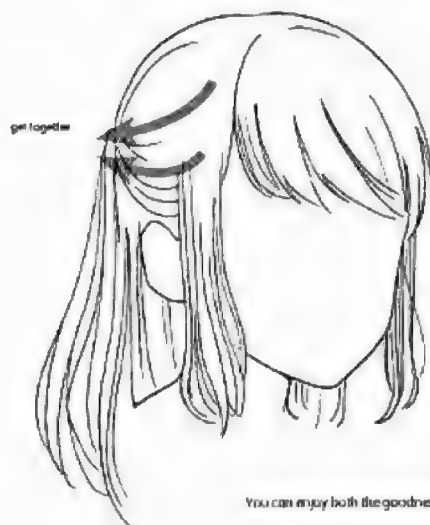

By raising the hair next to the face, it is also cute from the front.

《Up》

The up with the hair tied up in the back makes the back look elegant and gorgeous.

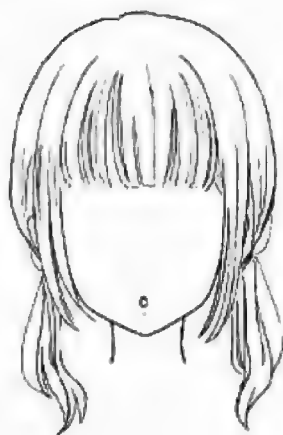

《Half-up》

You can enjoy both the goodness of the hair that has been pulled down and the hair that has been tied up. Put a line of hair that gathers on the back of your head.

《Pigtail》

Unlike the twin tails, it gives a gentle impression by tying it below the ears.

<< Braid pigtails >>

For braids, it is recommended to use a bundle of hair as an 'y' and add lines.

《Dango》

Wrapping pattern

There are several types of dumpling knots, but if you draw with the image of the shape of a para, you can express femininity and gorgeousness.

Rose shape pattern

"Pompadour"

You can express the bright and lively cuteness.

《Crochet on the side》

A style that uses braids and is woven on the sides. The cute point is that it looks casual.

Cute Point

Round

Pompadour has a cute point with the fluffy roundness of the bangs.

Make the décolletage look beautiful

The décolletage line (the line from the neck to the collarbone and the chest) is a delicate and feminine part. It's easy to draw by hand, but it's also easy to make mistakes. Draw the "structure" correctly and improve the cuteness and charm of the girl.

《Points of décolletage》

① Express the streaks with the minimum necessary lines.

② Express the

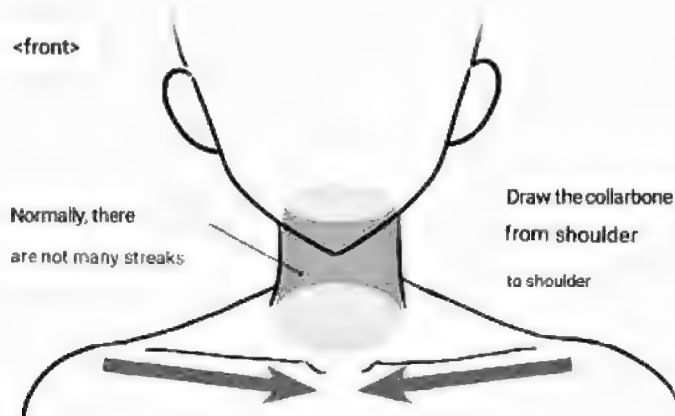

the trapezius muscle (the line from the neck to the shoulder) gently

③ Draw a dent between the collarbones.

④ Express

forget to express the existence of the 7th cervical vertebra.

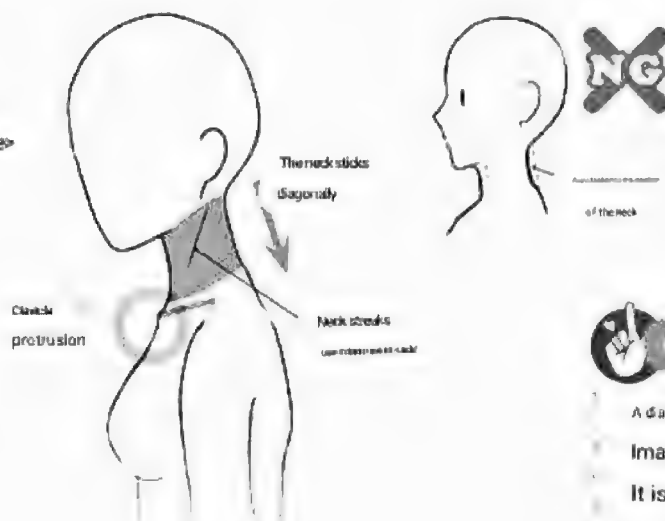

<front>

<back>

<Side>

The point is to draw the protrusion of the 7th cervical spine! Don't forget to draw the back and sides

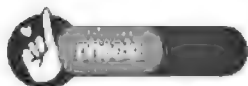

A diamond-shaped cylinder diagonally

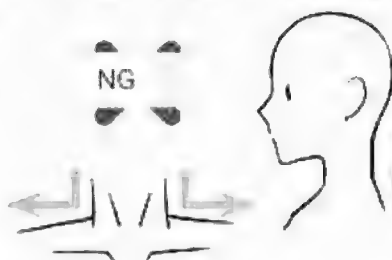

Imagine being stabbed

It is easy to understand.

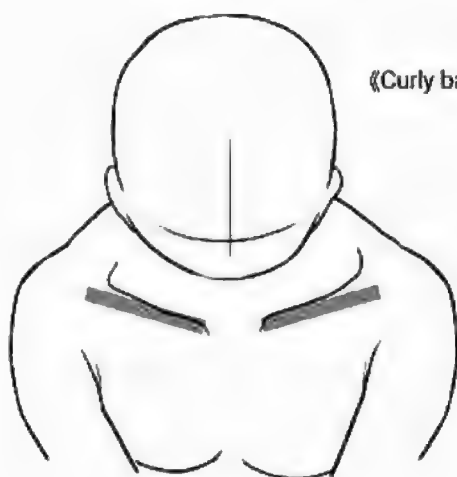

- Neck to shoulder lie
- In a straight line
- Right angle
- Do not draw on
- Be careful
- prize.

Even if you raise or lower your arm, bend your back, or curl it, the shape of the clavicle itself does not change. It is only slightly tilted.

《Curly back》

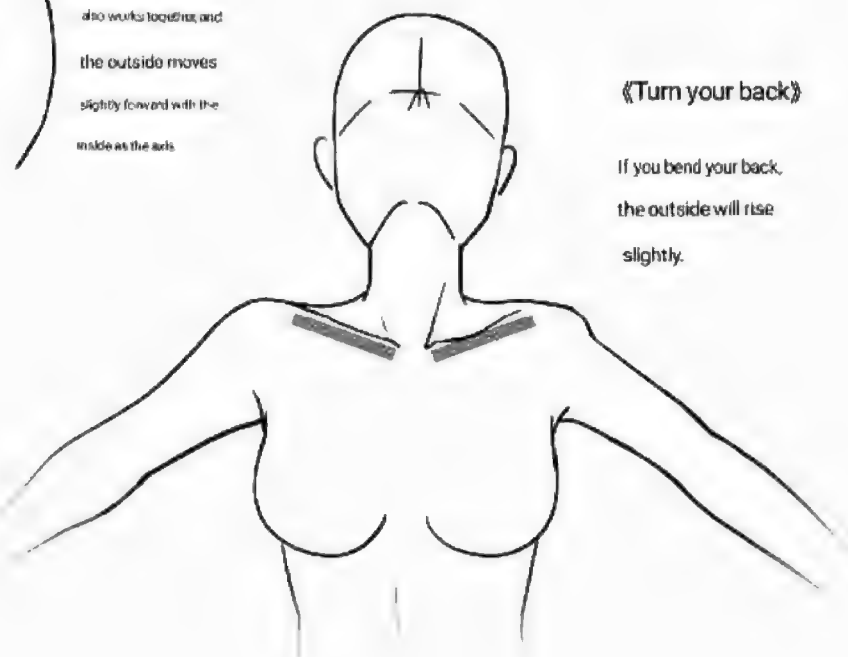

When you put your arm forward, the clavicle also works together, and the outside moves slightly forward with the inside as the axis

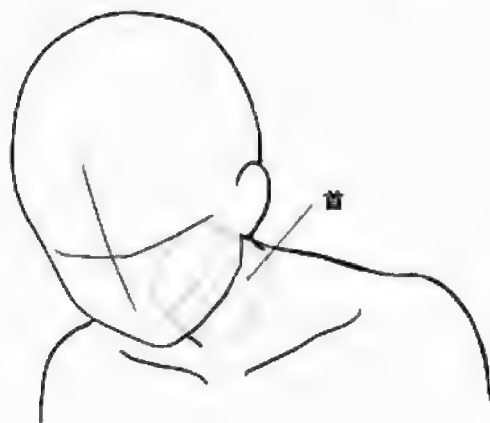

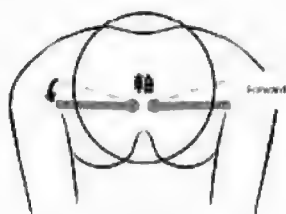

By moving your shoulders inward, the clavicle line will stand out even more clearly.

《Turn your back》

If you bend your back, the outside will rise slightly.

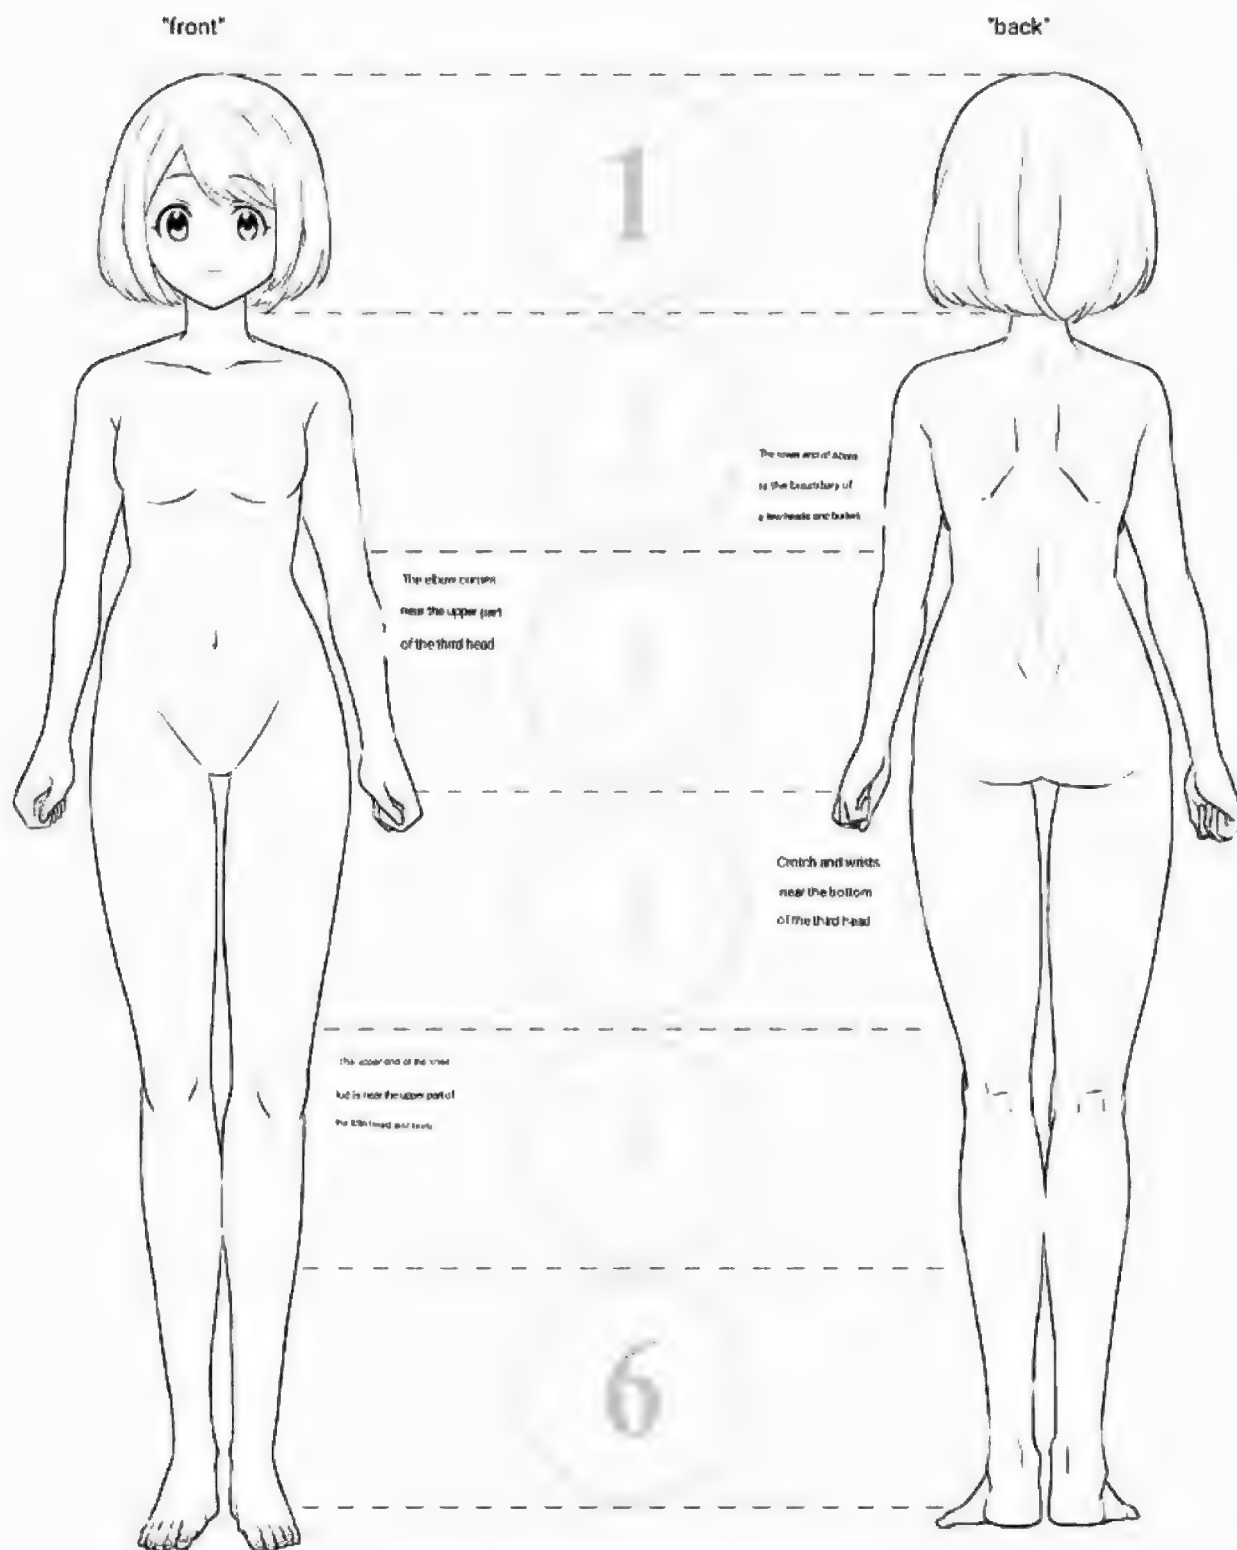

《Figure from above》

Also, if you tilt your head forward (see the figure in "Curly your back"), your neck will be hidden and invisible. It looks like it's connected directly from the head to the shoulders, but it's not without the neck. Seen from an angle, it looks like the figure on the left.

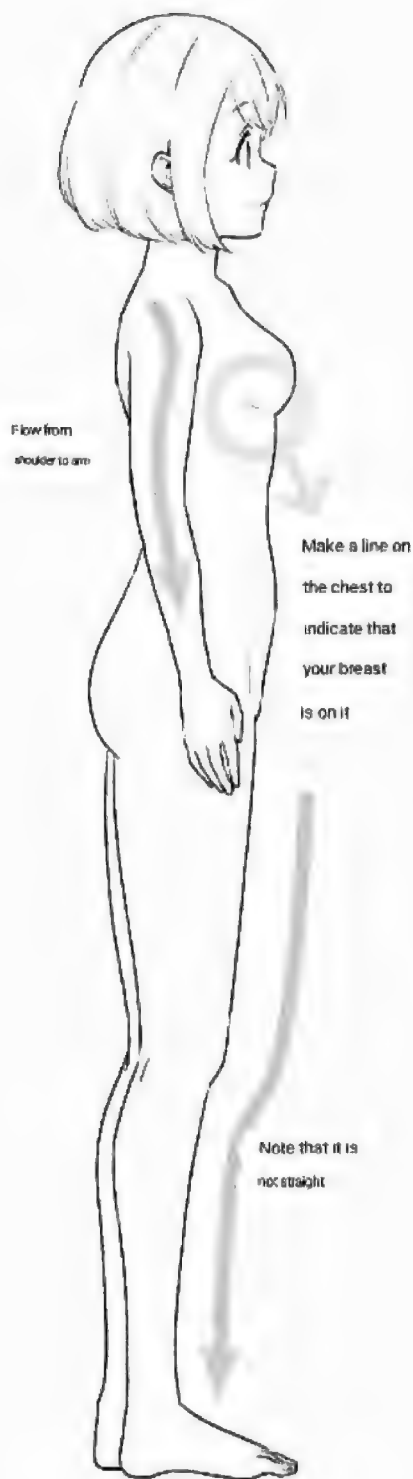

"Cute girl" seen from various angles Points of the whole body

I have mainly looked at the parts around the face, neck and shoulders from the perspective of "being more cute". Before explaining the parts in the following sections, let's look at the points of the whole body.

"Cute girl" in this book = about 6 heads. If you are tall, you will be closer to a 'beautiful girl' than a 'beautiful girl', which is outside the definition of this book.

"side"

It is a difficult angle to draw the flow from the shoulder to the arm (how the arm is attached)

(Diagonally forward)

(Diagonally behind)

With an oblique angle, it is difficult to balance the size of each part that can be seen in the foreground and the back. Especially the arm on the back side is difficult to draw.

Cute Point

orientation on the back of the knee

You can express a delicate feeling by drawing the line of.

《Aori》

The underside of the breast (lower milk) and the protrusion of ABBA appear to be emphasized. It is an angle that makes the legs look longer.

The softness of the breast, the bone-likeness of the ribs, and the gaps in the delicate parts make it cute.

Looks long

《Fukan》

The connection can be seen up to the butt line.

It is also an angle that makes it easy to appeal the decorte line. Increase

The legs look thinner

Make the line from your foot bite. You can see the foot more in the foreground.

You can get a sense of perspective by drawing the part of what you can see in the foreground into the part that you can see in the back.

Since the angle of the shoulders and the appearance of the waist are easy to see, it is relatively easy to draw even the hidden parts.

"Cute human body structure" (trunk / leg circumference)

I often want to draw around the face of a character, so I tend to practice that much, but if I can understand and draw the structure of other parts, the range of expression will expand.

Face and body that bring out the cuteness of girls

Pompadour

Cute
Point

(Left foot)

(Right foot)

I'm in a hurry, so the design of
the left and right socks is different.
With this kind of ingenuity, you
can express the cuteness of the
character's personality.

Example (2) is an illustration of
a female child wearing shoes in a
hurry before going to school

❖ Example ② Making — -Draw from the whole form

01.

Capture the entire form

First, draw the form of the entire person you want to draw as a raf, and then roughly capture the shape silette).

02.

Characterize

Roughly put on your favorite clothes and hairstyle and think about the carctor Here, it is important to include the "cute" elements that you want to draw. Let's put it on freely.

03.

Confirmation and drawing of human body structure

Once the elements you want to draw are solidified, you can draw them while confirming the structure of the human body

Both the right hand and the right foot extend to the back, so the point is to draw them small to give them a sense of perspective. To create a three-dimensional effect and makes the painting more attractive

check!

It is important to draw the structure firmly with the clothes removed.

04.

Atari of drawing and coloring such as costumes

Pay attention to how the shoes look and how the skirt spreads Let's take the shape as a standing body

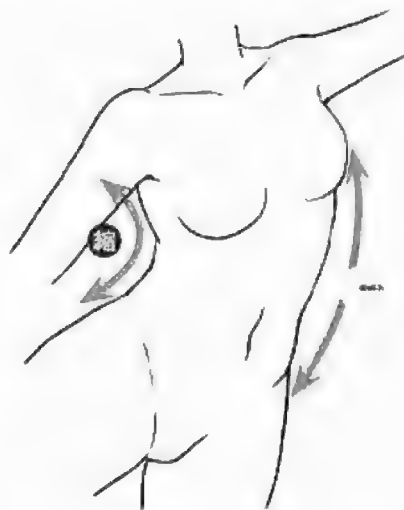

清書 Coloring • After finishing, it is completed (see the previous page)

The charm of a leaning body

An unbalanced composition that seems to start moving due to the tilt of the center of gravity is more attractive than a well-balanced symmetric composition.

▲ Example ② body

When the body leans, a large curved flow is created, giving a feminine and supple impression. The clothes that slide down when tilted also enhance the charm of the girl character (see Chapter 3 for details)

foot · legs — The roundness, softness and sharpness of the bones

If you can draw the legs and feet firmly, the whole picture will be more stable. I will explain the points so as not to neglect.

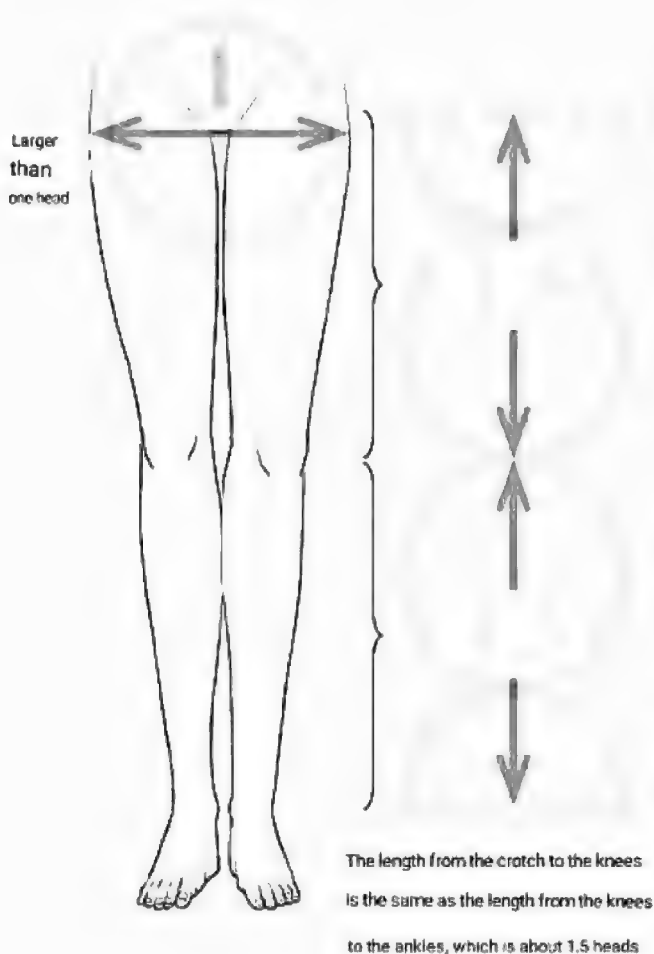

The gap between the softness of fat such as thighs and calves and the bony and delicate parts such as knees and ankles makes the girl more cute.

◆ Ratio of legs that can be drawn more cutely

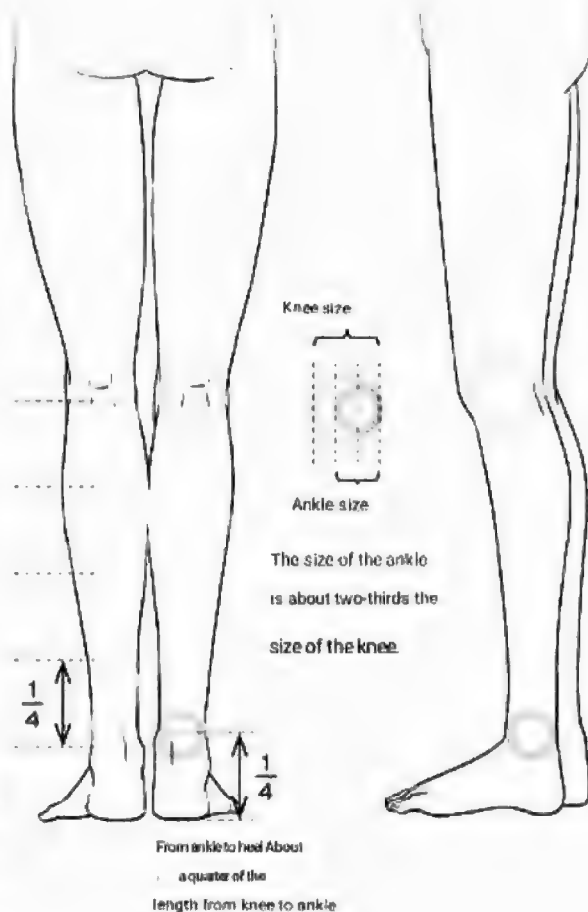

The width of both legs with the crotch as the midpoint is one head

It will be about one size larger.

First, remember the basic ratios that will

make your legs look more cute.

Face and body that bring out the cuteness of girls

◆ Basic points to draw legs more cutely

To draw the legs, the omission and smoothness of the green and the sharpness created by thinning the relations

are achieved.

《Point ⑩ Knee roundness and delicateness》

If you make your knees rugged, you will not be able to express them cutely.

The biggest points are the roundness and the crisp dents.

The back of the knee is "H". Or if you express it with two vertical lines, you will get a delicate feeling.

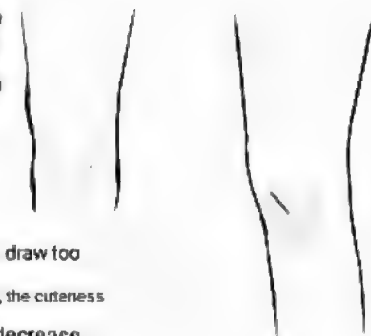

NG

Note that the knees are not perfect circles!

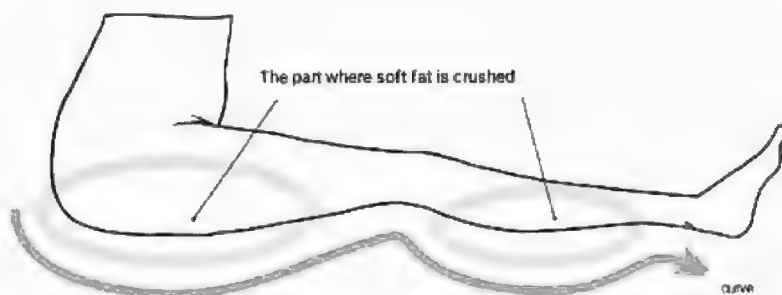

NG

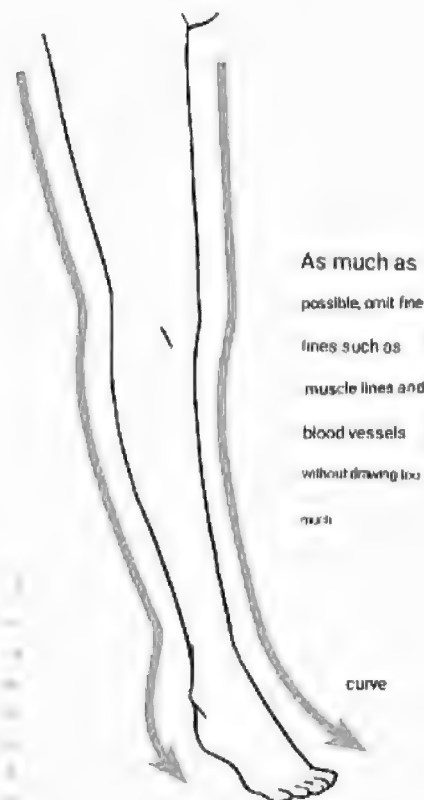

If you draw too much, the cuteness will decrease.

<< Point ② Do not make a straight stick >>

If you draw your legs straight like a stick, you will not be able to express the feminine curvaceous beauty. I draw consciously the line of supple carp.

Do not draw the sneak in a straight line, but make it slightly curved. A delicate curve is important

As much as possible, omit fine lines such as muscle lines and blood vessels without drawing too much

NG

I can't draw a curve at all

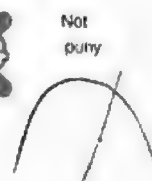

<< Point ③ Thigh and calf fat >>

Fat that approaches

NG

Not puny

Stretch your legs

The soft part of the leg
For example, thighs and calves. Let's express the feeling of puny with a line.

Seiza expresses the roundness and strength of the line that the soft fat is crushed more because it takes weight.

Spread sideways

The more you bend the backs of your legs so that they stick together, the more fat in your thighs spreads

Always

When you stand on your toes, the bulge of the fluff is more prominent than when you are standing normally, and it rises sharply. As a result, the curve becomes larger, but when viewed from the front, there is not much change.

Don't forget the line that goes inside your thighs when you bend your legs!

Approximately 1.5 heads (see page 3)

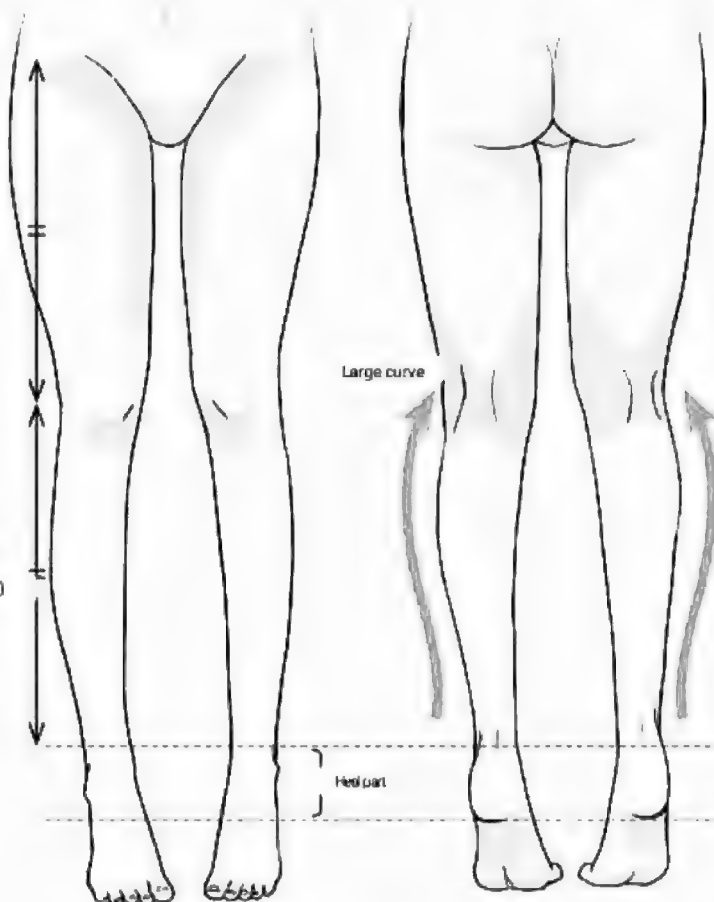

A soft curve flowing from the calf

When you bend your legs, the fat in your hips (especially near your knees) also spreads sideways

<front>

<back>

Large curve

Heel part

Cute Point

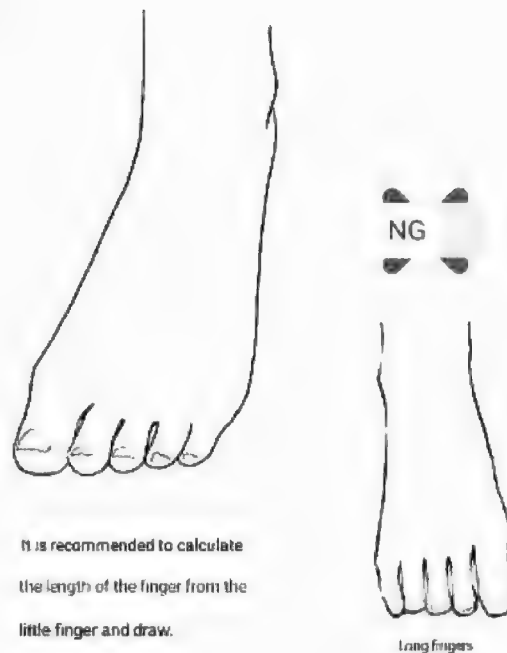

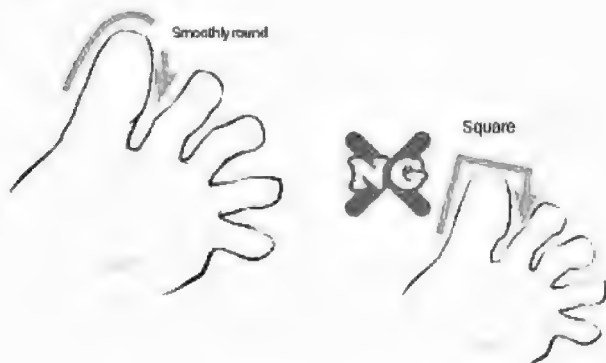

The Achilles tendon pops out. Does this desperation tickle the asylum? To the drawiness

◆ Basic points to draw your legs more cutely

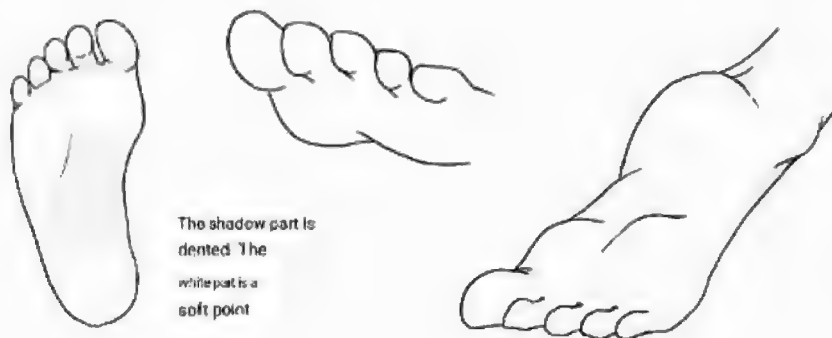

<< Point ① Finger shape / length >>

Be aware that the shape is 'smoothly round'. It is an image of scratching the corner. Also, if you make your toes too long, the impression of 'beautiful woman' will be stronger than that of 'beautiful girl', and the cuteness will be reduced.

It is recommended to calculate the length of the finger from the little finger and draw.

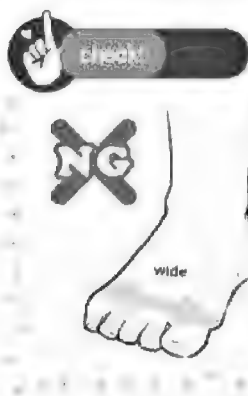

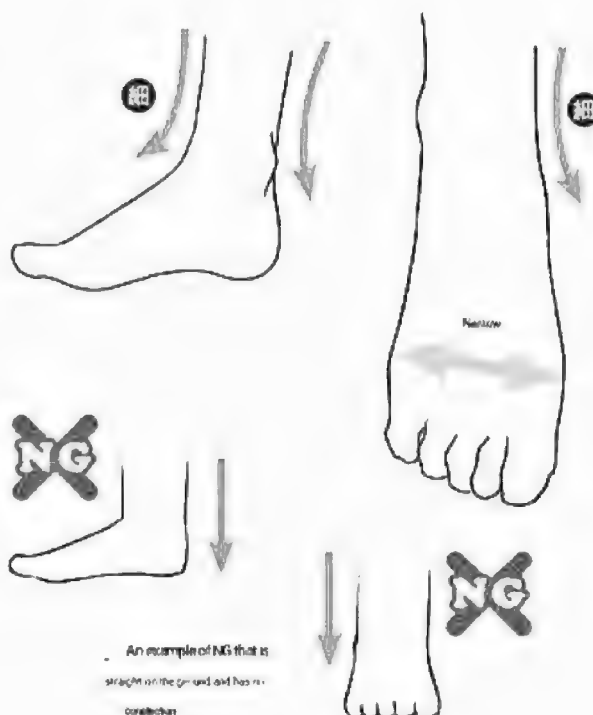

《Point ② Plump feeling on the soles of the feet》

Normal
The roundness of the heels and the fat on the soles of the feet are valuable soft points, as the feet do not get much fat. A feeling of puffiness is important!

《Point 3 Delicate ankles and insteps》

The tightness of the ankles and ankles and the narrowness of the instep make the viewer feel delicate.
Cute with Zudong and straight, elephant-like legs
Cannot be expressed.

Wide instep,
If you draw your finger in a square, you will see a rugged foot as shown on the left.
.....

❖ Divide your legs into 5 parts

It is easier to understand the "structure" by dividing the legs into five parts while incorporating the basic points for drawing more cutely.

Become.

• Ankle

② Ankle (outside / inside)

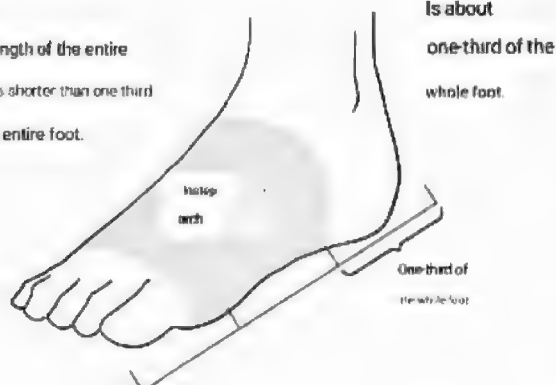

③ Heels

④ Instep + arch

⑤ 6 toes

The length of the entire finger is shorter than one third of the entire foot.

《Inside》

Inner ankle (内果)

"Front"

The ankle is more protruding on the outside than on the inside.

Cute Point

The toes can be expressed cutely by drawing each fingertip toward the middle finger.

"back"

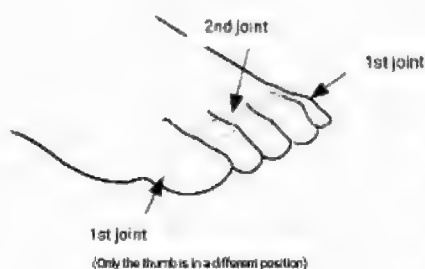

Draw a line of the Achilles tendon and ankle

Increased the delicate degree of

"Toe"

side armor

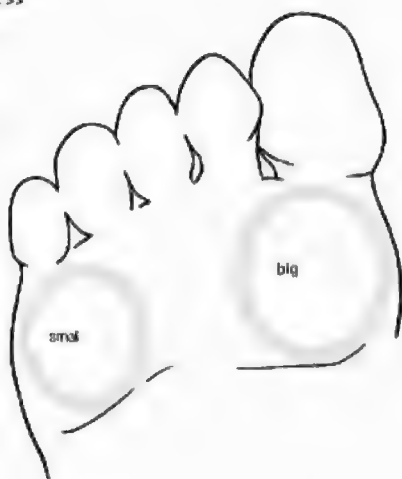

The toes are the 1st joint and the 1st joint. It is difficult to bend only two joints, and both joints are curved. It will be lost.

<< The back of the toes >>

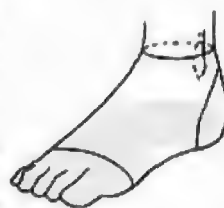

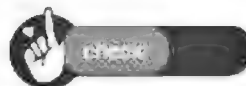

Arch

small

big

The bulge on the sole of the foot is larger on the big toe side

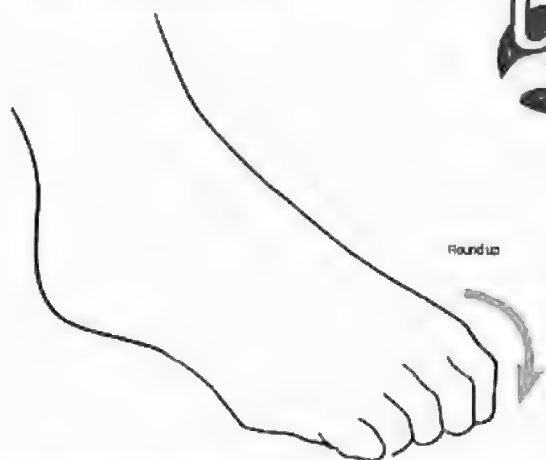

The landing foot will be a picture with the foot on the ground when the five parts are assembled based on the footprint.

❖ Facial expressions on the legs that look cute

The foot has fewer moving parts than the hand, but it is cute by moving the toes and sticking the feet together. You can show your facial expression.

《Curly round your toes》

Round up

The instep is curled up with the fingers.

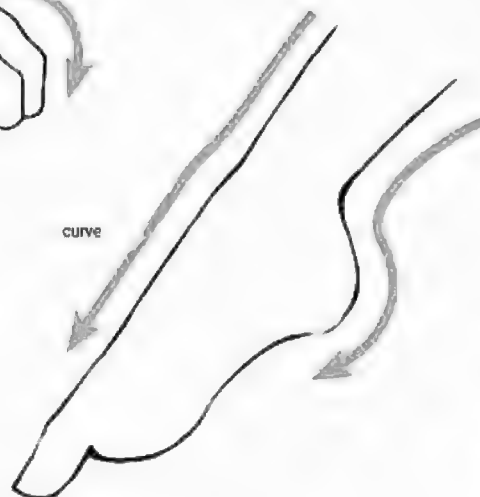

《Open your finger》

《Stand only your thumb》

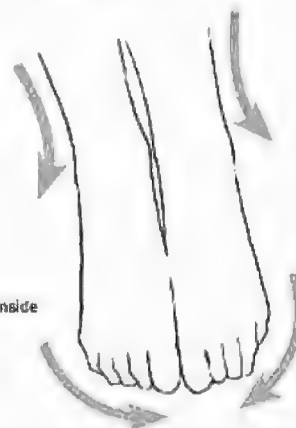

Just like your hands, it's good to let your fingers flutter

curve

《Align your feet》

Bring inside

Cute Ankle constriction and Point Instep line

The glamor emphasizes femininity. The point is to stick to your feet.

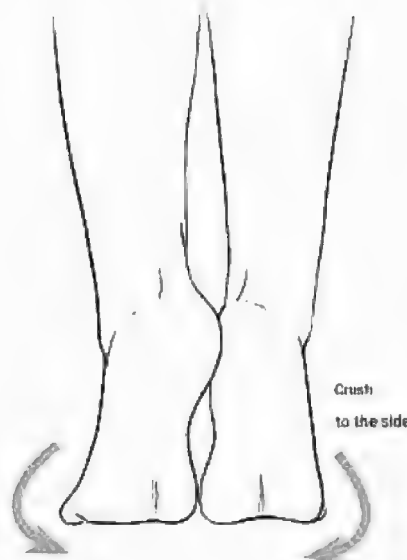

<< Stretch your legs with a pin >>

《Make your fingers moody》

The point is to entangle the toes and look into the other toe from between the toes of one foot.

《Standing on tiptoe》

The bulge on the sole of the foot is widened to the side to express the crushed weight.

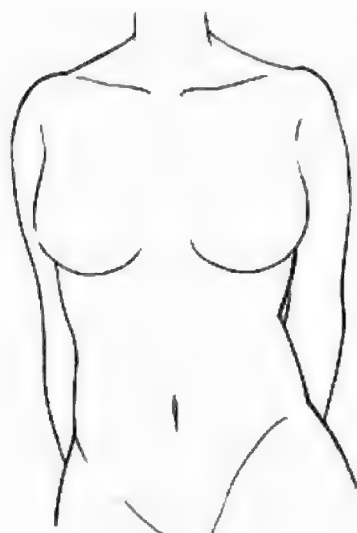

Breast (breast) that is characteristic of girls

There are many points to hold down, such as the connection with the armpit and the position from the collarbone, rather than just thinking of it as a spherical object on the chest.

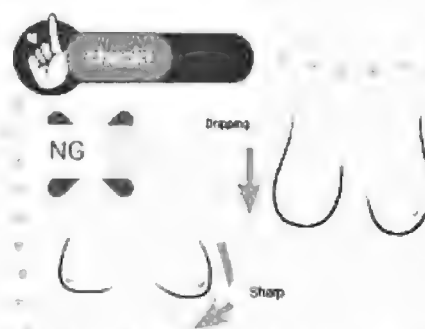

❖ How to draw your chest more cute?

The chest is the anterior part of the trunk from below the clavicle to the Abara. Let's express the girl's breast, which is the most prominent among them, more cutely. Points can be broadly divided into three types.

《Point ① Breast shape (roundness)》

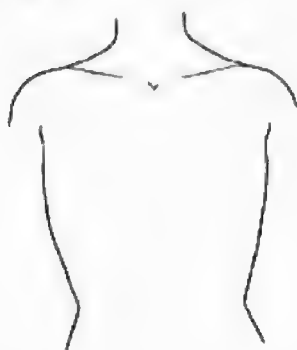

There are many types of breast shapes, but in this book, the ideal shape is a basic, beautifully rounded breast. This is because the feminine roundness is emphasized rather than the drooping or pointed breast.

01

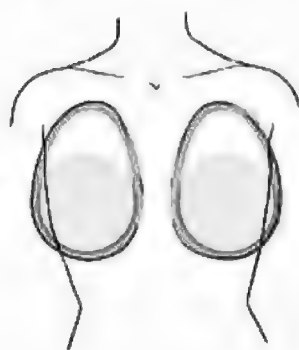

Draw the torso

First, draw the chest without drawing the breast. It is important to be aware of Abara.

02

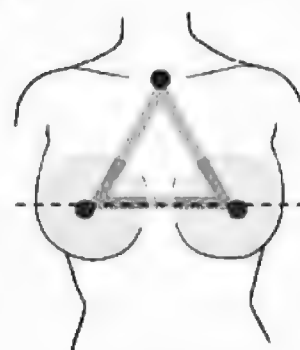

Imagine an egg shape and attach a breast

Draw the breast on the chest plate in the shape of an egg. An image that stretches a perfect circle toward the clavicle.

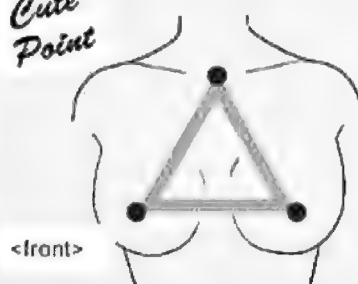

03

Position the nipple

Position the nipple by drawing a regular triangle with the apex between the collarbones and the base in the middle of the breast circle.

Cute Point

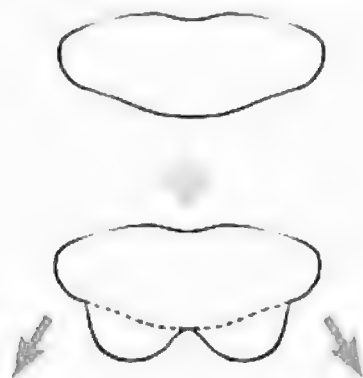

Ideally, it should be an equilateral triangle between the collarbones and when both nipples are squeezed.

<Side>

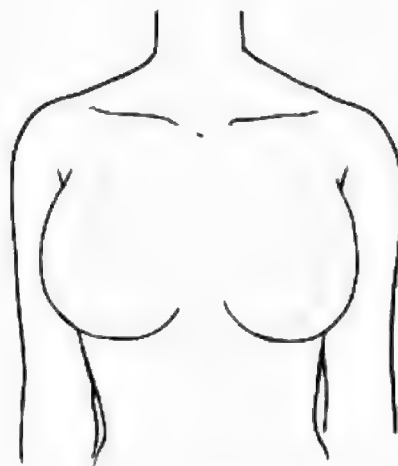

Slightly dent the bottom of the collarbone and draw a line that connects to the perfect circle of the breast.

《Point ② Breast top angle》

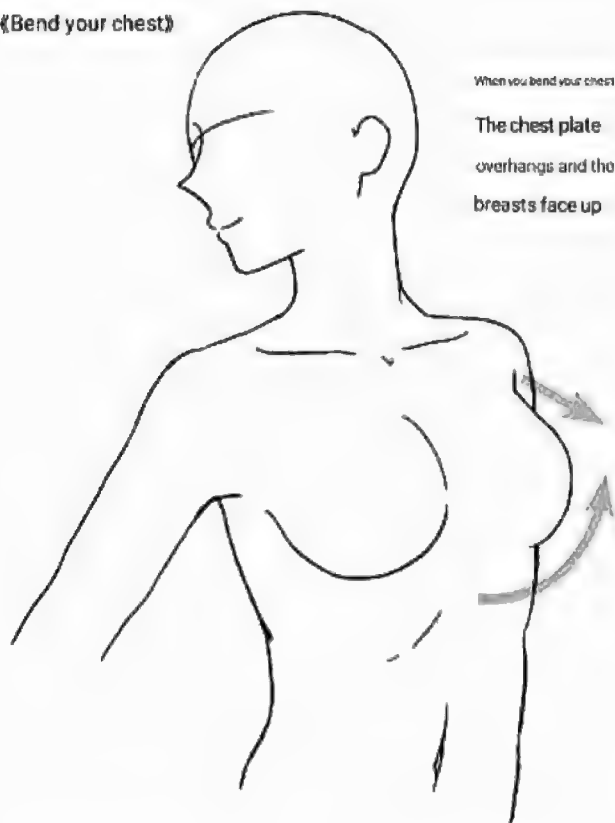

The chest plate is curved. Therefore, the breast top faces outward. Match the angle of the chest plate.

It is an image that juts out toward the outside, and it is easier to draw if you add a crosshair atari.

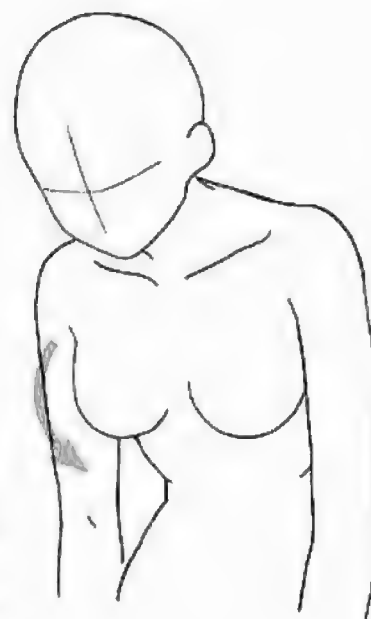

«Bend your chest»

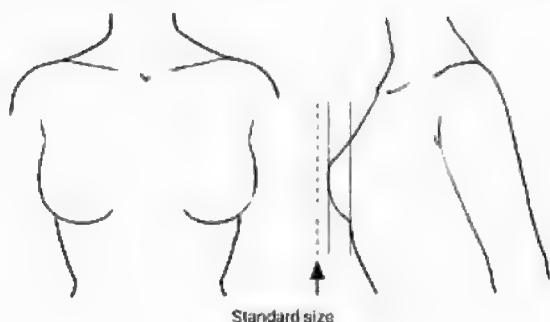

When you bend your chest
The chest plate
overhangs and the
breasts face up

«Curly back»

The curve of the
chest plate is the
lower chord, so the
breast faces down.

◆ Breast size

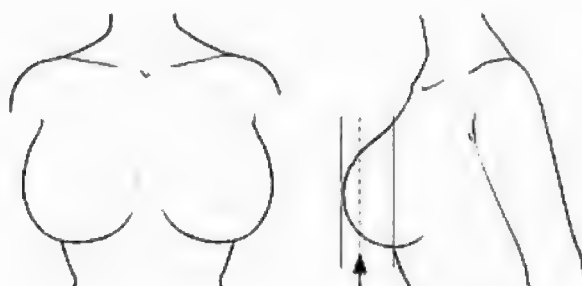

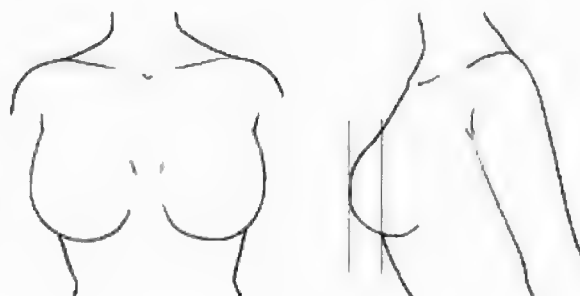

Standard size

«Small breasts»

It is a bulging breast. The distance between
the chest plate and the top of the breast
is so small that there are almost no
dents under the collarbone.

<< Standard >> An
average breast size. There
will be a slight valley
between the chests.

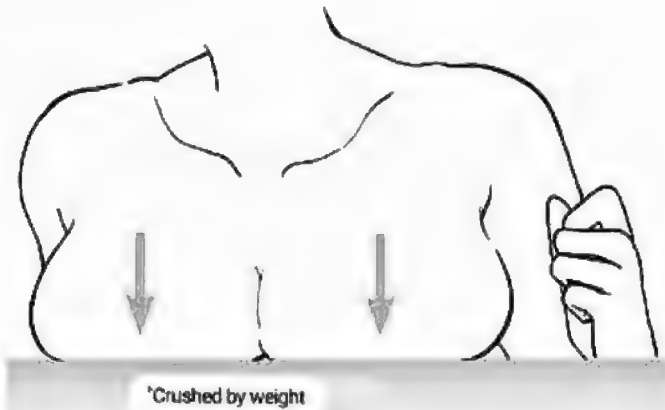

Standard size

«Big breasts»

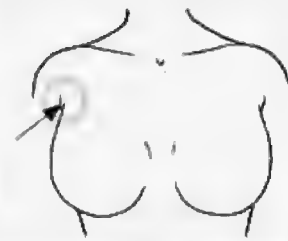

For big breasts, the distance between the chest
plate and the top of the breast increases. Also, the
point is to draw a large circle at Atari.

《Point 3 Emphasis on elasticity and softness》 The softness of the fluffy breast is a characteristic of a particularly conspicuous female child. Swimsuit or crushed by the weight of the body. If you draw a tightening such as, the elasticity and softness of the breast can be emphasized.

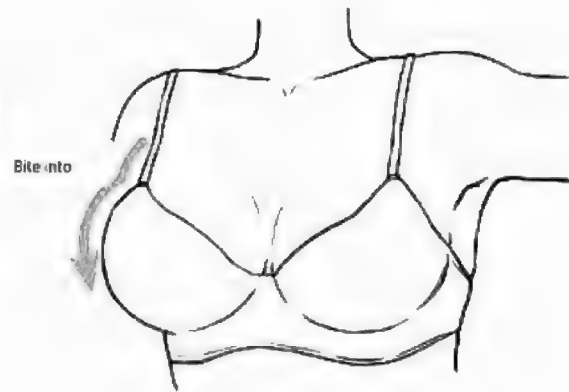

Cute Point

Make this part buzzy

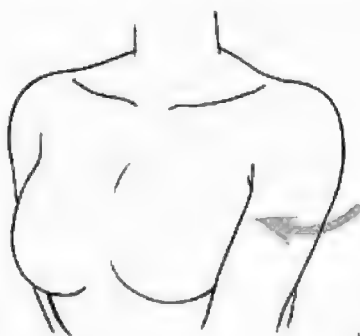

Make a line to make the fat between your shoulders and breasts squeaky, and your breasts will look more cute.

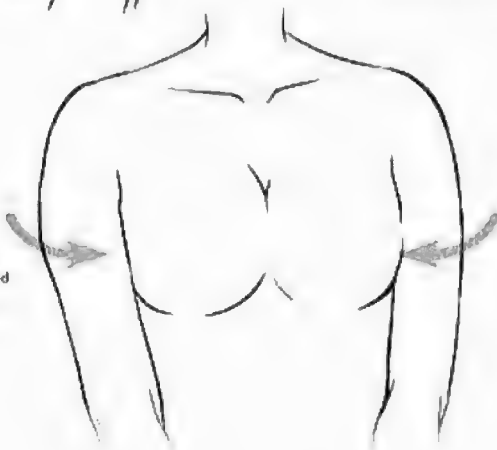

* Breasts that approach depending on the shoulders and arms

By turning your shoulders and arms inward, your breasts will naturally move closer. I will not cover it because it has a strong sexy impression and is not suitable for the concept of "cute girl" in this book. * See "How to Draw Girls Human Body Parts" in this book's sister edition.

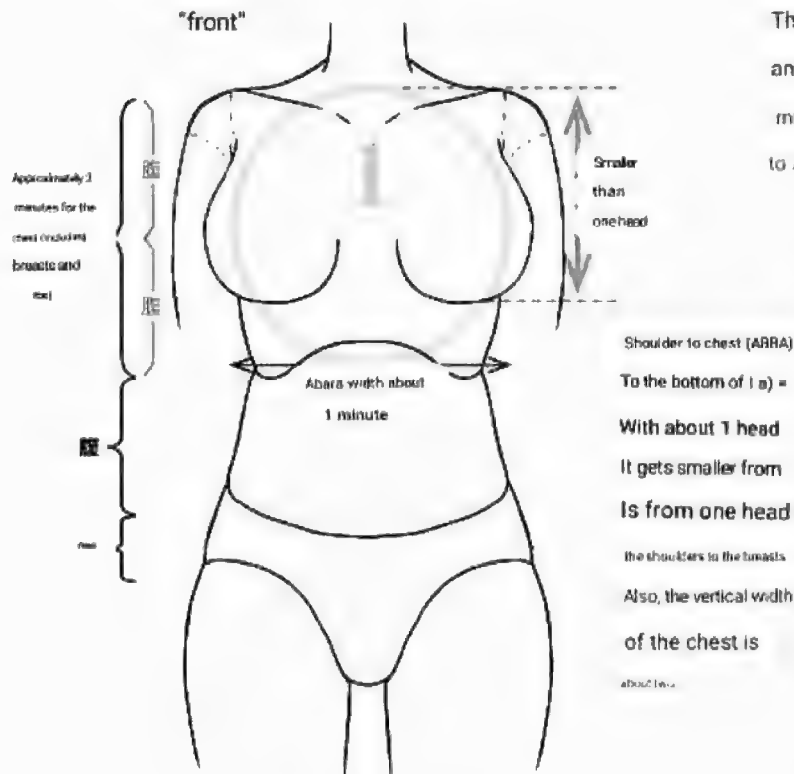

When you place your hand on your chest, your breasts will naturally come together.

Cleavage collapses and breasts stick together

Smooth and soft belly (flow from chest to waist)

When considering the structure of the body, it is necessary to grasp the ribs and the abdomen, but the lines are omitted and the expression is made only by the lizard to create a cute look.

The point is the belly + navel dents that are soft and smooth without adding too much abdominal muscles. The trunk is divided into three parts: chest (up to Abara), abdomen, and waist

NG

NG

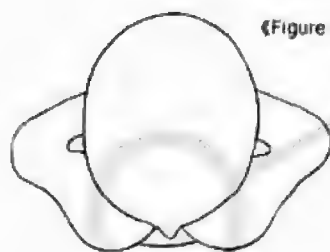

A small belly without a constriction

A belly line that is sharply

constricted and does not contain ribs makes

the curved line less attractive.

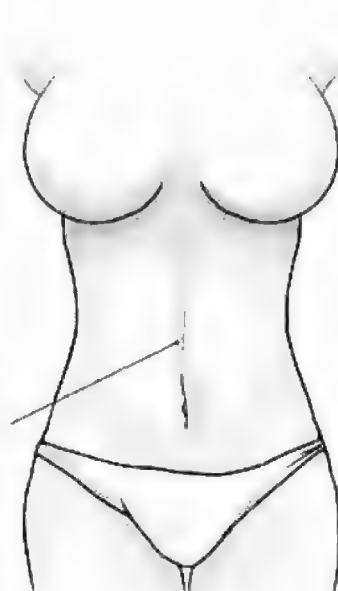

《Figure from above》

From above, you can see your abdomen between your breasts.

◆ Shadow is the point!

Shading can express the softness and roundness of the abdomen rather than drawing only with lines. If your stomach is too lean and crunchy, you will not feel the softness and the prettiness will decrease.

Line following
the navel

The raised part

Make a dent in the vertical line that follows the navel, centering on the raised part of the stomach.

"Front"

Depending on your body shape, you can raise your ribs by bending your back or raising your arms. By inserting this line, you can express a delicate figure.

The line at the bottom of the Abara (the figure on the left is represented by a shadow) stands out from the shoulder near the position of the head (see the previous page).

"side"

The navel part is dented. It is an image of being sucked toward the antlion like an antlion.

❖ About the navel

The abdomen is a part where there are very few parts that can be expressed by lines. Therefore, it is no exaggeration to say that the navel determines most of the stomach.

The key to drawing a navel beautifully is to draw an image of the diamond mark.

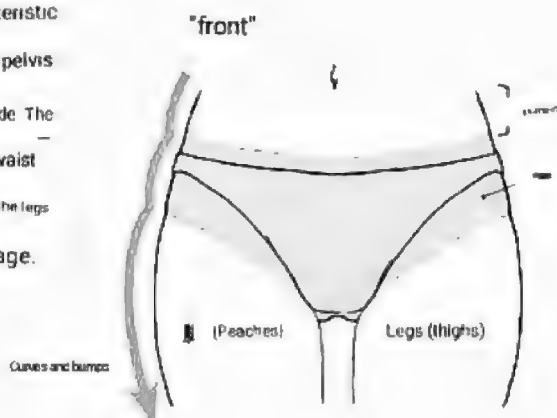

If you curl your back or bend your body, the lines of the hen will stretch horizontally instead of vertically.

Be aware of the existence of the pelvis (flow from the abdomen to

the waist and legs) If you draw with the consciousness that the waist is pulled up, you can see the "cuteness" between the girl and the adult.

I can express it.

The characteristic of the girl's pelvis is that it is wide. The hem of the waist widens toward the legs. It is an image.

NG

A waist without unevenness is NG without drawing a step at the boundary between the abdomen and the waist

'side'

The lower abdomen bulges a little and flows from there to the crotch

increase

Face and body that bring out the cuteness of girls

If you want to make your hips look cute, we recommend putting your hands on your hips and sticking your hips out to the side.

* Raise your legs

It will be easier to understand if you draw the hidden part properly with Atari.

Be aware of the existence of your hips and connect them with smooth lines

Cute Point

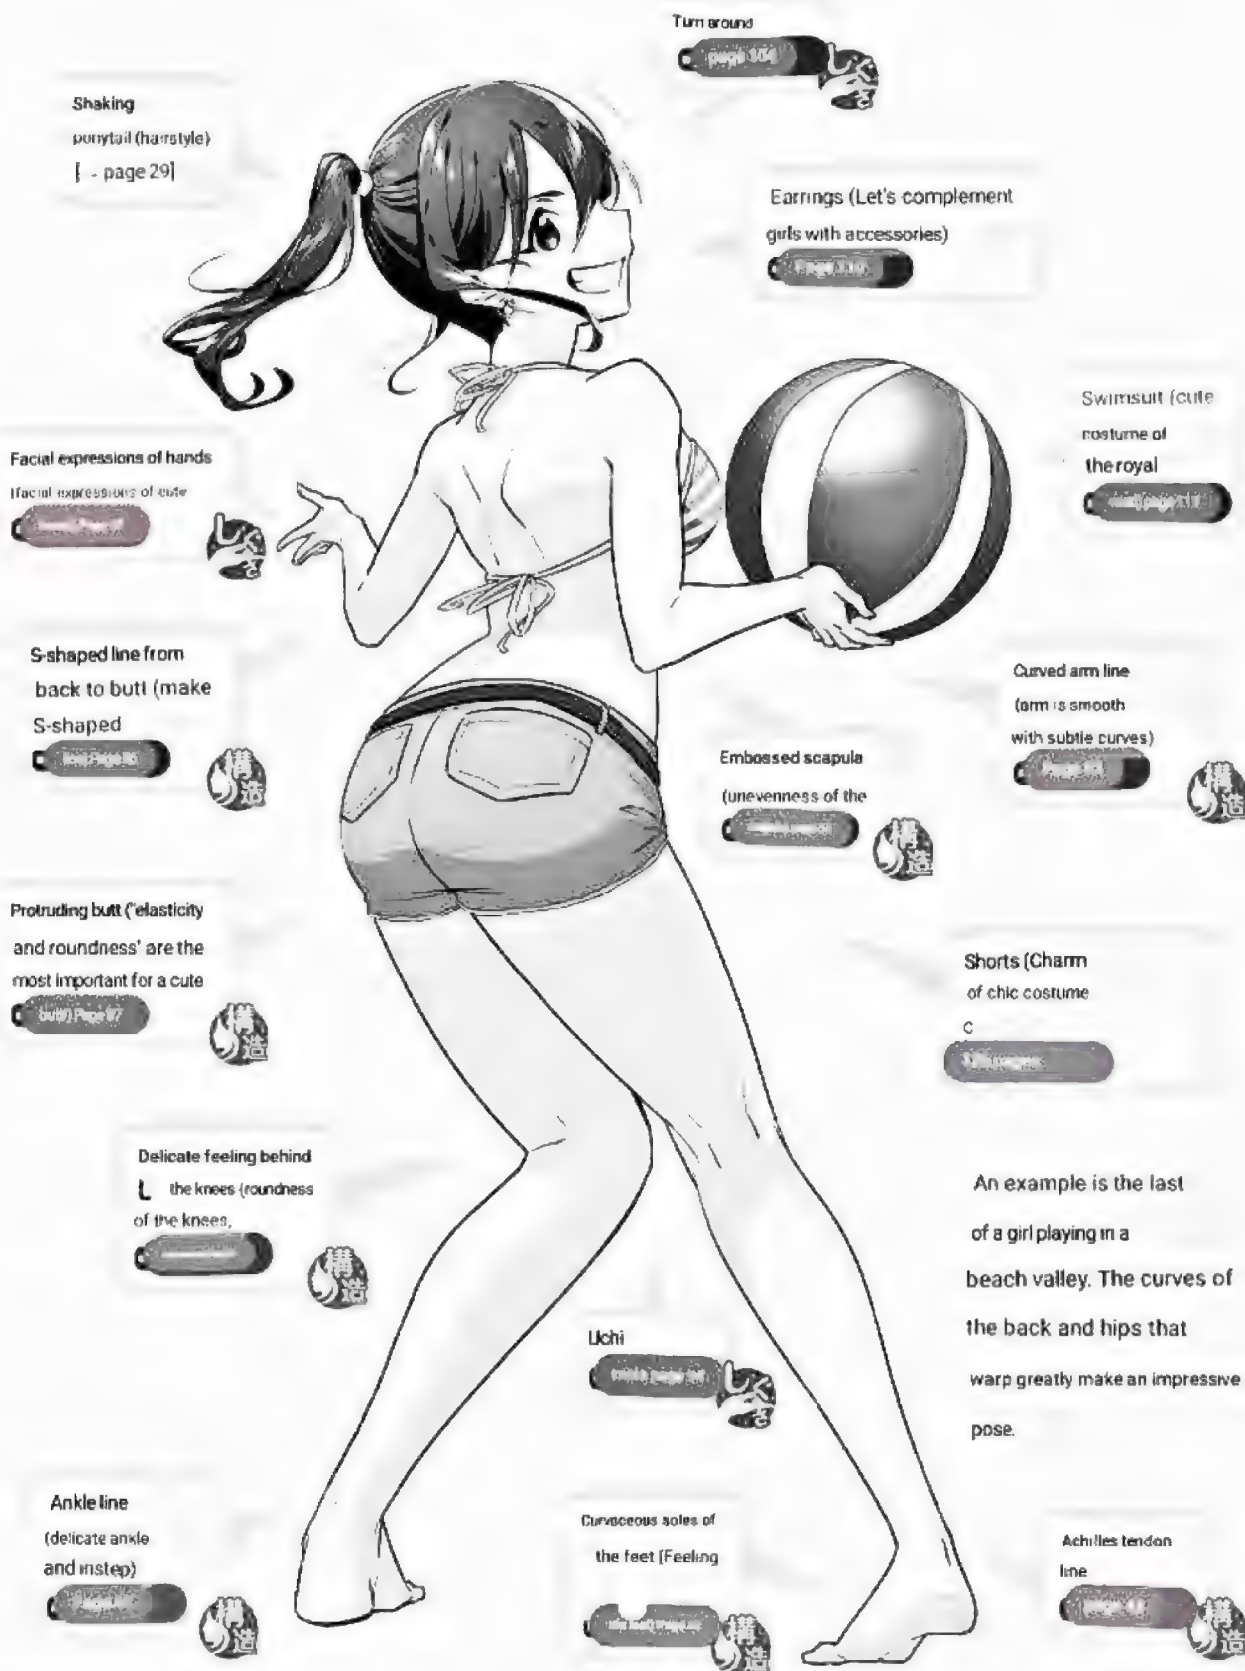

"The point is the softness of the part toward the buttocks

Capture and draw the flow of the body

There is a flow in the movement of the body. If you capture the flow well and draw it, you will be able to draw attractive pictures with movement. Also, if you can grasp the flow, you will be able to easily draw the movements of your hands.

Face and body that bring out the cuteness of girls

◆ Example 3 Making — Draw from one flow (axis)

01.

Body flow (axis) into one curve

If you want to draw a
feminine body line,
first represent the flow (axis)
of the body with a
single curve, and then roughly
draw the Atari line
of the head and body

part.

02.

Draw your body while being aware of the inclination

I will draw the body while making
the best use of the curve
of the flow (axis) of
the body. The point is to
pose with the inclination
of the shoulders and
hips in mind.

03.

Characterize

After deciding on
a rough pose
first, I will think
about the
character of the female
child and draw
it. This time, I
decided to be an
active female
child character.

Along with that, we
will adjust the
pose.

I changed the direction of my legs to a
shape that stretches inward.

04.

Confirmation / drawing of human body
structure + Atari of coloring

late Considering the character of the girl, I fine-tuned it
to a Doint pose that this child would take. Reflecting the
character's character in its appearance and behavior is
the key to making a girl's child look more attractive.

The back is charmed by the S-shaped line! (Flow from neck to back and waist)

The girl's body has a lot of curves and gives a soft impression. The line that resembles the curve as the "S" in the alphabet creates a large flow of the body.

❖ Basic points of the back

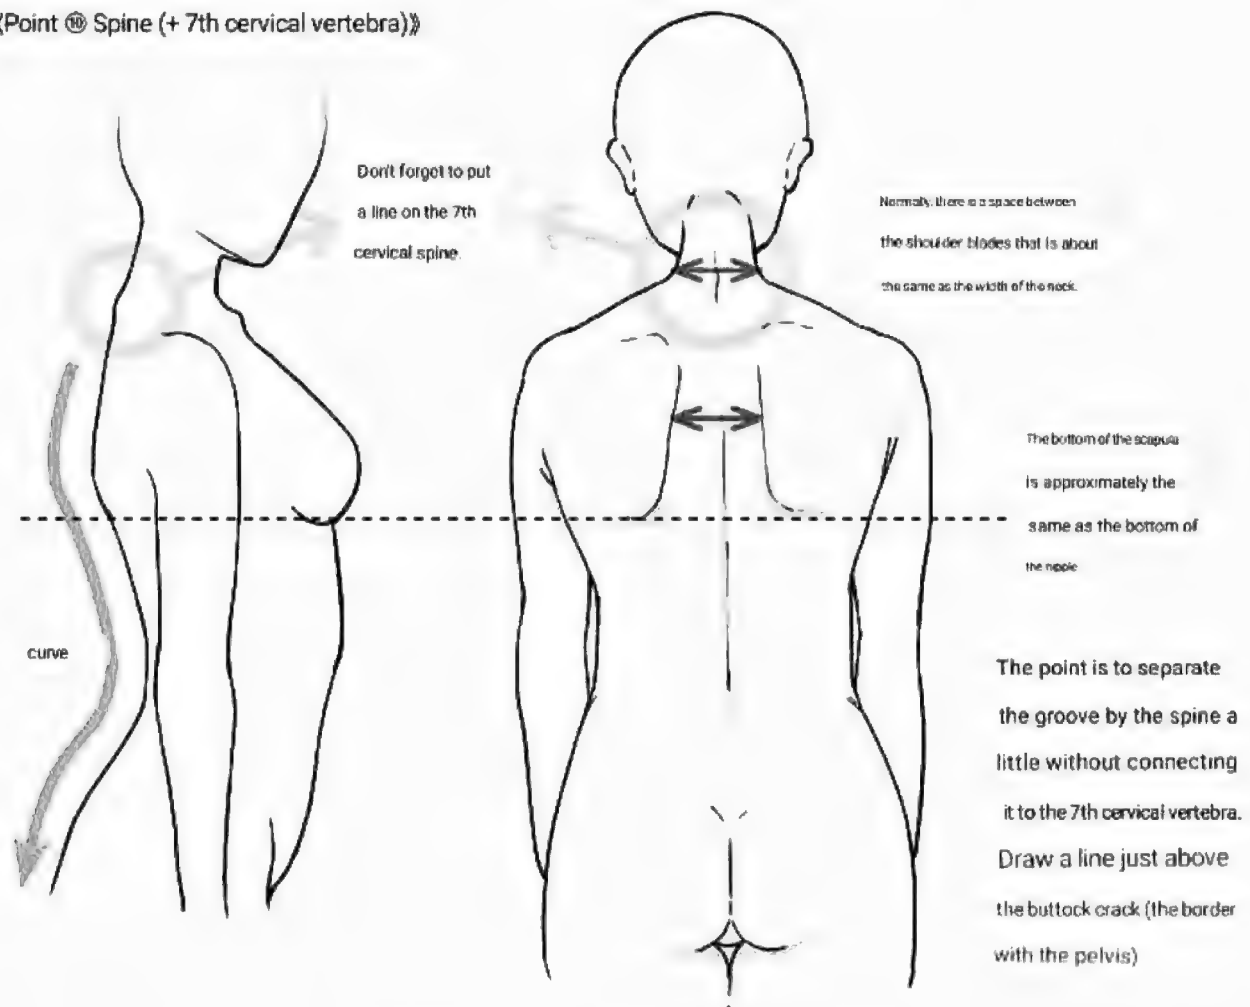

Before the S-shaped line, let's first look at the basic points of the back. It can be roughly divided into three.

Cute In the case of
Point Pull your arm back
example ②, the point is to
emphasize the concave and convex of
the scapula while creating an
S-shaped line with and (see page 56
for details)

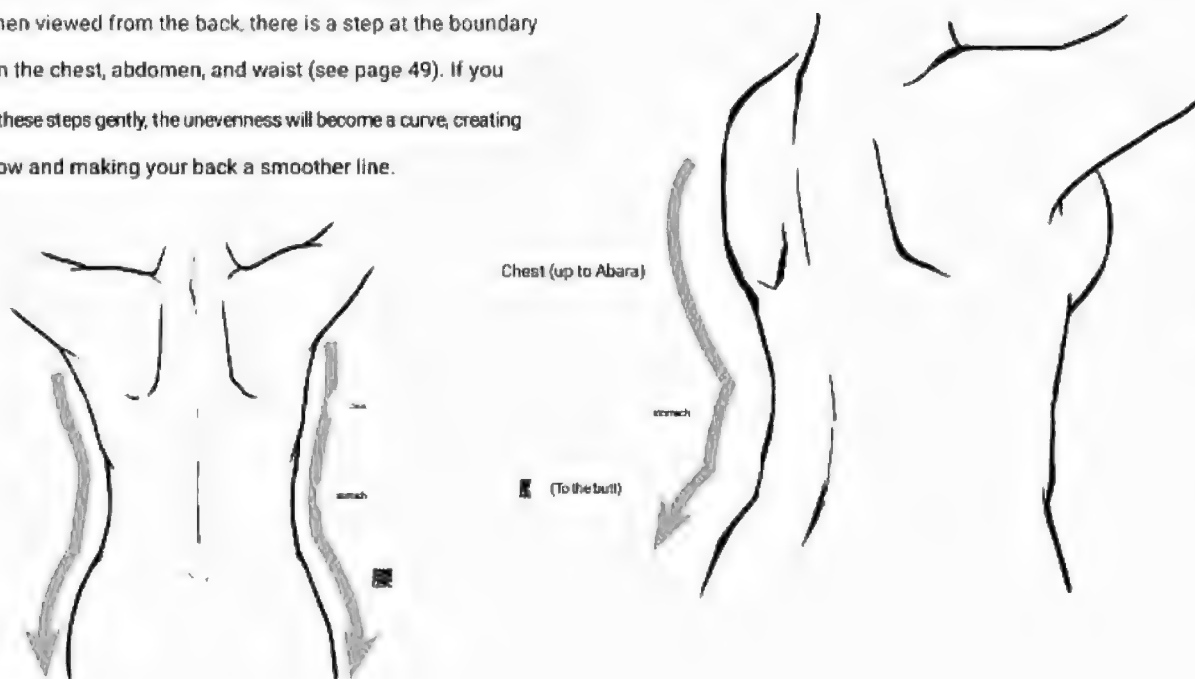

Flow on the back of example ①

《Point ③ Spine (+ 7th cervical vertebra)》

《Point ② Chest / Abdomen / Waist unevenness》

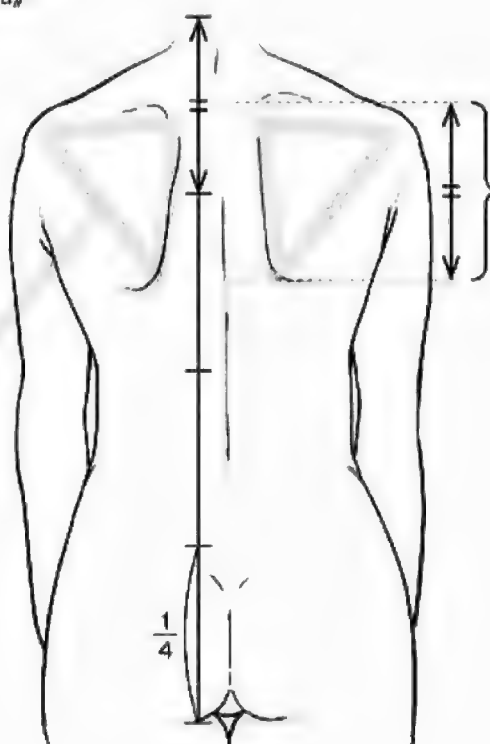

Even when viewed from the back, there is a step at the boundary between the chest, abdomen, and waist (see page 49). If you connect these steps gently, the unevenness will become a curve, creating a soft flow and making your back a smoother line.

《Point 3 Unevenness of the scapula》

The gap between the bony feel of the shoulder blades and the soft curved lines of the back makes the back more attractive.

Be aware of the inverted triangle in the scapula and enter the line

The vertical width of the scapula is about a quarter of the length from the neck to the buttocks

<When you curl your back>

When you curl your back, the shoulder blades move outward, widening the space between the shoulder blades

<When the shoulder blades are pulled together>

If you pull your arms back or bend your back to pull your shoulder blades closer together, the space between your shoulder blades will be narrowed.

Cute Point

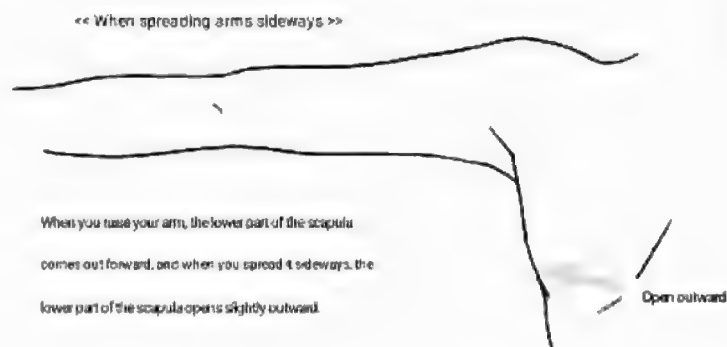

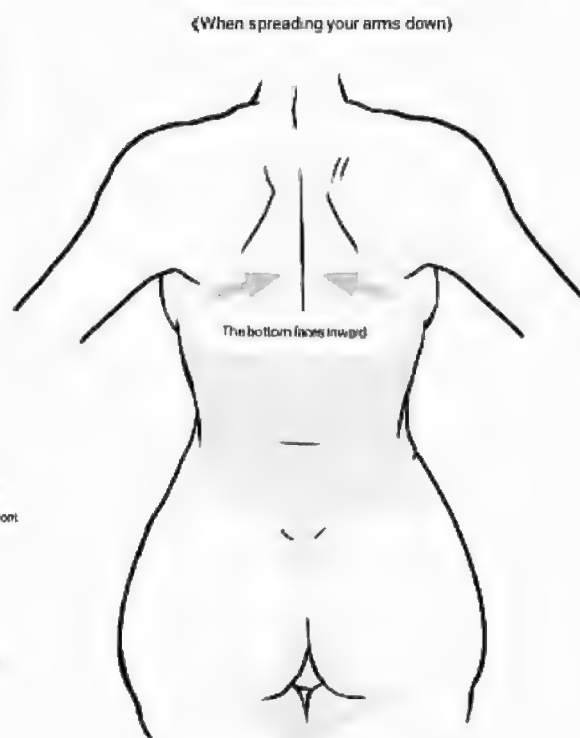

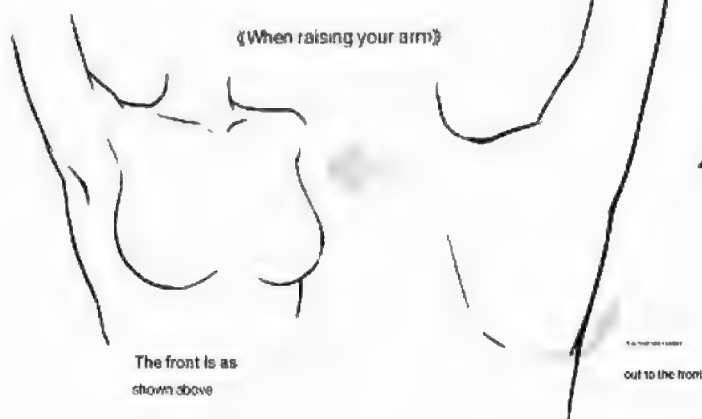

The point is that the shoulder blades get closer and the groove on the back becomes deeper

❖ Connection from arm to scapula

Here, how to connect from arm to scapula

Let's look at.

By turning your arms back, you can stretch your chest and bend your back.

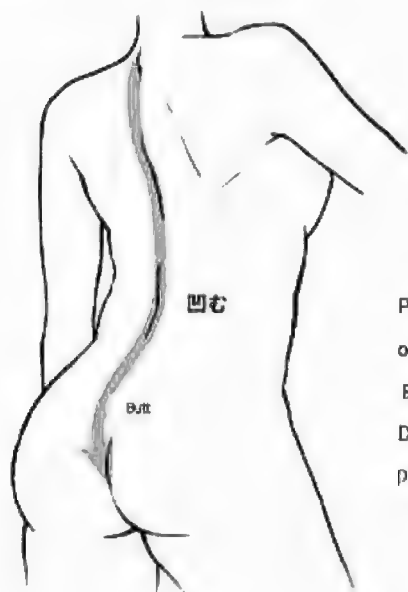

◆ Make an S-shaped line

After holding down the basic points, make an S-shaped line. Posing with an S-shaped midline of the spine brings out the suppleness of the woman even more and makes the back attractive.

Cute S-shaped line deepens waist neck

This is one point on your back.

Make an S-shaped line that dents from the shoulder blades to the center of the navel and bulges from there to the buttocks.

Pull your arms back
or tilt your hips,
Beautiful S-shaped line
Draw a visible
pose

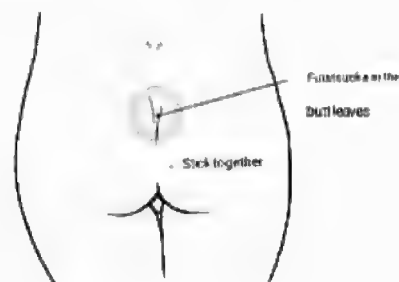

Face and body that bring out the cuteness of girls

"Resilience and roundness" is the most important for cute buttocks !

The buttocks are not clearly separated from the legs and hips,
so it is difficult to draw. So I will explain how to draw easily.

Instead of putting a line, it is also
possible to express the roundness of the
buttocks on the back side with shadows

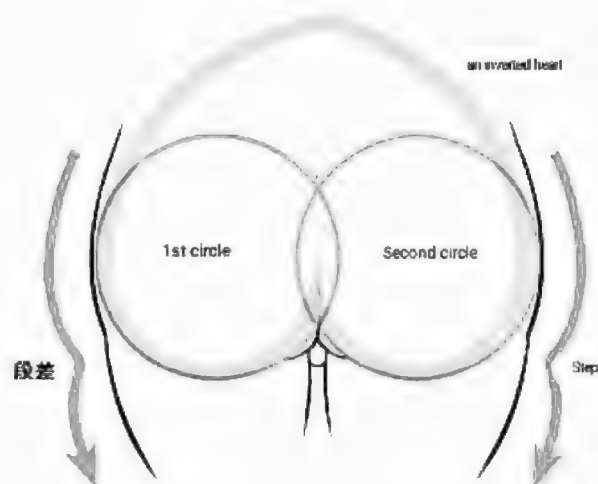

❖ How to draw a cute butt

Draw the butt with two circles to make an inverted heart shape. After that, if you add a little step when connecting to the thigh to make the roundness of the buttocks easier to understand, the cuteness will increase.

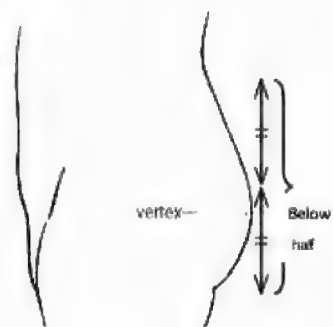

Image of an inverted
heart-shaped peach

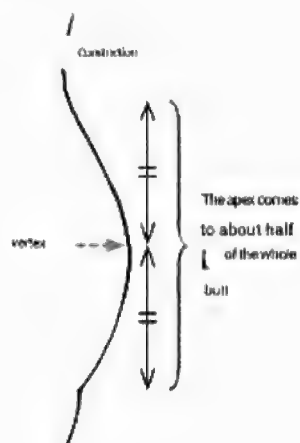

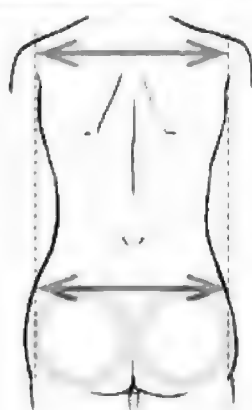

<< View from the side >>

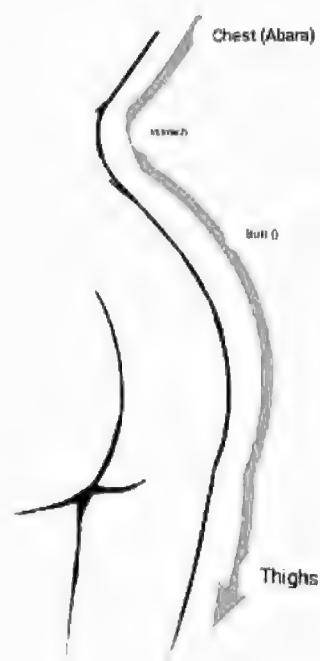

As shown in the figure above, the rounded vertices of a normal butt are at the bottom, but to make it more cute, set the vertices a little higher

Seen from the side, it looks like a chestnut.

The width of the shoulders and hips is almost the same. Inevitably the width of the butt is about the same. So let's use it as an index of the size of the two circles.

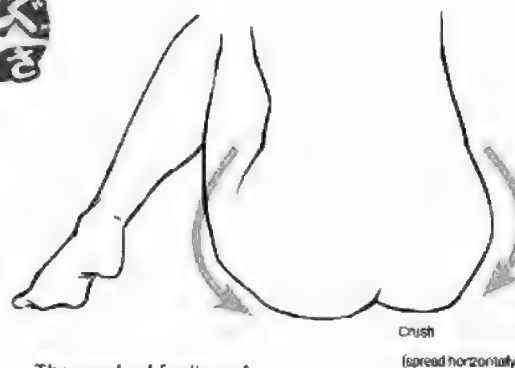

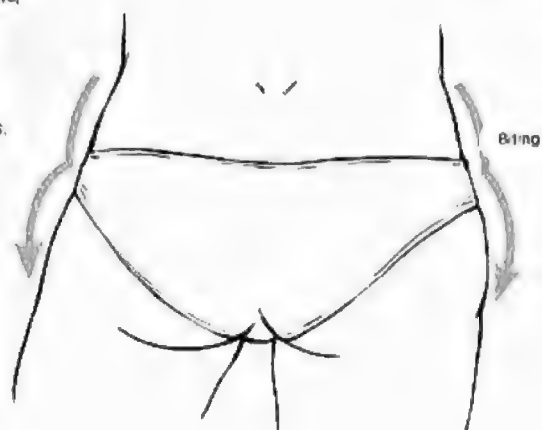

From stomach to butt, from butt to legs. There is also a step in the line that connects to. It will be a curve, gentle. I will connect to.

◆ Elasticity • Emphasizes softness

Swimsuit / underwear

With which bite, it expresses the soft fat of the buttocks.

The crushed feeling of the buttocks when sitting is a cute point!

The human body is symmetrical.

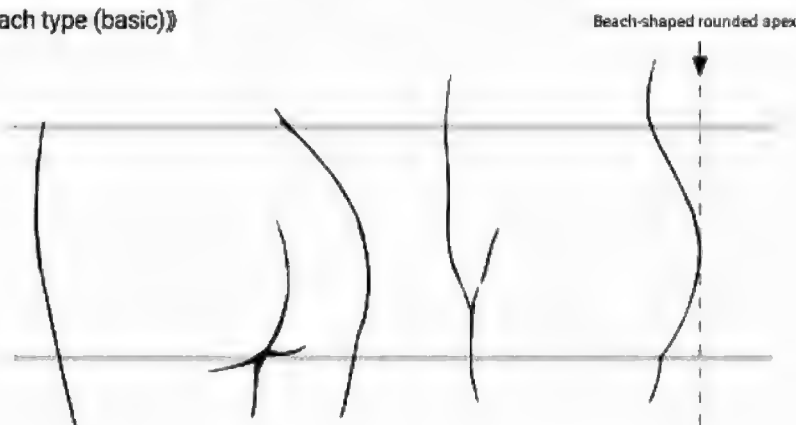

However, it is deformed by being
pressed or pushed by weight.

The butt that is crushed by gravity has a slightly
crushed circle. Also, by bending the thighs, the
fat in the buttocks will flow to the thighs.

However, please draw so that you can see that the
basics are symmetrical no matter how crushed.

◆ Main cute butt type

《Peach type (basic)》

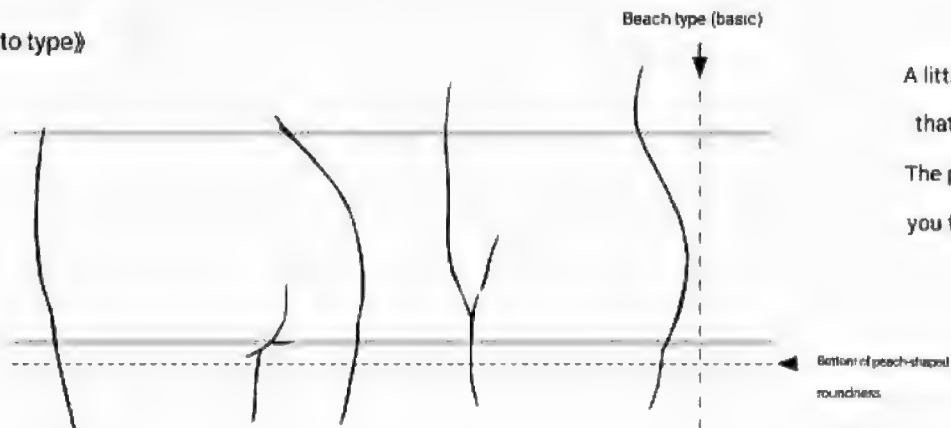

Since the width of the buttocks (waist)
is almost the same as the shoulder
width, the volume of the buttocks
is not the width, but is mainly
expressed by the thickness
and the roundness of the two hills.
Among the shapes of the buttocks
that have different tastes, the
peach type is a basic cute shape. There
is moderate meat.

*Cute
Point*

For flesh-filled buttocks such as
the basic type, the cracks are
divided into two by the collision
of the two hills. It can't be a
small buttocks with a tight shape.

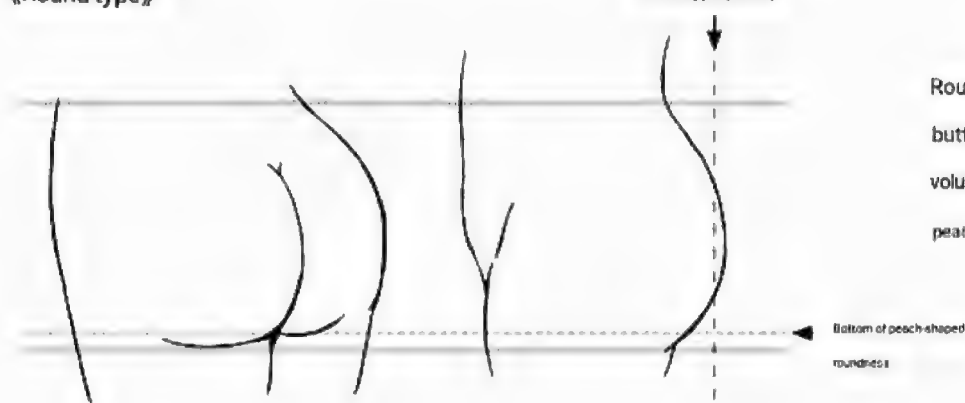

《Kutto type》

A little small buttocks
that have been pulled tight.
The prettier shape makes
you feel cute.

《Round type》

Peach type (basic)

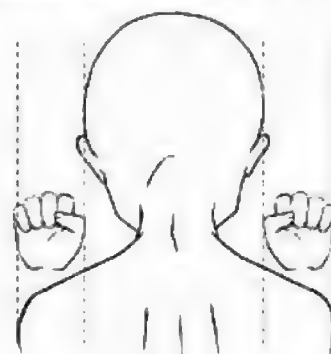

Round and elastic, crisp buttocks shape. It is more voluminous than the peach type.

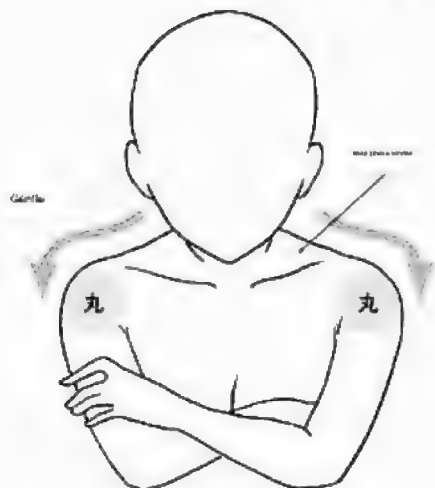

Shoulders shrug from gentle (about shoulders and armpits)

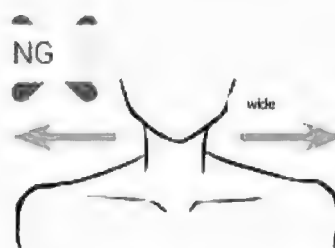

If you shrug your shoulders a little, the cuteness will increase! This is a good technique to use when drawing a pose with your arms below your shoulders.

It is recommended that the shoulder width of the "cute girl" be a little narrower. The width of the head + 2 rolls is the best

The trapezius muscles should not be raised too much, and the lines should be gently connected to the shoulders. Make sure that the shoulder line is round and gentle, and connect it to your arm

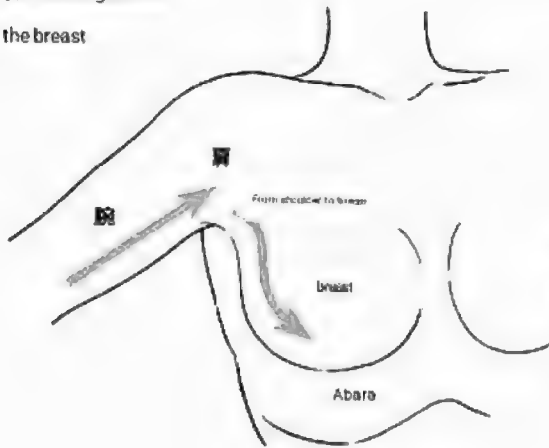

If you have a wide shoulder, you will get sick.

◆ Fascinating armpit

Armpits that you can see when you spread or raise your arms. It is a difficult part to draw, but the trick to draw attractively is to understand the relationship between the chest, arms, and shoulders.

An image of an arm sticking behind the breast

Face and body that bring out the cuteness of girls

The arm sticks into the muscles around the shoulder. That's what you can do.

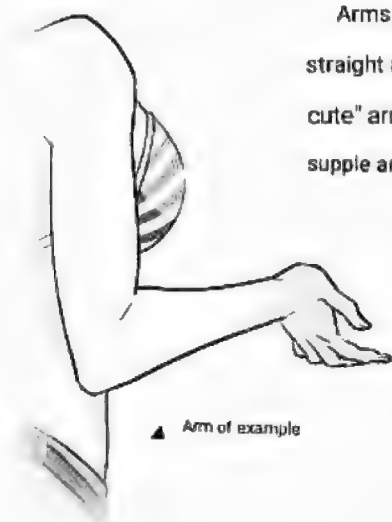

If you put a lizard, the armpit will look more beautiful.

As shown in the figure on the left, poses where the shoulders are barely visible can be easily captured by drawing from the arms and breasts

The arm is smooth with a delicate curve

Arms are often compared to sticks and cylinders. It's easier to draw, but straight arms can't express the cuteness of a girl. The secret to drawing a 'more cute' arm is to represent the convexity of the arm with a curve and give it a supple and sharp look.

NG

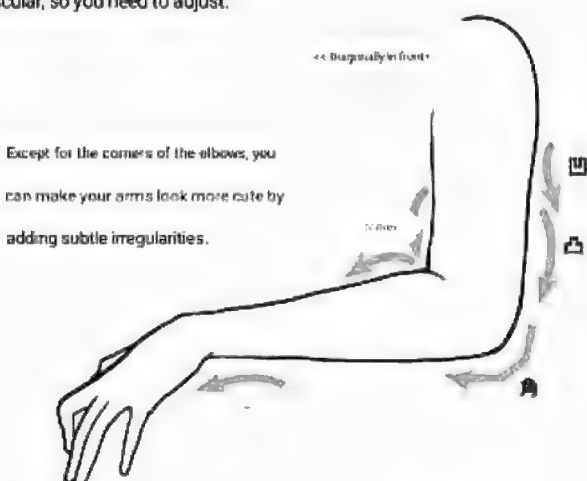

Straight

If you draw it straight, the robot will have such a stiff arm that you can't feel the cuteness of a girl.

◆ How to draw a cute arm

<< Point ⑩ Expressing subtle irregularities with curves >> To draw subtle irregularities on the arm, it is recommended to connect the shoulders, upper arm, forearm, and hands smoothly. On the other hand, if you make too many bumps and bumps, your arms will become muscular and muscular, so you need to adjust.

Except for the corners of the elbows, you can make your arms look more cute by adding subtle irregularities.

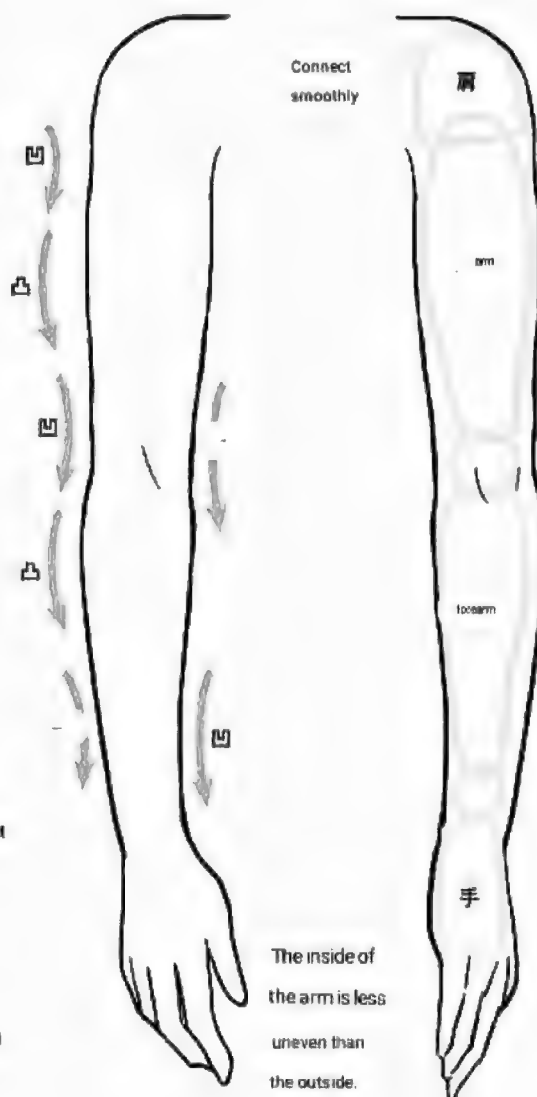

NG

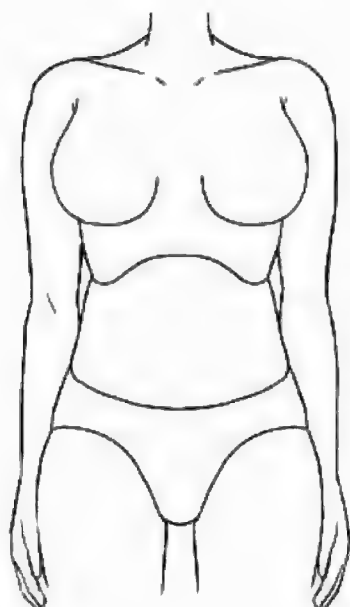

Straight

The point is the soft line that appears when you bend your arm.

<Front view>

<Rear view>

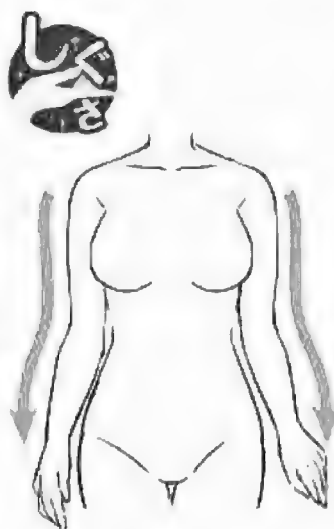

Your shoulders are behind your breasts, so if you normally lower your arms, you will be behind your breasts.

<Side view>

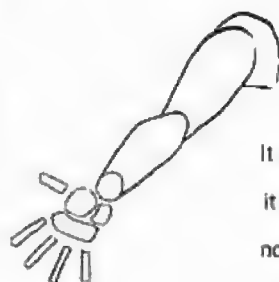

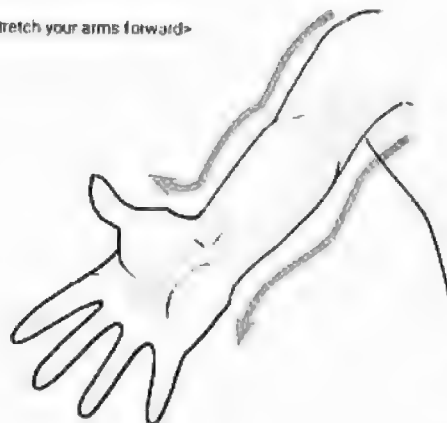

It is behind the breast.

Bring your elbows closer to your torso and point your forearms slightly outwards for a cute pose.

Cute Be careful not to draw too much point on the chest line except for the outline

<Stretch your arms forward>

It will be easier to draw if you think of it as a figure with different thicknesses, not just a stick or cylinder

<< Point ③ Softness of fat on the arm >>

The fat on the elbow side of the forearm and the fat on the upper arm are important for expressing the softness of the female child's arm. Don't forget to draw the unevenness gently to express the softness of fat.

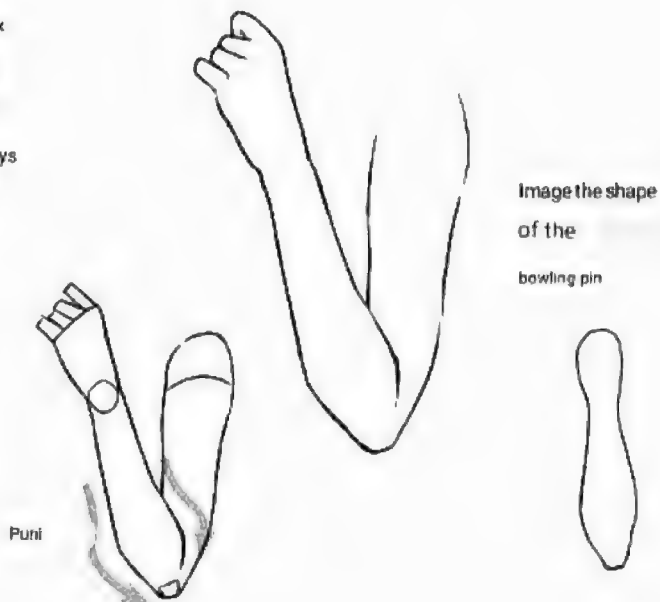

<Spread and bend your arms sideways>

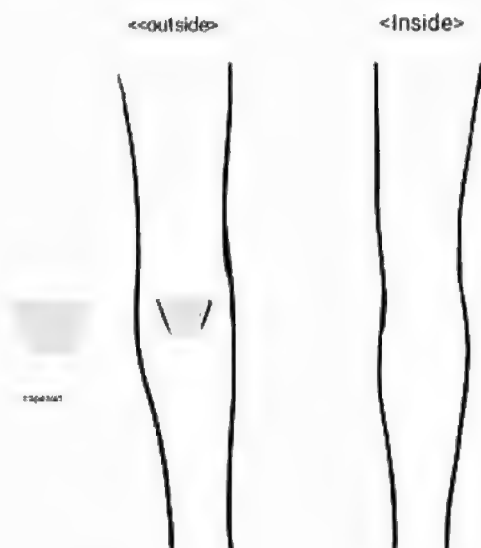

bend

Fat collects when you bend your arms

《Point 3 | don't draw much elbows》

The elbow is represented by a minimum of lines. It's the same as the knee, and if you draw too much, it will be rugged. If you draw a trapezoid with a narrow bottom side as Atari, you can draw the line of the elbow well.

Cute Point

One line

Put a line on the back of the elbow
You can express it with a shadow without using it,
or you can put only one on the side

The fat gets closer and the line gets stronger.

<Front side>

<rear side>

Seen from the side
And too many elbows came out
I don't know.

The synergistic effect of suppleness and softness is the key

You can take big gestures and feel with your hands as well as your face
When you express it, the picture becomes gorgeous.

* How to draw more cute than your hands

The basic point is not to draw too many parts such as streaks on the back of the hand, knuckles, wrinkles on the palm, and claws, and to omit them appropriately.

NG

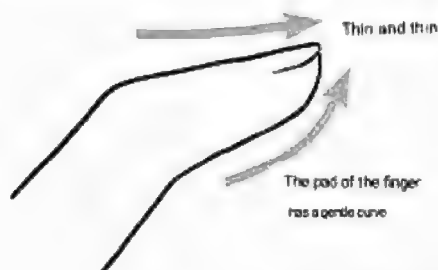

Hands with thick, square fingers and many drawings give a rugged impression.

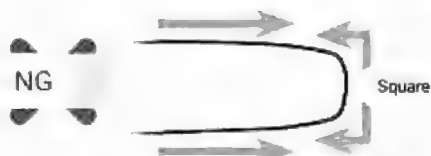

Face and body that bring out the cuteness of girls

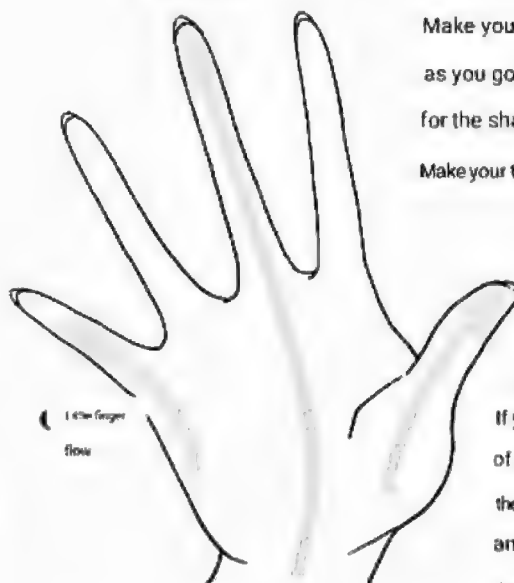

《Point ① Fingertips are thin and round》

The point is to draw the claws easily.

《 Middle finger flow

Make your fingers thinner as you go. Draw a long curve for the shape of your fingertips. Make your thumbs slender.

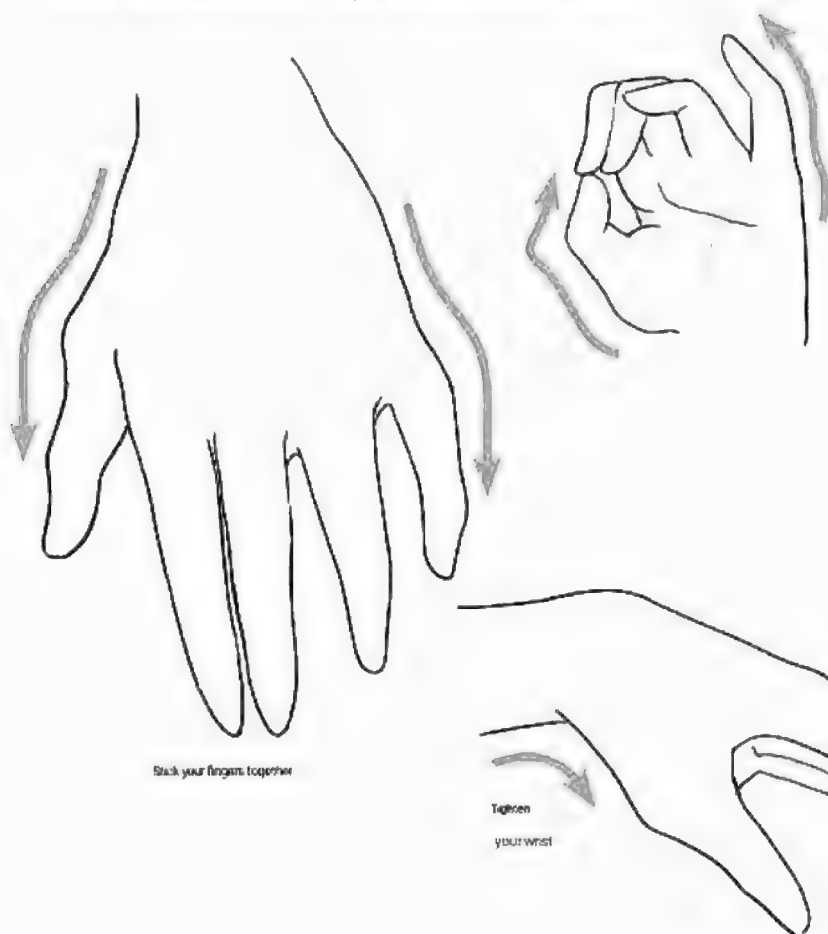

If you can catch the flow of the middle finger first, the flow of the thumb second, and the flow of the little finger third, you will be able to draw freely.

まめ (Mame)

If the index finger is longer than the ring finger, it is said to be a feminine hand.

<< Point ② Expressed with a supple and beautiful curve >>

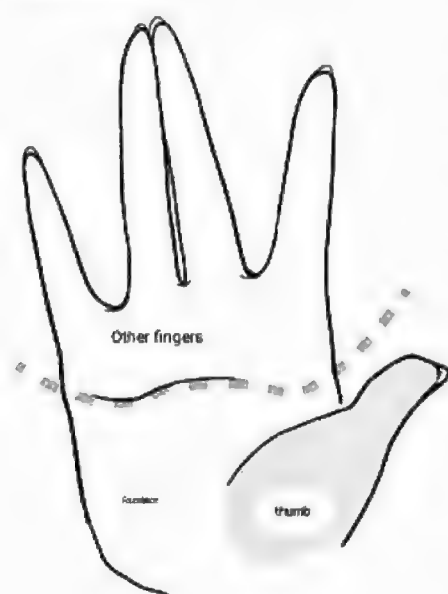

If you express your hands flexibly and with beautiful curves, you will be more girlish. Draw a line, paying attention to the following points.

- ◆ Make your fingers slender.
The wrists are also thin.
- ◆ Do not make the back of your hand too wide and large (make it slender). Make the bulge of the palm fluffy
- ◆ Stick two or three fingers together To.
- ◆ Gives a soft impression with curves.

* Thinking by dividing the hand into three parts

You can organize the complexity of the structure by thinking and drawing the hand by dividing it into three parts, "thumbs and other finger bases".

《Palm side》

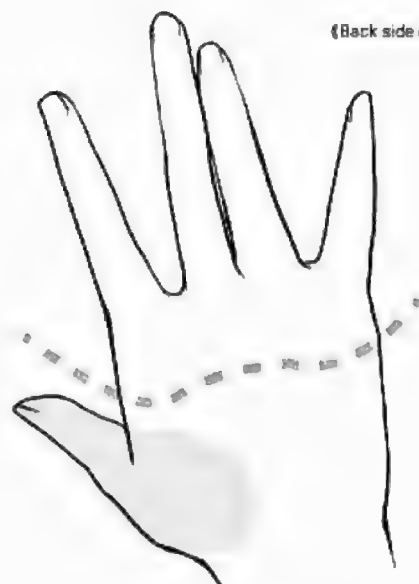

Roughly draw the pose of the hand you want to draw, draw the thumb and other fingers, and then draw the base to connect them.

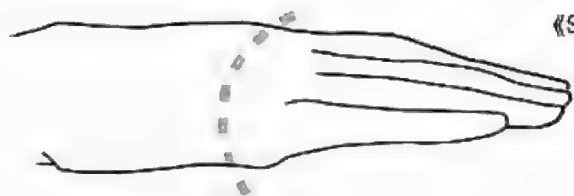

"Fingers"

《Back side of hand》

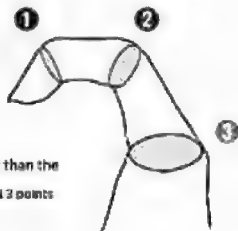

The streaks and protrusions on the base of the fingers on the back of the hand are not too descriptive and cute.

《Side / Outside》

《Side / Inside》

Fingers other than the thumb * Band at 3 points

Fingers at the base and others

It bends at two joints.

Only the thumb is special, so be careful!

❖ Facial expressions of cute hands

By incorporating the following points and devising the facial expressions of your hands, you will get a girlish hand.

- ◆ Relax. A finger that is not fully grasped is better than a tight grip.
- ◆ When you spread your hands, bend your fingers.
- ◆ Disperse your fingers (especially the little finger) (Move separately).
- ◆ Return your wrist.

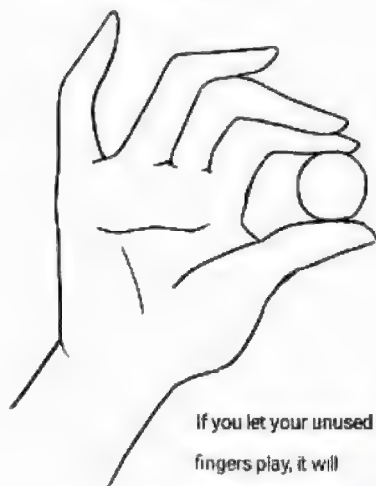

《Join hands》

《Make your hands moody》

《Pinky finger up》

If you let your unused fingers play, it will be a cute gesture

《Pinch things》

Note that a space is created in your hands.

Stand up

《Grip lightly》

Raise your finger a little.

《Shrink your mouth with your fingers》

《Pinch the cheeks》

As shown in the figure above, by hiding your hands halfway in the sweater, you can make it look smaller and create a cute look.

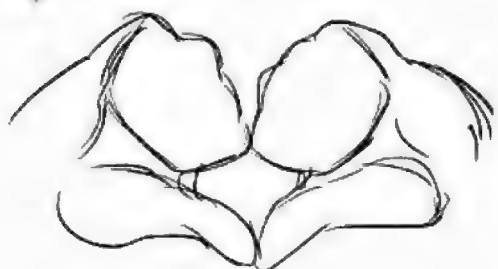

If you prioritize cuteness, you don't have to worry about realism. The expression of the unclear hand is intentionally put on the left hand to create a brilliant cuteness.

◆ Make a heart mark by hand

《Fist Heart》

01

Draw in 3 parts

Divide your hand into three parts (thumb and other fingers / base) and draw Atari. First of all, it is OK if you can take a rough shape.

02

Insert the atari of four fingers

Insert the Atari of four fingers other than the thumb. Even here, it is important to take the shape first, so first make a rough line.

03

Shape your hands

Keeping in mind the lines and facial expressions of feminine hands, we will shape them flexibly. The key points are to make a difference in the degree of bending of the fingers, to make the four-finger line smooth and uneven, and to emphasize the curve of the thumb.

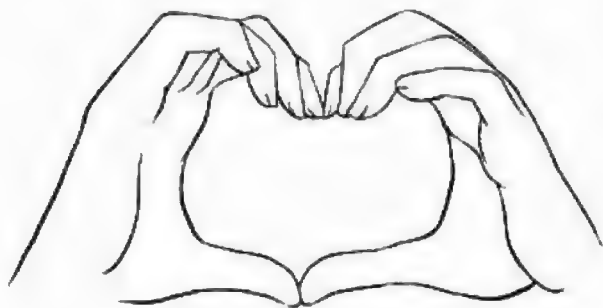

Cute Point

In the example illustration, the index finger is slightly bent. This is also a point of feminine hands.

《Heart with thumb and index finger》

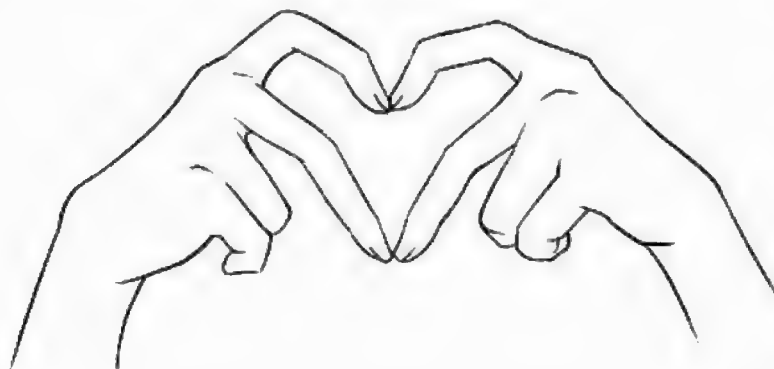

In this pose, it is recommended that you take the hearts of your thumb and forefinger with a chicken and then add more fingers or draw a base.

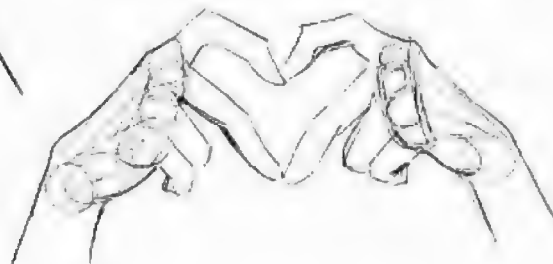

It is also good to spread the middle finger, ring

finger and the ring

《Heart with index and middle fingers》

The point is to remember to draw the webbing between the index and middle fingers. For this pose, draw the index and middle fingers, and then insert the atari at the base of the four fingers.

"Finger heart"

Take the Atari in a fist-holding pose and stretch it so that your thumb and index finger cross. Be careful not to hit the ventral side of your thumb and index finger properly

Cute Returning your wrist with a quick

point is a

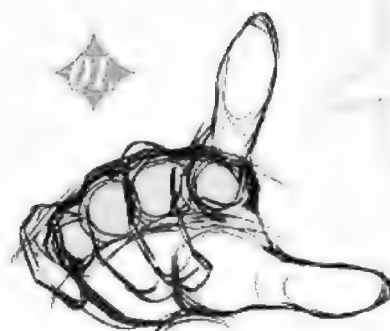

more cute gesture.

❖ Various hand poses

《Pointing》

The base of the hand is arch-shaped. Draw the base based on the thumb and index finger, and then draw the other fingers.

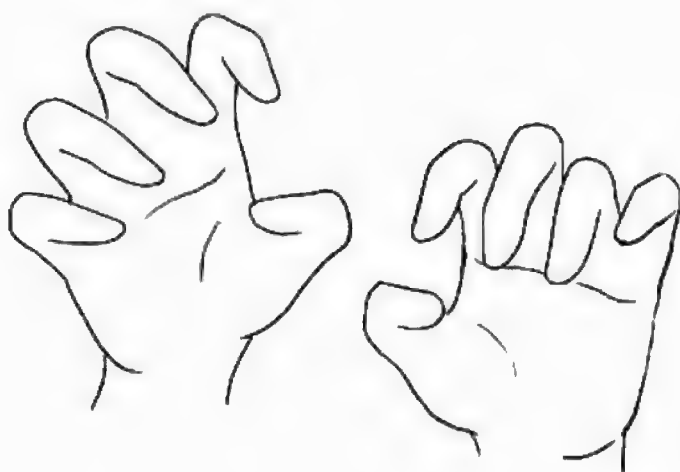

Cute The little finger doesn't have that much Point force, so loosely moistening it will give it a better shape.

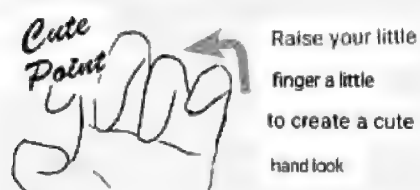

The base of the hand can be rolled or unfolded.

《Gaoh pose》

It is a pose where the bending of the fingers is important. Since it is bent halfway, draw your finger while thinking about which joint and how much to bend.

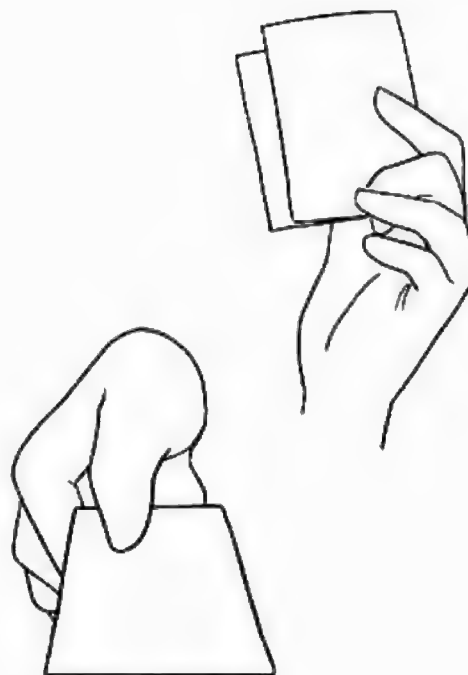

"Join hands"

First, draw the hand on the back side like Gaobozi, and then insert the fingers of the hand on the front side into it to make it easier to draw. The point is that there is a slight gap on the wrist side of the palm.

《Holding a card + Presenting》

Light things like cards are basically thumb + index finger (+ middle finger). Since the ring finger and little finger are almost always raised, try to express with less force and move the finger separately.

(ulnar styloid process) to make it "more cute"!

The protrusion near the wrist on the little finger side is called the ulnar styloid process.

At the boundary between the arm and the hand, drawing this protrusion gives a delicate impression to the wrist and makes the hand feminine and attractive.

This bulge is barely visible on a straight angle from the palm side. You can see it well by setting it to the back of your hand or at an angle that is even slightly diagonal.

《Flying hair back》

The ulnar styloid process is also the boundary between the hand and the arm. This is an important point when drawing gestures centered on the arms and hands.

Chapter

2

Bring out
the cuteness of girls

Facial expressions / gestures

Expressions of facial expressions and gestures
are indispensable for making girls look
more cute. In this chapter, we will focus on
the points that devise them.

More attractive facial expressions and gestures

In order to draw a girl cutely as a picture, it is not enough to just draw the "element" with the correct structure.

We take into account the facial expressions and gestures that have been produced, and create and draw the situation.

The example is an

illustration of a girl who gets up in the morning and is surprised to see her smartphone. The points are the expression and the line from the thigh to the toes

◆ Example ④ Making

— Draw a simplified diagram from a monopod / foot

01 Draw a simplified diagram from the legs / feet

Set the angle you want to draw, and draw the legs, sneakers, and knees that come to the front side with a simplified diagram.

02 Waist - thigh - connect with upper body

After drawing the position of the waist, design the thighs so that they are connected to the waist, and the upper body from the position of the waist. The trick is to connect more and more parts starting from the waist.

03 From a simplified diagram to a three-dimensional figure

Based on the simplified diagram, we will add a three-dimensional effect.

Since the position of the waist is important (because it was the starting point for connecting the legs and upper body), draw it without erasing it.

04 Meat + costume drawing

Meat and dress. This time, the legs and legs are the main parts, so I will draw with particular attention to the soft roundness of the calves and thighs.

05 Pencil case - coloring / finishing

The figure on the right shows how to insert the pen from the draft.

Adjusted / corrected the angle of the right foot and the angle of the right hand holding the smartphone. In order to make the girl more cute, it is important to keep trying and erasing the details of the pose.

06 When fleshing

Extend your left foot slightly and your ankle slightly to the angle.

This is because the curved lines from the ankles look more feminine

The basics of facial expressions that fascinate you with facial expressions are cute!

The important elements that make up a girl's cuteness are "bright and high tension" and "changing facial expressions". We will look at how to direct by making full use of cartoon-like deformed expressions.

❖ Expression of joy

By rounding your eyes and making the highlights sparkle, you can express the feelings of joy and expectation in a cute way. The key to getting stronger emotions is to bounce your hair and shoulders.

"smile"

Lowering the corners of the eyes and eyebrows will give you a soft smile with a reassuring atmosphere.

When drawing a smile, it is recommended because you can draw a better facial expression by thinking

"I want you to be happy" for that character!

Cute Point

《Expand the range of facial expressions by closing your eyes》

If you can freely describe how your eyes are closed, you will naturally have a wider range of facial expressions. Also, normally only the upper eyelid goes down so as to cover the eyes, but if you smile, the upper eyelid goes down + the lower eyelid goes up, so be careful about the position of your eyes!

❖ Facial expression of anger

I drew it so that I could glare at it with my eyes. It is a charming expression that can express the shortness and cuteness of a girl character while expressing anger.

The point is to draw the eyebrows as close as possible to the inner corner of the eyebrows and draw a diagonal line to draw the raised eyebrows.

❖ Facial expression of sadness

Drawing the lashes downward creates a fragile expression with a sad expression. If you draw a glitter in the lower part of your eyes that seems to have accumulated water before it becomes tears, it will give you an expression that will arouse your asylum.

《Crying》

The cute point is that the eyebrows are close to the figure of eight, the eyes are moistened to the maximum, and the line at the mouth is drawn in a wavy shape.

Draw glitter at the bottom of your eyes.

The character of the character is easy to get out of the way to wipe the tears, so it is a good idea to explore and draw how the girl character you want to draw will be wiped.

❖ Surprised expression

'Surprise' is an emotional expression that unknowingly comes out. If you bend your finger halfway, you will feel a sense of chatter and you will be able to create the 'prettiness you want to protect'.

Make the eyes (black part in the center) smaller and increase the proportion of white eyes than usual to express wide open eyes.

◆ Various other facial expressions

《Shy》

The embarrassed eyebrows and the tense and powerful mouth also express 'embarrassment', but the gesture of sticking to the index finger is more cute.

Slightly superorder. In that case, it looks cute if you draw it with a slight eye.

"fear"

The points are the eyes that open with fear, the lower eyelids that pull, and the gesture of touching the mouth that opens involuntarily.

"Inadvertently playful expression"

The tongue is peeked out, and the wink with a smile expresses the playfulness. It's also a cute gesture to put your fist on your forehead.

The point is to peek at the tongue a little! If the tongue is too big, it will give a sloppy impression.

《Naughty look》

"In trouble"

Even with a mischievous smile, giving a happy and gentle impression to your eyes will make you look cute. I added highlights to my eyes and widened the space between my eyes and eyebrows.

The space between the eyes and eyebrows is narrowed a little to create a messy feeling.

The embarrassed face looked up a little and drew his eyes round to give the impression he was thinking.

Fascinate with facial expressions ② Tips for increasing variations in emotional expression

For example, the same "pleasant" emotion can be expressed in different ways. If you can draw a girl with rich emotional expression, you will be able to give your girl character a personality. Increase the variation of emotional expression and draw a more attractive girl.

❖ Tips Setting the size of emotions

The first tip is to set how big the emotions you want to express.

Here, we will look at expressions that please us as an example.

The figure on the far left innocently raises his arms and expresses joy. The point is that his hair and breasts move with his arms and his mouth is wide open.

The figure in the center holds the fist tight and spreads the hair a little. In the figure on the far right, hold your fist lightly and raise the corner of your mouth a little to express a restraining joy.

The figure on the far left

It is wide open until you can see it clearly

The greater the emotion, the greater the gap with the normal face. Along with that, the gesture also changes to something that moves the body greatly. On the other hand, if the emotions are small, it can be described well by incorporating "suppressing emotions" expressions such as reducing the movement or changing only the eyes and mouth.

❖ Tip (2) Think about the plus and minus of emotions

The second is to consider whether the emotion you want to express is positive or negative.

For example, if you want to draw a girl character crying, the expression will be different depending on whether it is happy and crying (plus) or sad and crying (minus).

If you are happy and crying, your eyes and mouth will make you laugh, even if you are frowning. Lower the corners of the eyes for a soft look.

As your emotions become negative, your mouth will be distorted and your eyes will be turned down to make it bleed. You can express a feeling of despair by putting a line of shadow on your face.

❖ Tip ③ Mix multiple emotions

The final tip is to mix multiple emotions to complicate them. There is not always one emotion that a person has at one time.

《Angry + Sadness》

| By raising the bottom of the eyebrows a little while lowering the height, you can feel anger even in sadness.

《Surprise+Embarrassment》

His eyes were rounded and his eyes were represented by dots, and he was surprised.

By unintentionally putting both hands in front of the chest, the prettiness of 'I don't know what to do' comes out.

❖ Let's express our desires

As an emotional expression, it is also good to express the human desire that rises in the heart! In the example, sleep desire, appetite, love I tried to express my feelings.

"sleepy"

The points are the tears that yawn, the closed eyes, and the hands that try to hide the mouth.

"I love You"

I'm spreading love with a throwing kiss. A cute expression with small sharp lips and smiling eyes.

《Stomach peco peco》

A diamond with sparkling eyes. A slight drool was hung on the mouth, and the emotions that I wanted to eat were comically drawn.

More cute gestures Hair-related gestures

The gesture of holding hands on the hair is a classic girl's gesture. We will add a production by capturing the moment of the gesture of 'carefully' or 'slowly' or 'noisy'.

◆ Hair

By adding facial expressions to the hands that stroke the hair and the hands that hold it together, the cuteness of the gesture will be improved. Draw a finger that you can't force (especially the little finger).

If you put a hair tie in your mouth, it will give you a more girlish gesture.

You can also draw from an angle where you can see the nape and hairline.

❖ Untie hair

Pay attention to the looseness of the middle to small fingers of the hand that slides the hair tie. The spread of the hair that is about to melt is also a point.

◆ Put your hair on your ears

The gesture of putting your hair on your ears is a cute gesture of the royal road. In order to make it more cute and attractive, the facial expressions of the hands, the ears that appear, and the slack and hair growth in the vicinity are important.

'From before'

'From the side'

The movement of the loose fingers.
It is a point.

I'm thrilled with
the hair that I
can see a little!

Embossed ulna

* The styloid
process * makes the
arm more attractive.

《Cross arms》

By crossing the arms and putting hair on the ears on the opposite side of the hands, you can make the curvaceous beauty of the supple arms look subtle and make you feel more girlish.

Hair that isn't completely
on your ears will get
on your face.

◆ Raise your hair

Even if you tend
to be masculine,
you can turn your
wrists back.

The hand placed
on the chest
enhances
the childishness
of a woman

Grip it lightly and raise
your little finger.

◆ Play with hair

The gesture
of a girl
with long hair
playing with
her own
hair makes
her feel
innocent and
playful.

よりかわいいしぐさ 2 Hand-centered gesture

The cheeks
that are crushed
by the hands
are cute
points

The basics of gestures are "face" and "hands". Experiment
with different combinations to get a picture-perfect
gesture.

◆ Put on a cheek stick

《Take with one hand》

It's a gesture that suits a girl character who is entertaining
her free time. Don't forget to draw the soft bulge of the
palm on the little finger side.

《Take with both hands》

Unlike the previous page, this is an example of a girl holding a cheek stick with both hands. With both hands forward, you are in a forward leaning position, slightly emphasizing the bulge of your breasts.

Putting on a cheek stick with your fingers slightly bent is a more feminine gesture.

Drawing a straight line of hair that leaks from the gaps in your hands is a casual point.

❖ Thinking pose

It is a pose that puts your hand near the chin and bends your neck. It is NG to bend your neck too much. Bending the angle around 10 to 20 ° is a more cute and attractive point.

Cute Point

Slightly bend the ring finger to make it a girl's supple finger.

❖ wave hands

《Wave a small hand》

Bend your little finger without opening your hands in a leaning position to create a feeling of concealment.

《Wave your hand next to your face》

The example on the left is a girl who turns around and waves her hand next to her face. Not only the hands but also the face naturally attracts attention and gives a cute impression.

Let's draw with the middle finger and ring finger together to make it a feminine hand.

《Wave your hand big》

When raising your hand and shaking it greatly, draw with an image that bends in the direction opposite to the original elbow joint

Notice!

The point is to draw a curve toward the outside of the arm!

◆ Join hands overhead

Applying "Collecting hands" on page 71, the fingers are folded up to about half. In the same way, draw from the back hand. The upper arm and stomach, which can be seen flickering because the arms are raised, complement this pose

❖ Girl's salute-style pose, four

fingers on the forehead, as much as the thumb comes around the nose

Open your hands. It's different from a real salute where you shouldn't show your palm. Please refer to it as

a more cute drawing pose.

おでこ

near the forehead

The slightly curved fingers of the hand make this pose look more cute.

◆ Rabbit ear pose

Place your hands on the sides of your

face, not on your head. This will spread the fat around the bent elbows and

emphasize the softness of the arms.

Bend your wrist

◆ Hide your mouth with your hands

Increase your cuteness with shameful gestures! Tighten your armpits and turn your arms inward.

Cute Arms Hands, legs, points
By pointing your feet toward the center of your body, the image of your gesture becomes more girlish.

If you hide it with both hands, you can create a breathtaking expression

The neck angle of this example is 20°

Curve inward

◆ Put your finger on your mouth

If you point your fingertips at the center of your lips, they will become rough, so the point is to point them in a slightly offset direction. Other fingers Bend it lightly and let it come apart.

It is also o to have two fingers. You can emphasize the luster of your lips by drawing so that you can see the center of your lips.

❖ Put your index finger on your mouth (secret pose)

This is a popular pose that is often drawn. The point is to bend your thumb and index finger, and to bend your other fingers lightly. Showing the bulge of the palm on the little finger side gives an impression of the softness of the hand.

Cute Point

It is also good to make a pad with two fingers and make it a girl character with a mischievous expression!

Pat is small

The bulge of the palm

* Pose with your hand on your mouth

Open your hand and show your mouth through the gap between your fingers, or turn your wrist back and put your fist on your chin.

Let's make it elegant and girlish.

《Hold your fist》

If you put too much pressure on your fist, you will end up in a perfect flirting pose, so draw with your fingers lightly raised.

《Open your hands》

The key to loosely grasping your fist is to leave a gap between your fingers.

Cuter gestures Seasonal gestures

When choosing a theme for a picture related to a character, the situation and scene of the character, as well as the season, are also important factors.

❖ Wipe sweat with a towel (cheek)

I narrowed the eyes on the side where the towel was applied comfortably. For the hand holding the towel, gently bend your fingers to grab it. The point is to stick only the ring finger and the small finger.

❖ Aogu the chest

The invisible chest and the décolletage line that you can see from the stretched clothes will make you feel excited and promote the charm of the girl

◆ Take off your jacket

The point is the area around the upper arm and shoulders that are halfway exposed after taking off the jacket.

Cute Point

The hand that is pressed a little looks healthy and cute.

◆ Breathe in your hands

Trying to warm the bitten fingertips
This is an example of breathing.

By putting your fingertips together to create a space without putting the palms of your hands close to your mouth you can create a soft and gentle image

gestures and movements more cute

The gestures I have introduced so far are just techniques for drawing "more cute". Try to draw a more cute picture with the hint of "awareness" of the structure and "awareness" of the gesture. In the next chapter, we will present more "awareness".

Example ⑤ is an illustration of a girl in uniform wearing a cardigan sitting in a gym.

◆ Example ⑤ Making — Draw from the face

01. Draw a face from the outline

The contour makes
the roundness of the
cheeks soft and
delicious, and plump.

Let me draw. The
eyes are an important part of drawing a
person, so we will focus on making them
as attractive as possible.

02. Draw hair

Hair
Decide the
position of the
streak and
draw it so that
it flows from
there.

03. Insert the whole body line

After drawing the hair, draw the whole body. It is important
to proceed with pen-insertion so as to correct the mistake
in the draft that looks faint in the above figure

04. Coloring / finishing work

Color it considering the density of gray and the overall
balance. After making corrections and adding highlights,
it is complete (see the figure on the previous page).

If you proceed to near completion, leave it for about a day
Then you can see the picture objectively and see
the missing part. Recommended when you want to
improve the degree of perfection.

Make your gestures and movements more cute ① Sit down

When drawing a girl, of course, there is a more cute effect in the standing behavior.

◆ Gymnastics sitting

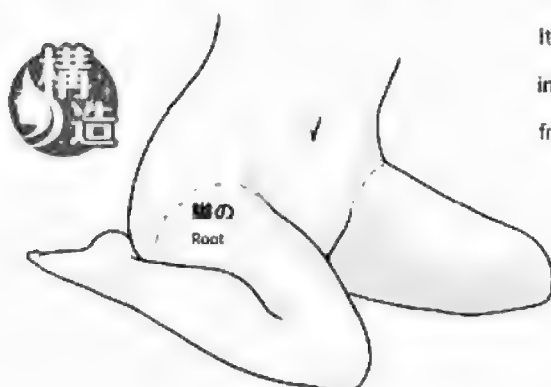

Gymnastics sitting, where you hold and stick your knees, is a way of sitting that is thrilled by the softness of the roundness from the thighs to the buttocks and the crotch that you can see through the gaps in the legs

You can see the crotch from the triangular gap created by bending the legs

Cute When drawing a pose for a girl to sit on, be aware of your inner thighs no matter how you sit. That alone makes me much more like a girl's child

◆ Girl sitting (wari-za)

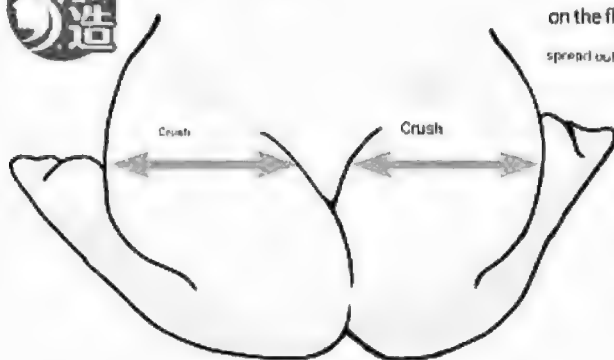

It is a difficult position for men, so it has a strong feminine impression. Draw the hips first, and then continue to draw from the base of the buttocks and legs to the thighs ... to the toes.

If you insert the position of the base of the leg atan, it will be easier to shape.

"front"

The thighs are crushed
on the floor and
spread out sideways

If you want to draw a girl
sitting on the back, create an
S-shaped line (see page 56) for
a more feminine and cute
sitting style.

The unprotected
soles tickle the
asylum

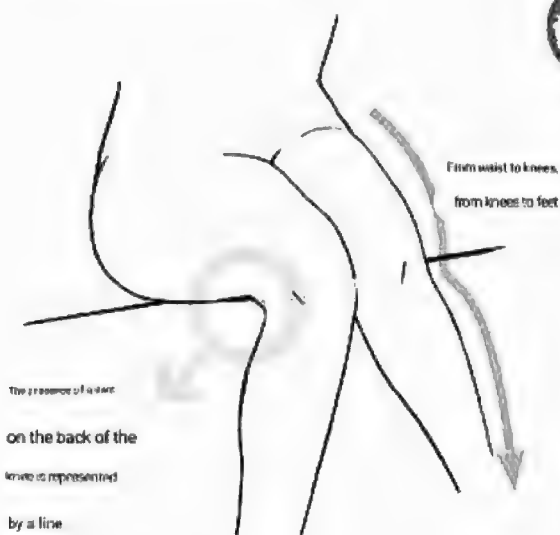

S-shaped line

Draw a curved
line of the
calf that is
pushed
against the thigh

◆ Sit on a chair, etc.

Draw your hips first, then position
your knees and draw a thigh line
to connect from your hips.

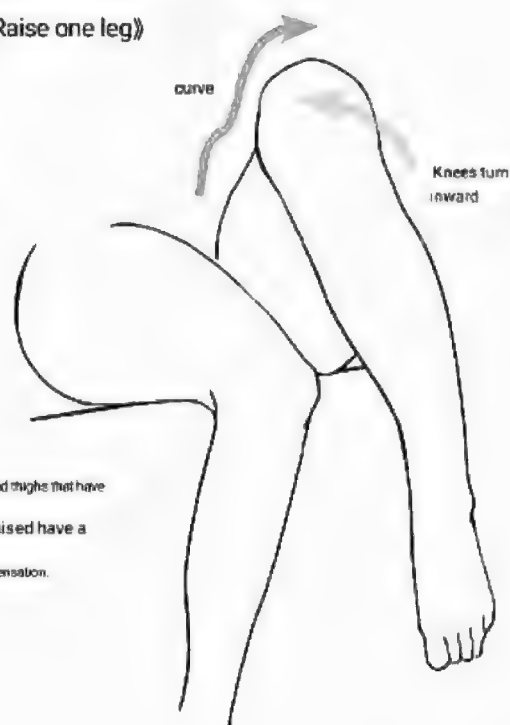

The presence of a seat
on the back of the
knee is represented
by a line

Firm waist to knees,
from knees to feet

《Raise one leg》

curve

Knees turn
inward

The curved thighs that have
been raised have a
tingling sensation.

The gesture of putting your hands in between while pulling your knees naturally pulls your breasts. It is a girlish posture with the shoulders inside and the arms and hands toward the center of the body.

《From an angle》

From between the knees, the hands that peek a little are becoming more cute.

'From before'

Shoulder goes inward

If you draw the arm first, the area around the crotch will be hidden and it will be difficult to draw, so draw the trunk and legs before drawing the arm.

Cute Point

If you add a facial expression to the hand you put between your knees it will be even more cute!

Good to
cross your
legs!

❖ Sit with your legs crossed

The cross-legged pose gives an elegant impression.
It features a soft curvaceous beauty on the thighs
and a smooth line from below the knees to the instep.

'From the side'

The cute point is the
soft legs that collide with
each other and crush.

01 Atari at the base of the thigh Put in

Draw the waist and position the base of the thigh
Put the Atari in a circle.

02 Put the knee atari in the middle

Insert two knees vertically
between both thighs.

Atari on both knees
The vertical width of a thigh
Wider than the vertical
width of the thigh

03 Connect the line from the thigh to the knee

Connect the lines from the thighs to
the knees with a curved line while imagining
the softly crushed fat.

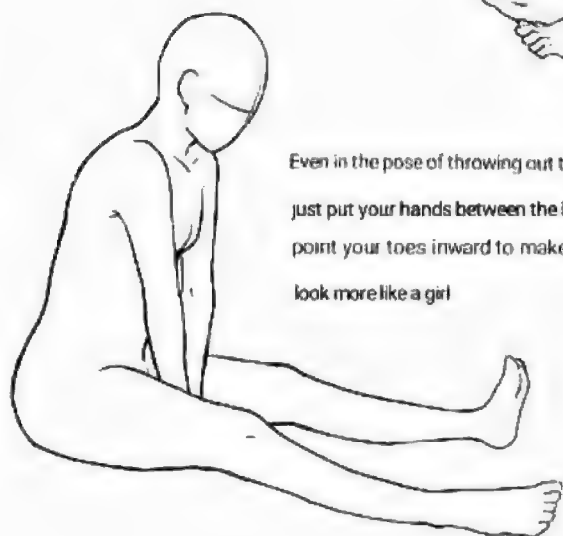

04 Draw ahead from your knees

❖ Sit with your legs stretched out

Instead of just throwing out the legs, the point is to bend one leg to create a curved line.

The supple lines of the hands along the legs emphasize the lines of the legs.

Even in the pose of throwing out the legs, just put your hands between the legs and point your toes inward to make the girl look more like a girl

Hands and feet facing outward

◆ Float your legs while sitting

It is actually difficult to take this pose (unique to the illustration) Bose) However, in the example, instead of floating the right foot, the weight is put on the left foot and the left arm to balance.

Cute Don't forget to draw the Point on your inner thigh while floating your legs.

Show your thighs

Make your gestures and movements more cute ② Sleep

Depending on the angle, the berth will be extremely attached, and it is a difficult pose just to take the shape.

On top of that, let's explore the points that can be produced more cutely.

❖ For the back

It is a girl of example ①. The best way to draw a sleeping pose is to match the angle between your body and the ground. In this example, the head is placed on a pillow, so the angle between the head and body is slightly changed.

The long hair that spreads makes your sleeping appearance more girlish.

Cute Point

I dare to hide my crotch with my right foot. The reason for opening the crotch to the fullest is that there is no item and the femininity is halved.

The knees are moved inward (inner thigh), and the tip of the left foot is turned inward.

《Angle from the head》

The procedure is the same as drawing with the Fukan angle, but the point is to adjust the body to the set ground angle.

The space of the constriction that does not touch the ground emphasizes the feminine curvaceous beauty

Like Fukan, the neck is hidden behind the head and almost invisible.

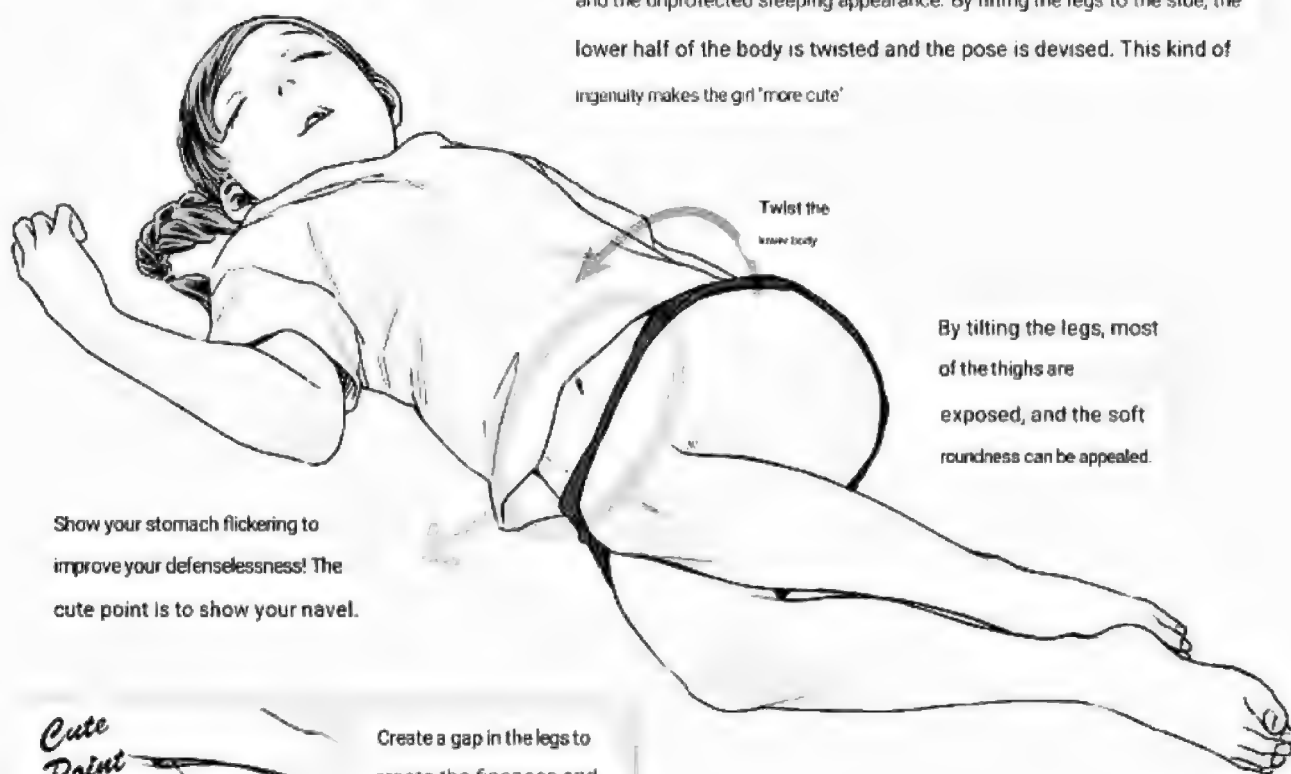

The head that is tilted back is not touching the ground, so the body can be drawn in the same angle.

You can draw beautiful lines by adjusting the long hair that spreads to the angle of the ground and spreading it in a wavy manner.

《Angle from the foot + twist the leg sideways》

In the example below, the secret of cuteness is the weakness of the limbs and the unprotected sleeping appearance. By tilting the legs to the side, the lower half of the body is twisted and the pose is devised. This kind of ingenuity makes the girl 'more cute'.

By tilting the legs, most of the thighs are exposed, and the soft roundness can be appealed.

Show your stomach flickering to improve your defenselessness! The cute point is to show your navel.

Cute Point

Create a gap in the legs to create the fineness and curvaceousness of the legs.

◆ Prone

A girl who lays on her stomach and flutters her legs feels her innocence and childhood.

The line from the sneaker to the toes is drawn with a gentle curve to express a girlish leg.

Gentle curve

The point is to draw the softness of the crushed upper arm.

If you move your left elbow to the right, your left shoulder will also go inside

Midline and body side
Capture the surface
and draw the connection
from the upper body
to the lower body.

Side of the body

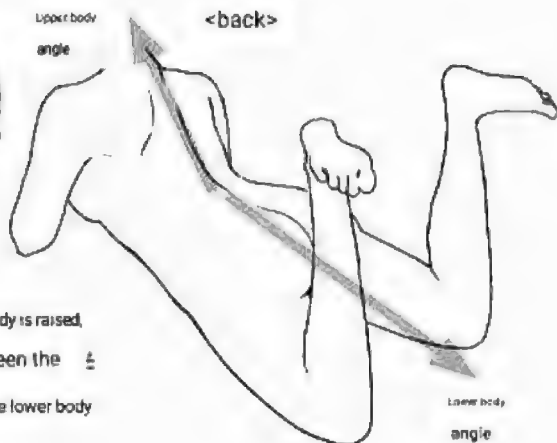

Cute Point

The softness of the crushed calf and the gap between the bony parts behind the knees are attractive

《Fukan-like angle》 The point is to hold a pillow and put a chin on it. The depressing head, which looks melancholy, also promotes prettiness that makes you want to protect it.

Since the upper body is raised, the angle between the upper body and the lower body is different.

In the case of the back, the constriction of the back and the buttocks are conspicuous. Decide what you want to show and draw with the most suitable angle.

《From the front + Aori Angle》

I put on my cheeks and spread one hand, and dare to let it play away from my chin. Prone + elbows are moved inward to emphasize the swelling of the breasts.

A line of Achilles tendon is added to express the delicate feeling of the ankle.

For a looser impression than the usual cheek cane pose.

A glimpse of a part of the thigh makes you feel shocked.

❖ Sideways

When drawing a sideways sleeping figure, devising the position of the arm is the key to making it "more cute". The upper arm should face the ground.

If you lie down without any ingenuity, you will not be able to express cuteness.

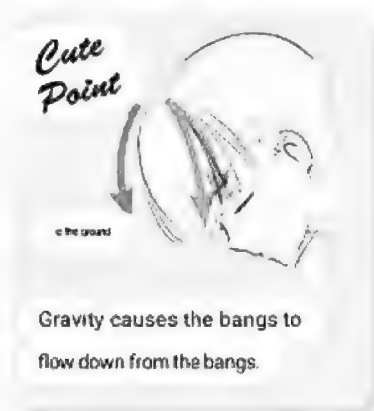

Gravity lowers the breast and causes wrinkles.

Bend your lower arm and place your hand near your face for a cute pose.

《Angle from above》

This is an example of a sideways sleeping figure seen from directly above. The shrunken and curled back is clearly visible, arousing the desire for asylum.

The point is to shift the legs rather than aligning them exactly

Make gestures and movements more cute ③ Crouch

The crouching pose is characterized by folding the body and making it look smaller than normal. The small figure makes the girl look cute.

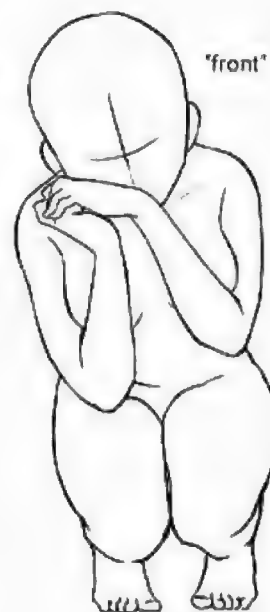

Put your elbows on your lap and put your cheeks on your lap to make it even more cute!

There are various ways to crouch, such as kneeling on one knee or shifting one leg to the back, but the type that leans forward and balances with only both legs looks the most feminine and cute.

It is also • to bring your hand to one chest.

Cute The point is to align your knees. Crab crotch is NG because it loses femininity.

"back"

Whether you put the soles of your feet all the way to the ground or just your toes to balance them, you can create a variation in the crouching pose. If you support your body with just your toes, you will be in a fairly unstable position.

If you put only your toes on the ground, the distance between your hips and heels will be much closer.

Turn around to make gestures and movements more cute

By twisting the body, various parts are mixed at different angles from the standard. Add an even more cute element to the unexpectedness of change.

<< Turn around only the face >>

It's a simple gesture, but the girl who turns around and looks at me is very attractive.

In the figure on the left, the point is that the hair is shed to the back to show the back, and the shoulders are shrugged to hide the chin.

《Turn around the upper body》

The movement to turn around is mainly due to the twist of the neck and hips. In the example on the left, I twist my hips and turn around.

A twist on the hips emphasizes the breasts and buttocks.

When drawing a figure that turns around the waist as a fulcrum, it is easier to draw by drawing the median line as an auxiliary line at Atan.

《Turn around with your whole body》

A girl who is stepping back on her left foot and trying to turn around.

Cute Point

Kage

The softness of the soles of the feet is expressed with a shadow

The fluttering hair that turns around makes the girl's child more cute.

The invisible chillerism that seems to be visible makes people surprised.

Make gestures and movements more cute ⑤ Lean

It's a pose that has some other weight
on its own. The defenseless pose
creates cuteness.

*Cute
Point*

Put your fingers
on your legs

Place your finger on the bent leg
to show the curved lines of your
hands and legs

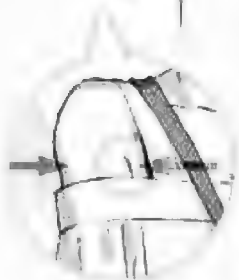

<< Leaning on the wall >>

I put my back on the
wall and bent one
leg lightly to make
it a cute pose.

<< Leaning on the shoulder >>

The point of the pose that
leans on the shoulder is
how the shoulders collide
with each other

Pushed by the weight leaning
against the opponent's shoulders, the
fat in the upper arm is crushed

<< Leaning on one side >>

The pressed breast is emphasized
by putting the upper
body on one side of the
left and right sides.

Chapter

3

Bring out
the cuteness of girls

Items / Costumes

Instead of just adding item costumes,
we interweave the gestures and
points that accompany them to make
the girl look more cute.

Directing with items and costumes

Women are equipped with the art of directing themselves with ornaments and clothes. Let's see how it becomes attractive to grasp that gesture as a picture.

Long hair fluttering

in the wind

Rias earrings + gestures

Uchi

Thigh softness (thigh

and calf fat)

Achilles tendon

The example is an

illustration of a girl in

underwear wearing earrings.

The facial expressions of the

hands and the curves of

the waist are the points.

◆ Example ⑥ Make fine adjustments with the making silhouette

01.

Draw a pose atari

You can draw as quickly as possible by imagining what kind of girl you want to draw before drawing.

02.

Draw a rough looking at the overall balance

Draw a rough while thinking about a little perspective. This time I'm drawing a rough sketch.

03.

See how the composition fits in the silhouette

Make the person a silhouette, look at the composition, and consider fine-tuning. It is easier to adjust the angle and perspective by roughly inserting the berth line that serves as a guide.

Berth line

04.

Silhouette correction

Emphasizes the curve of the waist and makes the legs more inward

Fixed.

Make a curve of the waist.

A woman with her legs at her thighs

The sexuality stands out

"Cute" woman

To the child!

◆ Earrings Necklace Bracelets

《Pierced earrings》

The pierced earrings and earrings sway and shine, allowing you to draw attention to your ears. In addition, the gesture of wearing pierced earrings can express the cuteness of a girl without any

decorative

▲ The little finger, which is loosely grasped by the thumb and index finger, is the cute point of this gesture.

"necklace"

The necklace can appeal the beauty of the collarbone (décolletage) and chest.

The nape + 7th cervical vertebra that can be seen through the hair when wearing the necklace is also a point.

"bracelet"

The bracelet makes the fineness of the wrist stand out. Hair ties can have the same effect.

◆ Hair ornaments (hair accessories)

《Hairpins》

The point is to attach the hairpin to only one side. As shown in the figure above, if you attach it as an accessory, it will look more cute

《Kachusha》

Kachusha gives a girly impression.

If the width is wide, it will have a retro girly atmosphere

《Ribbon》

Ribbons can be attached not only to hair but also to items such as costumes and bags

◆ Glasses / Sunglasses

It gives an impression that is a bit different from the real face. It will give you a serious and hard impression, so it is a good idea to devise a hairstyle.

《Glasses》

"sunglasses"

The facial expressions of the hands wearing glasses, the eyes on the eyes, and the appearance of wearing sunglasses on the head are the cute points of the example

◆ hat

The squeaky
gesture of the
brim gives it
a femininity.

《Straw hat》

The straw hat, which is perfect for the summer season, has a light and natural atmosphere that complements the simple cuteness of girls.

《Cap》

Even a cap with a lively and boyish image will look more cute with the expression of a hand with a brim as shown in the figure on the right.

*Scarf

The point is that the muffler looks like it's stuffy. The fluffy hair and the gesture of lowering the muffler around the mouth with your fingers make it even more cute.

Cute Point

The expression of the loosely bent fingers is supple and feminine.

Cute costume uniform of the royal road

◆ Sailor suit

A classic uniform that makes you feel nostalgia. Let's grasp the characteristics of sailor suits and devise ways to draw them more cutely.

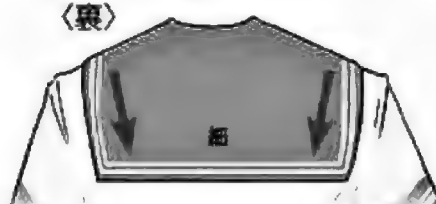

《Characteristic collar》

<table>

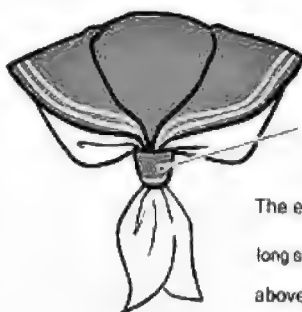

《裏》

The shape will differ depending on the area, but if you put 1 to 3 lines on the edge of the collar, you will get a sailor feeling and it will look more cute. Also, if the back collar is square, it is recommended to make it thinner as you go to the back.

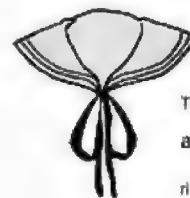

《Characteristic ② Scarf》

The scarf that flutters around the chest also makes the sailor suit look cute. There are types that can be fastened with a scarf, and types that can be fastened by tying a scarf.

Tie and fasten

The example of the long sleeve in the above figure is a type with a scarf clasp.

There is also a string ribbon type

Scarf closure

《Characteristic ③ The outerwear is open.》

The outerwear has a tubular cloth on the body. Suso is staying
There is no such thing, so it's easy to move
It will be a point.

Make Suso open
with your
arm

❖ blazer

Contrary to sailor suits, it is modern and gives a fresh impression.
It is also a big feature that various arrangements can be made.

《Characteristic jacket》

The shape of the collar, the number of buttons, the presence or absence
of pockets, the presence or absence of lines, etc. can give a
considerable range to the design. The impression will change depending on
how you wear the jacket, such as whether you press the button tightly
or remove it.

<Button / Close>

<Button open>

When you remove the Cute button
Point Shirt is scary
You can see the
vertical lines of wrinkles in
the box. When you fasten it,
the waist line looks refreshing.

<< Characteristic ② Blouse / Ribbon >> The shape and color of the collar of the blouse and the ribbon can also be given individuality.

[Basic collar shape]

[Rounding]

The ribbon has a rubber cord attached to it, and it is common to adjust and attach it yourself.

Diamond shaped tip

There is also a tie, but it has a cool impression rather than a girly one.

<< Feature ③ Abundant patterns >>

In the case of a blazer, the dressing pattern is abundant. Not only colors and designs, but also various arrangements such as putting on and taking off jackets, wearing cardigans, sweaters, vests, hoodies, and polo shirts are available. Find the cuteness that suits your girl character

▲ Example 6 is a cardigan + ribbon + shirt + pleated skirt.

▲ Example ② is a short-sleeved shirt + revolving + pleated skirt

The dress that wraps the cardigan around the waist is also good!

◆ Uniform + item

By combining items with uniforms, you can create the everyday feeling of a female child character.

"broom"

Having a straight line item, such as a broom, makes the curved lines of the girl's body stand out more and makes it look more attractive. The leaning pose promotes cuteness.

《School bag》

A school bag that enhances the character of a female student in uniform. Currently, nylon is the orthodox (see page 36 for an example of using a cute school bag (2)).

《Smartphone (smartphone)》

The figure of a girl holding a big smartphone with a small hand looks cute. If you are aware of the skeleton of your wrist, the hand holding the smartphone will become more supple.

You can also arrange it according to the girl's cara by pinching a hairpin or attaching a key chain.

Cute costume of the royal road ② Seasonal costume

◆ Summer costume

{Swimsuit}

There are two main types of swimwear: bikinis and dresses. The bikini is more exposed and can emphasize the skin and body parts of the girl. One piece hides the abdomen, so the body line is clear.

Cute Point

Since the string is tied behind the neck, the shoulder line looks beautiful

Notice!

Drawing loose hair makes a girl in a yukata more attractive

"yukata"

The elegant and cool yukata makes the girl look pretty. The nape that can be seen from the large open neck feels glossy.

◆ Winter costume

《Coat + Earmuffs》

When you put the earmuffs on the coat, the muffled material makes the girl's head look more cute and gives a warm winter look.

Notice

The fluffy coat, hair and skirt make the girl in the figure on the right more cute.

《Santa clothes》

The special feeling of Christmas will color the girls. The white and fluffy decoration is an important part of the sun evening clothes. Attach it to your skirt or jacket.

The hooded cloak tie looks cute on the skirt and thighs from under the hood.

Cute costume of the royal road ③ Maid waitress

❖ Maid clothes

The frilled apron and white brim
(decoration on the head) give a girly impression

The point is the absolute area created
between the skirt and socks.

*Cute
Point*

By paying attention to details such
as frills, the cuteness of the girl
will be further enhanced

absolute field.

The ribbon on the
back is the point

❖ Waitress (apron)

The girl's Epron figure with a ribbon tied tightly
on her back brings out a feeling of hard work
and a homely image

Cute Adding a hairpin to your
hair Point made your hair

look richer.

Cute costume of the royal road ④ Loose costume

◆ Room wear

You can see the cuteness of the laid-back element in the relaxing room clothes. Put on loose loose clothing or grate your hair to make it feel fluffy and unprotected.

Cute Point

A glimpse of the shoulder straps of the camisole worn under the jacket is a device that makes the girl more cute and attractive.

❖ His shirt

I'm wearing a fluffy shirt that's bigger than my body size, so the overall size is loose and there are extra sleeves and sleeves.

The point where the bare feet peek out from the shirt's shirt is exciting.

❖ Parker

The rugged silhouette of the hoodie has the effect of highlighting the lines of areas that are not covered by the hoodie (such as hands and legs).

A girl wearing a hood can be small and express the cuteness that she wants to protect.

The bulge when you put your hand in your pocket is also a cute point.

Cute costume of the royal road 6 Animal ears and tail

❖ Dog ears

When you attach the ears and tail of an animal, the cuteness of the baby girl is added to the cuteness of a small animal that makes you want to stroke it.

Cute The fluffy feeling of the fur is drawn by bouncing the Point line fluffy, making it a more fluffy and cute girl. Become

◆ Cat ears

If you put on a dress for a girl with fluffy cat ears and add a neat feeling, you can create a different expression from the cuteness and youth of animals.

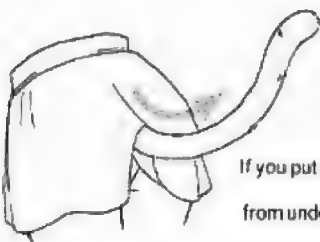

◆ Rabbit ears + tail

<< How to put out the tail >>

It looks natural when you put it out so that it penetrates your clothes

If you put it out from under the skirt, you can see the butt

For girls with rabbit ears, letting them play with the image of jumping facial expressions on their fingertips gives a more energetic and cute impression

コスチュームの「動き」 Bring out the cuteness of the original

◆ Sliding down

There are various ways of expressing things, such as loosening the shoulder straps, tilting the body, and the size of the straps that make them fall off ..., but you can create an unprotected and natural cuteness.

The gap between the body and the shoulder straps makes the girl feel more delicate.

❖ Turn over

By moving your body or being blown by the wind, a part of the costume is turned over, and you can see the part peculiar to the girl.

This chillerism is a 'better' point that involuntarily evokes excitement.

{Stomach chiller}

《Upper arm chiller》

Show off your soft upper arm from your sleeve.

Notice

The chance to see the navel is rare in everyday life, so let's show it in the picture.

《Leg chiller》

It was the moment when the skirt fluttered in the wind and the thighs glanced

◆ Moe sleeves (cover)

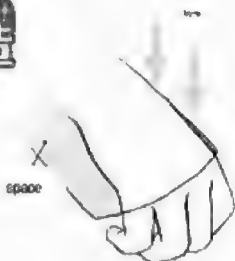

Moe sleeves have long sleeves and cover your hands so that only your fingertips come out.

This is

Cute Point

I'm gonna make you look like your fingertips stick out from your sleeves.

Gravity causes the upper part of the sleeve to stick to the skin, creating a space in the lower part.

The charm of basic costumes

◆ Skirts and pants

◀ 1 flared skirt ▶

The flared skirt is characterized by the spread of the skirt like a morning face, and the folds can be made to undulate, giving a feminine and fluffy impression.

Spread the line from the part to Suse

Connect the lines in a wavy shape

The gesture of holding down the fluffy skirt is girlish and cute.

《2 One Piece》

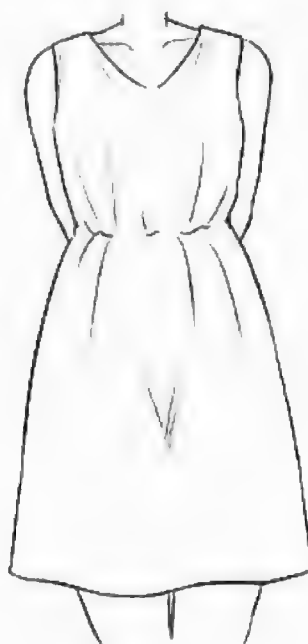

One piece is a neat image. Unlike a normal skirt, it is continuous from the upper body to the lower body, so the range of fluttering is wide.

The delicate feeling behind the knees that is exposed by pinching the one-piece suso is a sensation.

Legs peeked out of the sitting girl's dress. The feeling that you can see but cannot see is

It depends on the material and shape of the clothes, but it can be fluttered by the wind

《Pleated skirt》

Pleated skirts are the mainstream for uniform (see pages 113-116) skirts. It can be worn with both sailor clothes and blazer.

Catch the folds of the folds

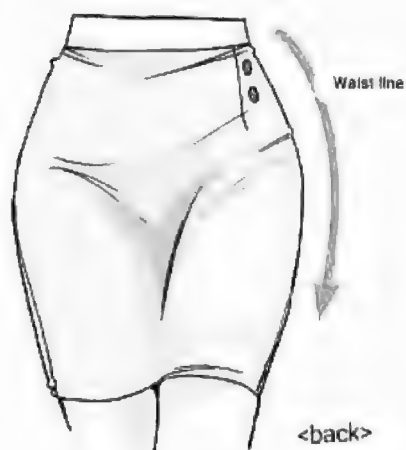

Thanks to the folds, a three-dimensional effect appears

《④ Tight skirt》

The silhouette around the waist is a perfect fit, giving it a stylish image.

<front>

<back>

If there is little movement, wrinkles will not enter much. If you move your legs a little, you will get wrinkles immediately.

《⑥ skinny pants》

Sticking to the whole leg

Depending on the style, the way of drawing

Line beauty appears in Moro.

<front>

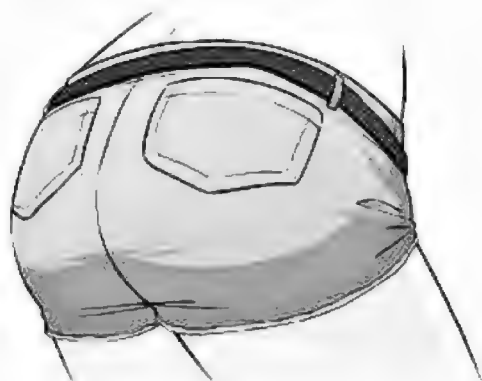

<back>

Wrinkles appear around the knees and ankles

《⑥ Shorts》

The tightness that sticks to the thighs is the difference from the tight skirt. Most of the legs look it will be ready to go.

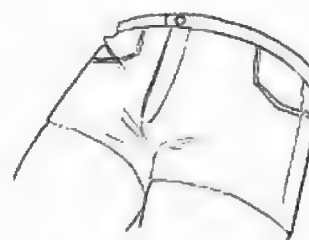

▲ Example ass

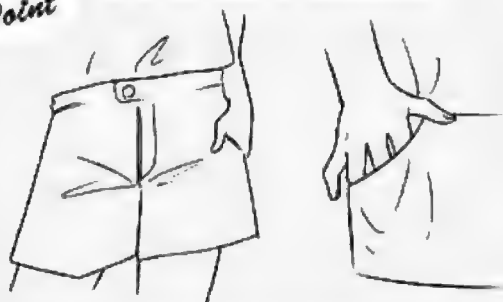

The lines on the legs and buttocks are emphasized

Crotch and side parts
The wrinkles on the surface give a feeling of tingling.

Cute Point

《Put your hand in your pocket》

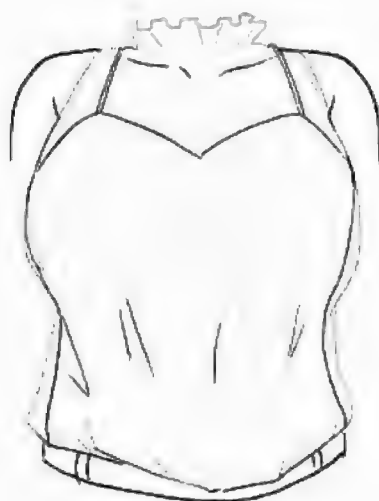

I touched on page 121 a little. It is also good to draw the swelling feeling of putting your hand in your pocket and the gesture of your finger protruding from your pocket as one point.

❖ Material that brings out the cuteness of girls

《1 Chiffon material》

It is a thin and soft material, and is characterized by a sense of sheerness. You can express fluffy lightness. It is mainly used for tops, skirts, and dresses.

Cloth gathers around the neck, waist, and sleeves.

Items and costumes that bring out the cuteness of girls

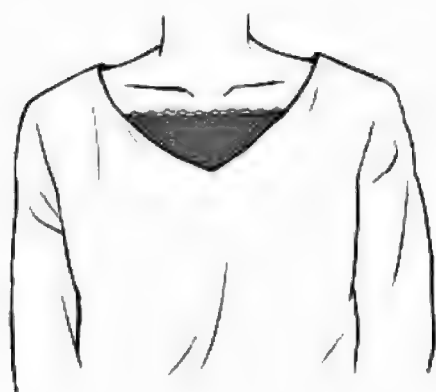

《2 Lace material》

It is a material that can produce a fancy girlishness. However, if you extrude the lace material over the entire surface, it may look old-fashioned or too rough, so keep it to the extent of a flickering.

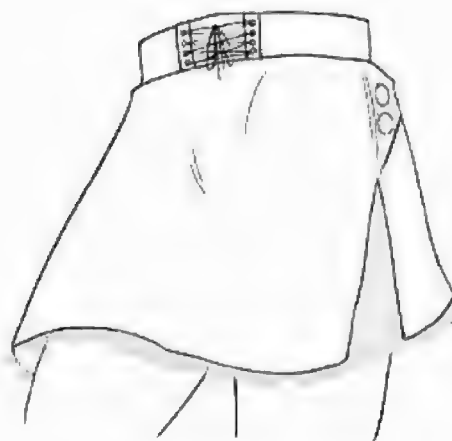

Lace material

The white prim worn by the maid on page 119 is also a lace material.

It is recommended to
add lace to the inner
to make it look flickering,
or to draw it only
on the skirt.

《Knit material》

It is a standard material in the cold season. Setting
it to a rugged silhouette has the effect of
making the neck, limbs, etc. look more delicate.

Good even if you

approximately 100%

Add more color to your cheeks
so that the Cute knit looks
warm and point

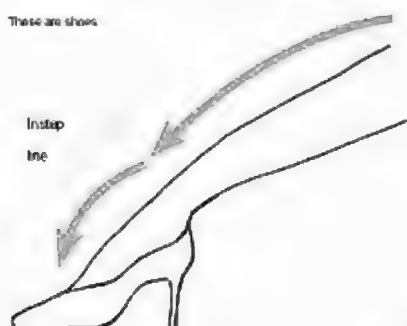

Dare to wear light innerwear and enjoy
the gap with the silhouette of the
knitted outerwear

◆ You can add cuteness to your shoes and socks.

《1 high heels》

High heels make
your legs look nice

These are shoes

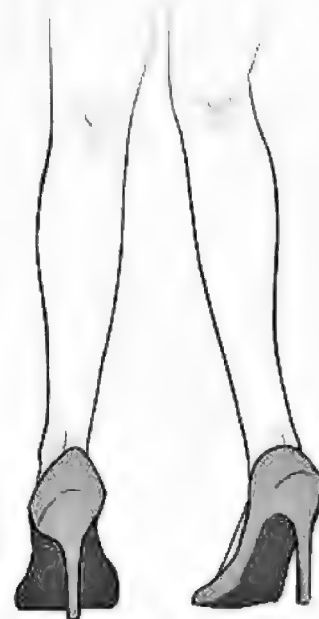

Some have
thick heels

A calf that
pulls
highly

<front>

The smoothness
of the curvaceous
legs stands out

<back>

The shape of the high heels
itself is curved, reminiscent
of the curvaceous beauty
of women.

《2 sandals》

Since the skin ratio of the feet is high,
you can fully appeal the delicate
parts of the feet. It is also a
feature that you can see the facial
expressions of your toes.

On the back, the heel
and Achilles tendon
lines are exposed

The ankle strap is
one point that
complements your ankle.
Not only for sandals,
but also for pumps
and heel shoes

《Shoes showing a part of the foot》

Show your
toes, open
Too

Back strap
showing
heels

Show the sides
of your feet.
Side open

Showing the bare skin of the feet in
some places makes the viewer surprised

<Long boots>

《3 boots》

The boots, which are useful for coordinating in the cold season, make the uncovered legs look soft and smooth because the boots themselves are rugged. The longer the length, the more the legs will be hidden, but the more valuable and grateful the exposed parts will be.

<Short boots>

The feature is that it covers up to the ankles.

Cute The legs are hidden near the knees, so I dare to show the thighs instead.

《Boot length》

短

Short (on the ankle)

Medium (mid-sneak)

Long (above the knee)

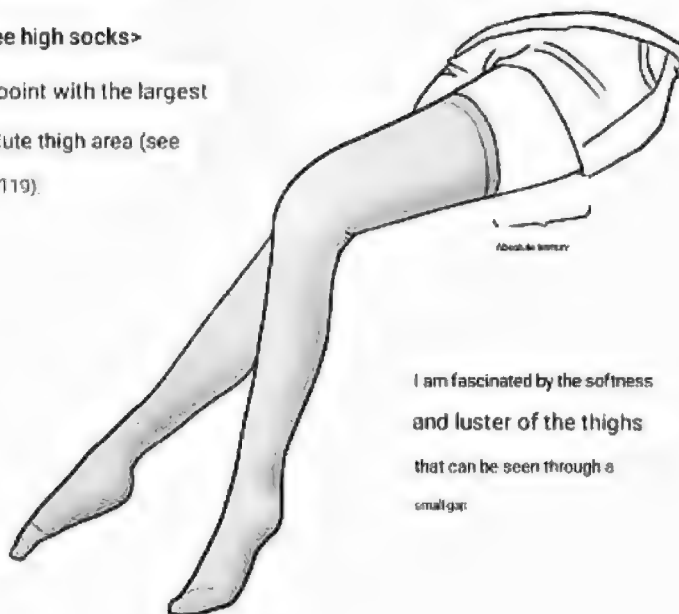

Knee-high (on the knee)

《4 Various socks》

<Knee high socks>

The point with the largest absolute thigh area (see page 119).

I am fascinated by the softness and luster of the thighs that can be seen through a small gap.

<High socks>

The roundness of the knees
can be appealed to the
delicate feeling

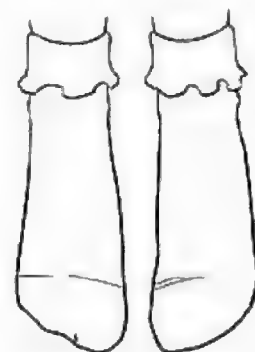

Mesh socks>

The fabric is made of mesh material,
and the feature is that the
bare skin can be seen through
the gaps in the mesh

<Socks + a> By

decorating the
socks, it gives
a girly and fancy
impression.

▲ Frilled folded
socks

《5 Take off your shoes》

For a girl who takes off her
shoes as in example (2), she
feels the cuteness of everyday life
Let's draw a more attractive
scene by devising the facial
expressions of the hands that bend
and stretch the legs and
touch the shoes

▲ Hand of example ②

Items that intentionally produce cuteness

❖ Plush Doll

The loveliness of the stuffed animal itself and the cuteness of the girl who embraces it create a synergistic effect.

The part where the cheek and the stuffed animal collide eliminates the border line

If you use your whole body to hug it, it will be a lovely pose. In the example, the stuffed animal is sandwiched between the thighs.

The figure of a girl holding a stuffed animal in her arms is a smiley example.

Cute Hold the stuffed animal and stick it out of your arm without Point
However, it shows the smallness of the girl's body and arouses the desire for asylum.

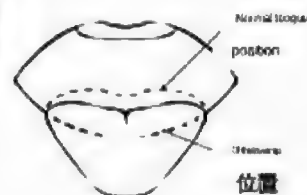

◆ Food / drink + gesture

《Licking》

If you put out your tongue big, it will give you a sexy impression, so try to put it out small and fluffy.

How to draw the tongue

Draw a normal mouth

The position of the tongue

Grasp and there

If you try to extend it from to the outside, you can draw well.

Open your lips a little and stick out your tongue

《Gnawing》

The mouth that bites small is somewhat like a small animal. Draw an arc. Let's draw the upper lip.

《Burning》

This is an example of a crepe with a wide open mouth. One of the charms is the playfulness of the cream on the cheeks.

《Drinking ② Narrow mouth》

When drinking from a bottle or PET bottle that has a narrow mouth, the upper lip sticks to the mouth and the lower lip covers the lower part of the mouth a little.

The neck is emphasized because it faces up.

《Susu》

When sipping noodles, the lips are narrow and open vertically. You can draw a more attractive girl by matching the gesture of putting your hair on your ears.

《Pose with falling cheeks》

This is an example of a smiling girl with a happy expression while holding down her puffy cheeks. Shade the bulge of the cheeks and pinch the cheeks between the fingers.

◆ Lips and lipsticks

Lips and lipsticks, which are indispensable in make-up, make the application look like a girl and appeal to your lips.

《Paint the lip with your finger》

Place your finger on
your thinly open lips

《Apply lipstick》

Put the tubular lipstick with your thumb
+ index finger (middle finger). Draw the
slanted part so that it touches your lips. Gives
a lustrous color to the lips.

Illustrations in this book
Shiny The
most exciting
Hm on the part
Let's put it in

The more supple the facial expression
of the fingertips stroking the lips,
the more attractive the gesture.

Chapter

4

Bring out
the cuteness of girls

action

The "movement" necessary to raise the level
of a girl's fascinating picture. Walking /
running ... Let's see the points that can express
the 'prettiness' of various actions.

Moving pose

Let's take a look at how to bring out the cuteness of a moving girl. We will consciously incorporate elements that are neat and a little embarrassing, carefree brightness, and parts, clothes, and items that are unique to girls.

Delicate feeling of wrist

(expressed with supple and beautiful

curves) (Page 66)

Long hair that dances with movement

(beauty) (Page 77)

Bend your back (make an S-shaped)

(beauty) (Page 55)

Turn

Thighs glancing through the skirt (drawing out the cuteness of the costume with the 'movement')

(Page 72)

Calf softness (thigh and calf fat)

(beauty) (Page 40)

High socks (charm of basic costumes)

(Page 131)

Face turning

Blazer with the jacket off (a cute costume of the royal)

(beauty) (Page 101)

An example is the irritation of a girl in uniform who turns around. The energetic and light movement is an attractive example.

Pleated skirt that spreads around (the charm of basic costumes)

(Page 120)

Delicate feeling on the back of the knee (roundness of the knee)

(beauty) (Page 70)

41 pages

◆ Example ⑦ Making

— Draw from the flow of the human body

01

Draw a pose with a simplified diagram while
being aware of the flow of the human body

Be aware of the flow of
the human body (arrow in
the figure on the right)
and draw a moving
board with a simplified
diagram. It is an image that
matches the curve of
the spine.

02

Make the human body three-dimensional

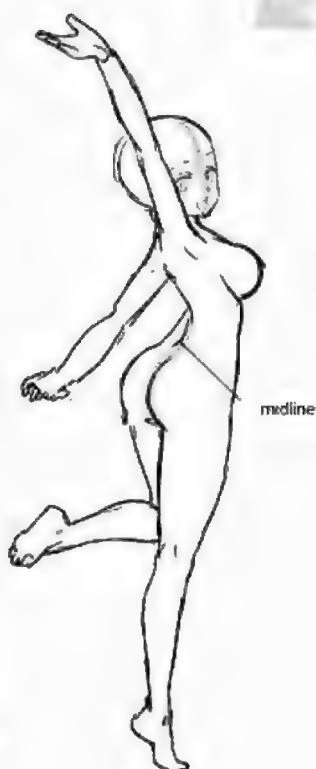

Make the human body
three-dimensional based on the
simplified diagram. Since
the fleshing is done
in this next stage, it
is OK to just take a rough
atari.

03

Flesh

We will flesh out the
three-dimensional human
body. I'm twisting my
hips, so it's a good
idea to draw attention to
where the median plane
is.

Make unevenness
on the skin.

Meet with an image
that puts the breast
on the chest plate

01

Draw clothes → Kiyosho coloring

Right-handed

Put on your clothes, set the direction of rotation, and
flutter your hair and skirt. As shown in the figure above,
the hair is curved in the same way as the arrow in
the turning direction.

Let's add cuteness to the basic action!

Cartoon illustrations are not faithful copies of photographs. In order to make the basic structure more attractive, we will add exaggeration and express something that is an extension of reality.

❖ Tips to make movements look attractive

<< Tips to exaggerate movements >>

Do not think too much about the movement and exaggerate it to some extent. Actually, even difficult poses

are OK.

Bend your legs a lot or stretch your legs to land.

You can bend your arms and back a lot.

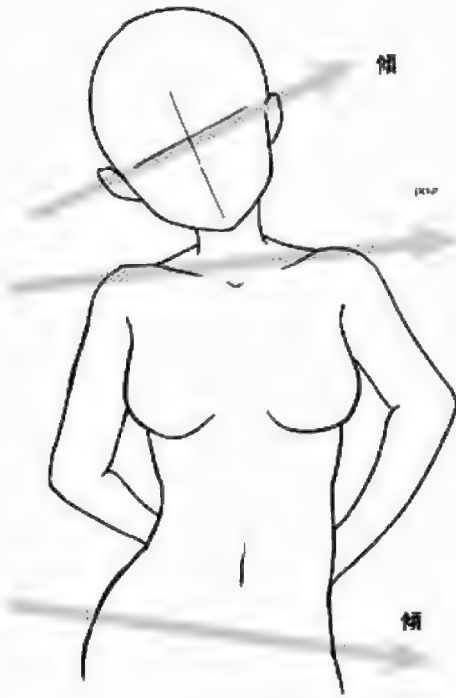

As shown in the figure on the right, if you exaggerate the movement even in the same pose, you can change it to a more lively pose.

NG

OK

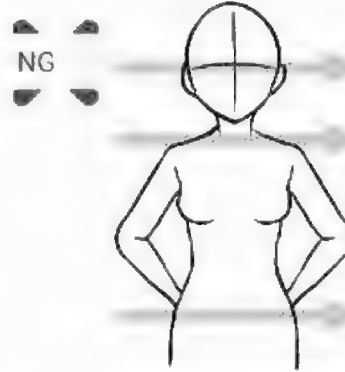

《Tips (2) Incorporate tilt (winkle)》 Tilt based

on the head, shoulders, and hips. Left by tilting

It is not symmetrical to the right (because it loses balance, the body seems to start moving to keep balance) + Because it creates an S-shaped line, you can draw in a girlish and dynamic pose. Also, the limbs are not aligned, Let it be scattered.

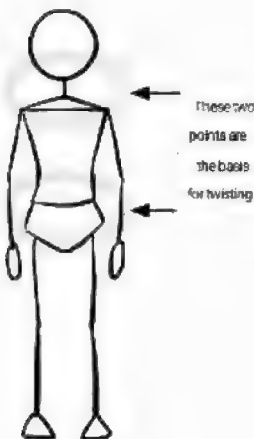

Do not tilt your head, shoulders, or hips

The pose is symmetrical and stable, which is not interesting as a picture.

《Tips ③ Incorporate a twist (twist)》

If you twist it based on the two points of the neck and waist, the pose will not be symmetrical and the curve will increase, emphasizing the soft impression. Also, the impression changes depending on the twist angle.

If you take in the grill and get a good pose, you don't necessarily have to add a twist. From time to time, let's make a flexible choice.

Twist around the neck

When twisting, it is a good idea to draw the midline of the face and body properly and check it.

Basic action ① Walk

Of course, even when drawing a general basic action, the picture will change drastically with some ingenuity.

Plus girlish
gestures and
movements!

I drew a girl who just walked
without any ingenuity. I still don't
feel much cuteness and dynamism

Add a tilt
twist to
this pose!

The flow of the
arm is gentle

Show the back of
your knees

When I tried to correct the pose by
adding girlish gestures and movements,
it became more cute. However, the
sense of dynamism is still insufficient.

Too much force
on your arms

The skirt
is straight

Stride too wide

The left point that reduces prettiness

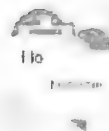

Has been modified as follows. ♦

Narrow stride

♦ Skirt that dances by movement

♦ Relax your arms and hands to make them softer

03

The waist is too twisted
Instead, I twist my
whole body by pulling
my left shoulder
slightly backwards.

Tilt based
on 3
points.

Facial expression
of the hand
Expresses the softness
of the calf.

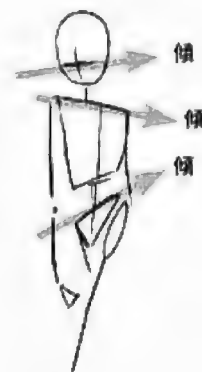

<< Before the walking pose >>

Notice!

Originally this body
Toes with force
Will hit the
ground, but dare to
put on the heel
Very tight
To pose.

Consciously twist
the midline so
as not to straighten
it.

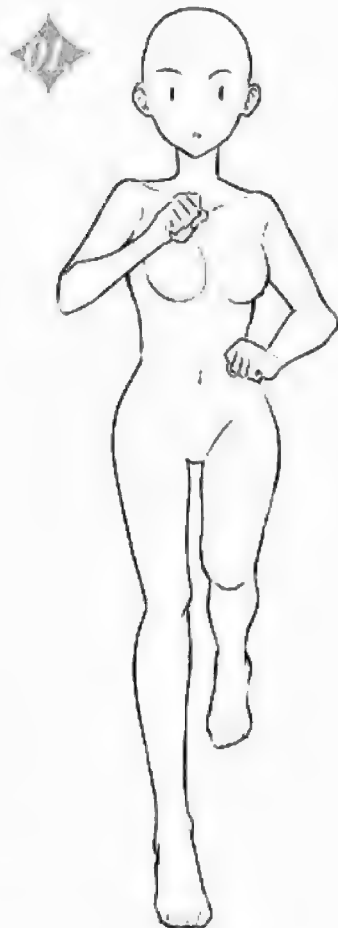

Don't forget to
incorporate the tilt.

You can add a device to make
the movement look attractive. Also, in
order to make the girl even more cute,
change the angle and turn around
here. It's a much more cute attraction
than the first pose.

Basic action ② Run

The running pose will be devised in the same way as the walking pose. It is important to continue pursuing "how to draw more cutely" and to accumulate detailed ideas.

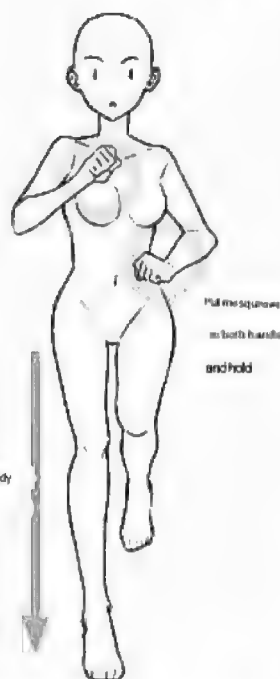

Plus girlish
gestures and
movements!

Push the
tilt to this
pose!

Move your knees
inward to make your
knees look like
your crotch

I will draw a running
pose. The line of
the body is feminine,
but the Base movement
does not express
the cuteness of
the girl

With the image of raising one hand and running to this place, I added a girlish gesture and movement. In addition, the problem in the figure on the left has been fixed with a kara, and a little cuteness has come out.

Open your hands lightly
and add facial
expressions to make
them cute.

Both knees
are moved inward
to show
the softness
of the thighs.

Image of putting
weight on toes

The point is to
bend your finger
a little.

完成

Inclinations have been added
as shown in the figure below,
and girlish gestures and
movements have been added. In order
to make the running pose
cute, it is important to reduce
the "serious running feeling".

Raising your arms and
legs will tilt your shoulders
and hips

Action to bring out the cuteness of girls

Basic action ③ Fall / Jump

The pose that lifts your legs is a cute action pose that gives a bright and fun impression.
Instead of drawing the body straight, bend the legs and arms to create cuteness.

《Fall》

Try to
get out

Cute It's easy to feel desperate
Point Even in a falling pose
You can make it more
cute by changing your wrists and
making it look like your crotch.

The falling pose gives a
playful impression. To prevent
your body from falling,
the right leg, which is the
opposite of the stumbled
leg, tries to move forward.

《Turn around jump》

By combining the jump
and turning, the cuteness
will increase. This
pose is characterized
by its bursting energy.

Turned

A skirt that
dances softly

《Aori-like jump》 If you draw a jump pose with a tilt-like composition, you will feel the atmosphere of the moment you jump.

The gesture of putting your hand on your mouth (see page 91)

Return the wrist

《Jump forward》

Fluttering

It's different from jumping up because it's jumping forward
The wind from the front causes hair and clothes to

flutter behind

《Bending both legs jump》

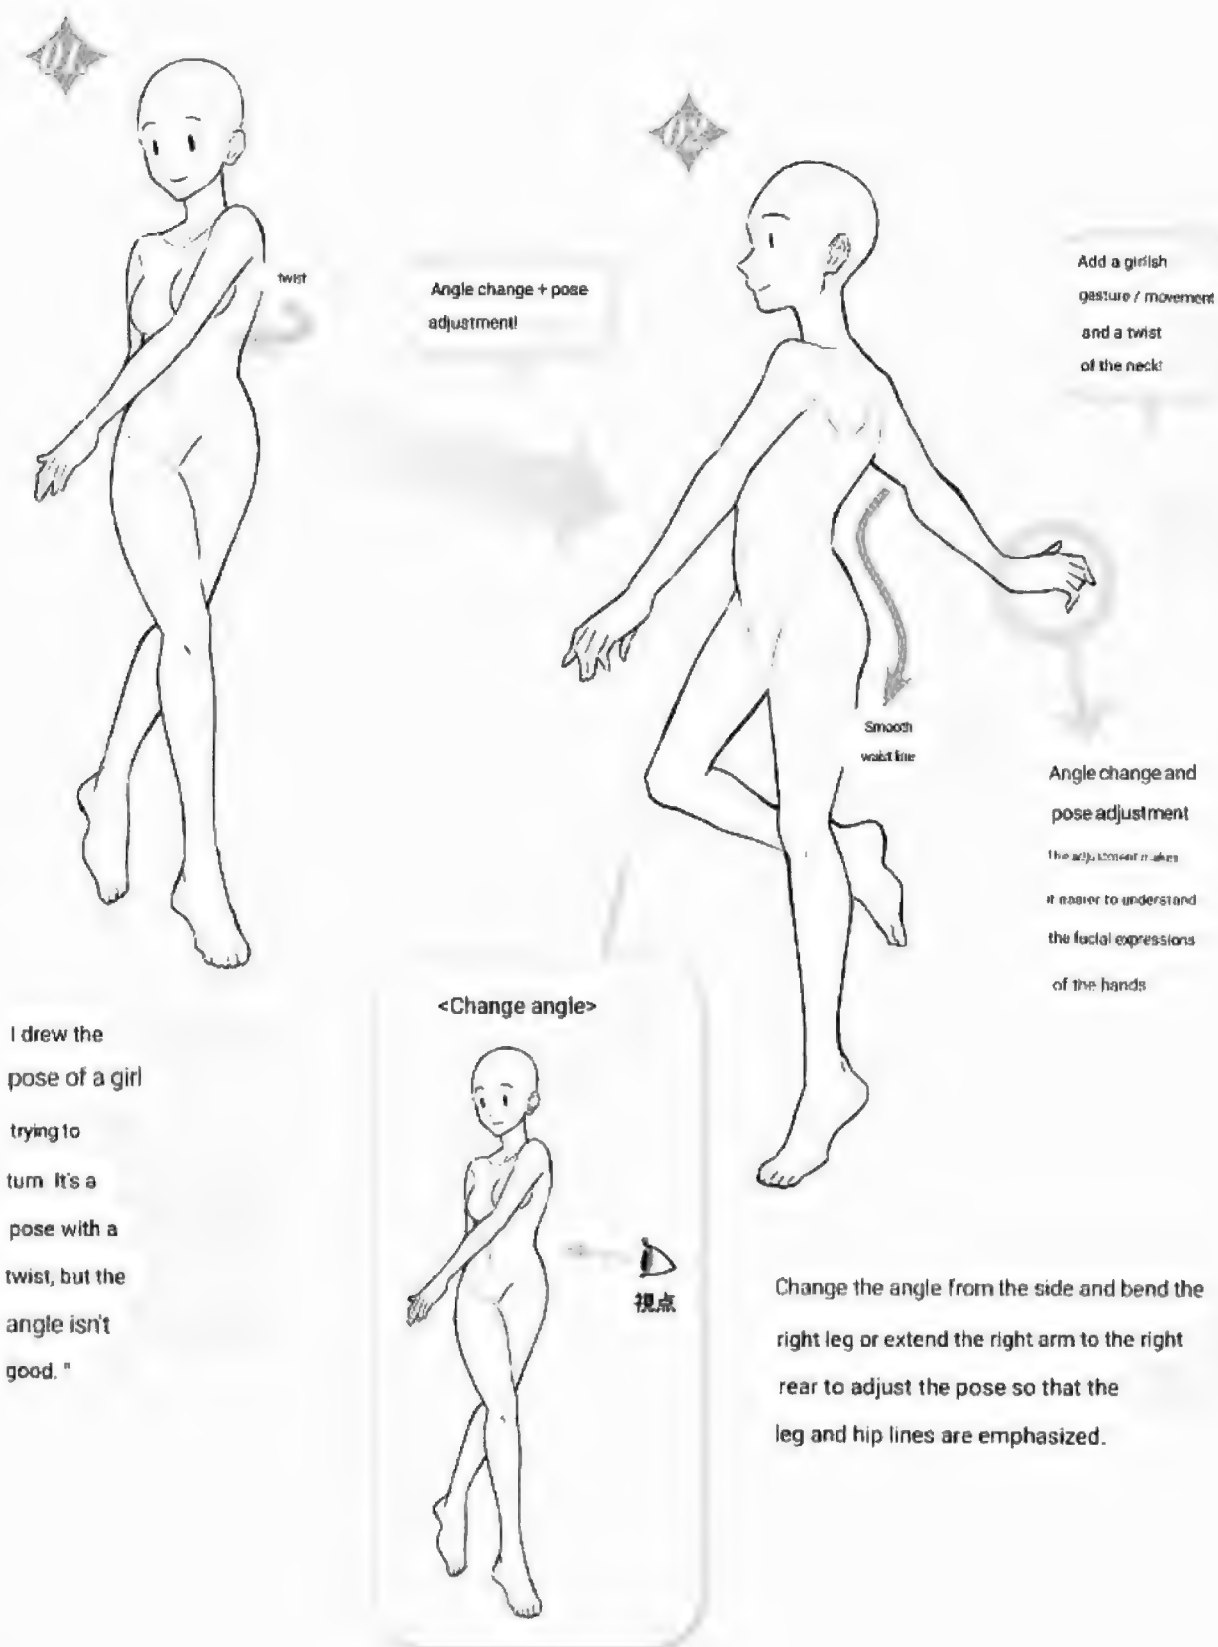

The point is to bring the right arm closer to the face and the left arm slightly away from the body to make it asymmetrical

This is an example of jumping with both legs bent considerably. The more power you put in, the more energetic the pose will be.

Basic action ④ Turn (turn)

It's not a common pose in everyday life, but it twists your body and upsets your balance. Poses that are unbalanced and difficult to draw are the poses that are established as a "picture." And let's add another device.

Bend your right leg further and tightly attach your thighs and calves to create a soft chest.

To make the pose more cute, raise your left arm and right leg a little and twist your neck. I created a cuteness with a pose that turns around here.

Ankle line
When you put it in, you can make your ankles look delicate.

Yuan

Cute Point

The bulge of the left palm, which can be seen by raising the left arm, becomes the point.

Floating / Pose of multiple people

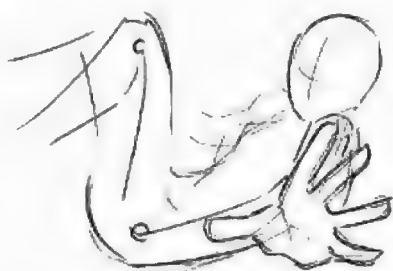

The elements that make a "good picture" are hidden in the poses that are difficult to draw. It is difficult and tends to be shunned, so if you draw it well, it will have an impact. If you add "prettiness" to it, you will be invincible!

The work is an illustration
of a girl falling from
the sky to the ground.
Fluttering clothes, fluttering
hair, and a feeling of
floating are the points

◆ Example ⑧ Making — Draw from the hand in the foreground

01. Draw Atari in the center of the hands and face

Imagine the whole body in the center of the main hands and face.

02. Atari of clothes

Wind from below
The image
of clothes
I will
add a tari.

03. Determine the angle between the leg and the right arm

I look at the balance and determine the angle between your leg and your right arm. This time, I bent my right arm and right leg.

04. Drawing the entire rough

Draw the whole with an awareness of floating feeling
I will go.

05. Pen holder

Draw a line, valuing the curved line of the girl's body.

I added facial expressions to the index and small fingers of the back hand

The hand that extends toward you thickens the line and creates a sense of perspective

"Become a picture" Applied action ① Fall

It's difficult to draw because it's an angle that you can't usually see, but let's hold down two main tips and make it a pose that makes a picture.

◆ Tips for drawing a falling pose

<< Tips ① Be careful when handling limbs

>> Draw limbs with a slight throw-out.

Ideally, you should bend or stretch

it lightly without applying too

much force. Also, if you align your limbs

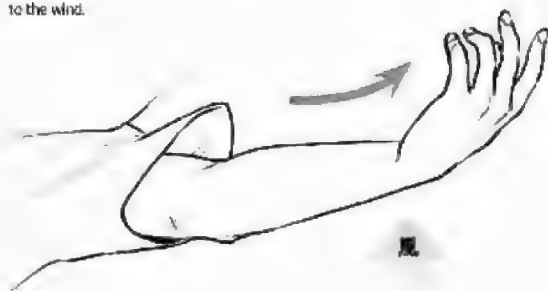

with each other, you will not feel a sense

of openness or floating, so be aware

that you can disperse them.

It does not stretch with the pin,
but gives the feeling of being exposed
to the wind.

Good is to point
your legs in different
directions, not in
the same direction

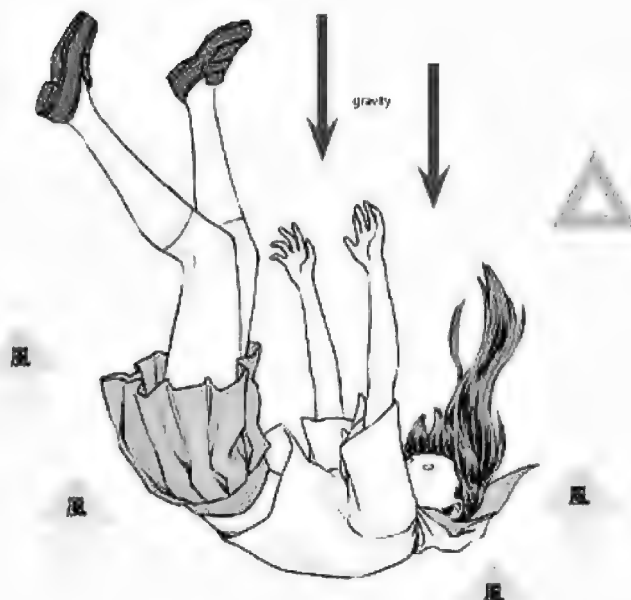

NG

If you straighten it,
bend it tightly, or
align it, you will
not feel a sense of
openness.

<< Tips ② Expression of gravity and wind >>

It is pulled by gravity and falls down. To counter it, your limbs and hair will rise. As shown in the figure on the right, the light limbs are thrown up and all the hair is raised, but with this, the reality is so good that "prettiness" cannot be expressed well.

Therefore, I tried to suppress the expression of gravity wind a little. By expressing it properly, it becomes an elegant and picturesque pose

Normally, the hair will rise as shown in the figure above, but it should be reduced to about half.

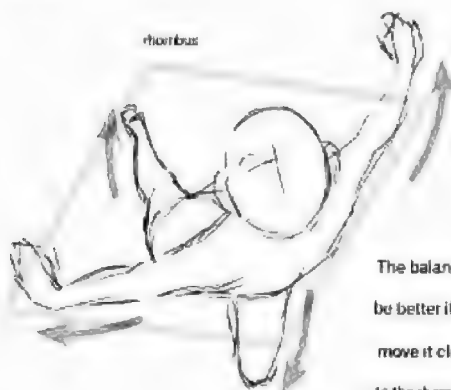

Keep the fluttering of clothes a little restrained, and keep it within the range that makes a picture.

A feeling of calmness and floating is ②

◆ Fall from the abdomen

01.

Determine the pose with the face and arms as the main

The balance will be better if you move it closer to the rhombus

The face that comes to the foreground and both arms that are receiving the wind from below are the main, and the pose of the lower body is decided by looking at the balance.

02.

Expressing a feeling of openness

To create a feeling of openness, open the fingers of your hands and let your hair and skirt flutter to express the wind

03.

Draw a flutter in the details and finish it with a clean copy

完成

Not only the skirt but also the sleeves and chest pads were fluttered. By opening the palm to the back and the legs back and forth, we are creating a production that approaches us.

Cute Point

tend only the ring finger and hide it behind the middle finger to give it an expression

❖ Fall from the back side

The falling poses from the back side are also balanced in a diamond shape like the abdomen side. I will take it.

◆ Fall from the head

Extend to the back

Disperse both

◆ Fall from your feet

Pressed part
It spreads like
a petal with
a minute as a
fulcrum

The skirt is completely turned up, so I added a feminine touch with the gesture of holding it down.

The point is not to just fall vertically from your head, but to reach out and throw your legs into the back.

"Become a picture"

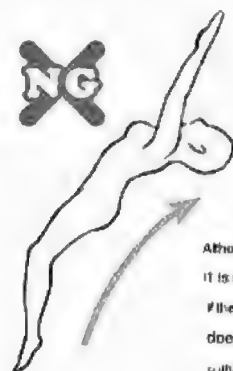

Applied action ② Backward somersault pose

The floating feeling that rotates splendidly is an attractive pose as a picture. It doesn't matter if you're in weightlessness, so prioritize the attractiveness of the picture over the reality.

《Knack body warp》

The area from the tip of the head to the tip of the foot is more than a semicircle and less than a perfect circle. This curved line enhances the curvaceous beauty of the girl.

Although realistic, it is not attractive if the body does not warp sufficiently.

<< Tips ② Do not stick / align the legs >> Leave a moderate amount of space between the legs. Also, if you move the legs up and down a little without aligning them, the Pose will move.

NG

An example of NG is when the space between the legs is narrow and the legs are aligned.

Let's draw with a supple line.

《Tips ③ Show the front and back of your body》

If the angle is such that only one side of the body can be seen, the front and back (front and back) of the body cannot be seen, and the fun of this pose cannot be utilized. Also, there is not enough warpage of the body that can only be seen on one side. Be aware of how the angled body warps so that you can see the front and back.

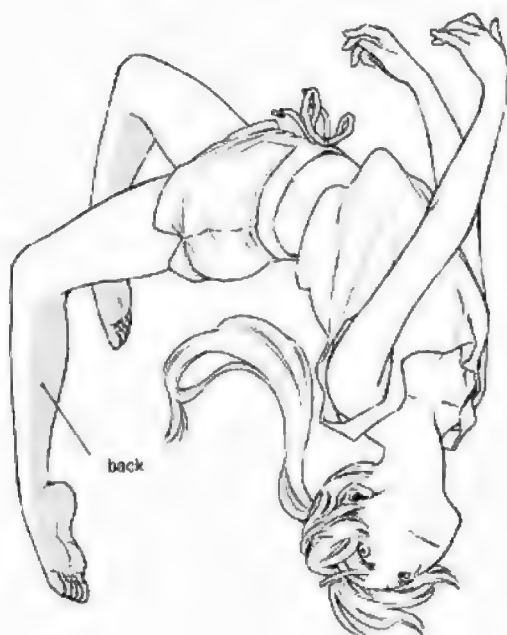

If you let your hair flutter in a circle, just like your back, it will help your body flow.

By showing the front and back, you can get a more interesting effect.

back

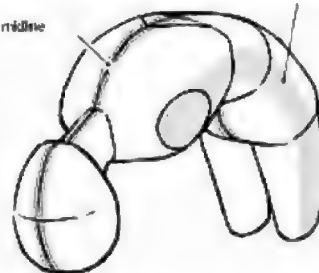

back

midline

I can see the side

Pay attention to the boundary between the front and back of your body. The human body is three-dimensional rather than flat, so you can see the sides.

It is also recommended to draw a median line to check.

Cuteness full action of multiple people (entangled pose)

❖ hugging

《Hugging from the front》

The composition is such that the other girl's child catches the girl hugging vigorously with her whole body.

Since the other person's hair is also hugged, the hair comes out from under the arm.

Step back to support your body that is about to fall

Taumume

《Hugging from behind》

Turn your arm from behind to cover it. Let's draw the hugging pose with the image of making a ring with your arms.

Fantasia

《Hugging from the side》

If you are hugged with some momentum, you will lose your balance. For those who are hugged, the point is to move the center of gravity to the back and draw the legs as if they were fluffy.

Cute You can express the relationship between girls well by devising the facial expression of the point child of the woman who is hugged.

❖ Piggyback ride

It is a smiley pose that entrusts you to the other party. The girl on her back is leaning on her weight, so she is in a leaning position.

"From before"

The soft thighs are in close contact and crushed.

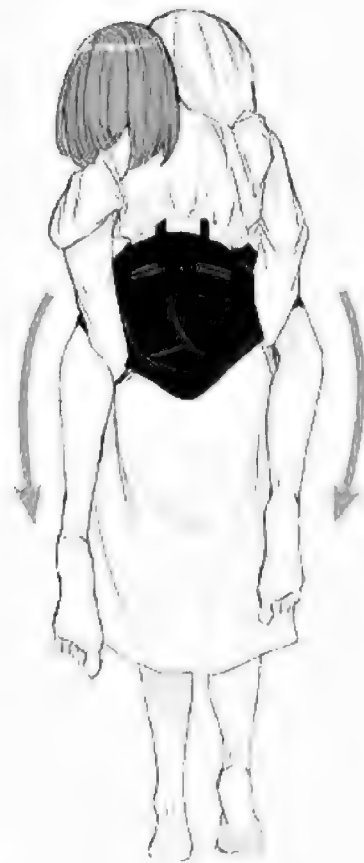

"From the side"

Bend your arms to make a ring and hold it firmly.

Action to bring out the cuteness of girls

' From the back'

The points are the defenselessness of the legs that hang down when piggybacked, and the roundness of the buttocks

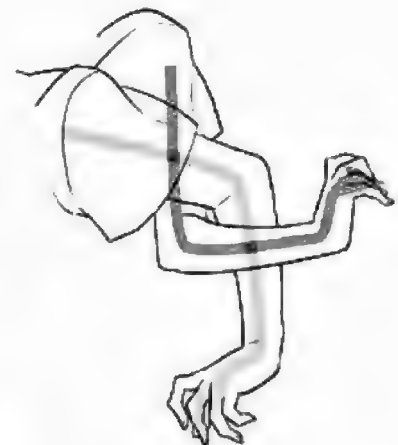

◆ Back to back

Back-to-back Pose, which entrusts its back to a reliable partner, gains momentum + when one weights, it becomes energetic and cute.

You can put your weight on your back and bend forward

By entwining the arms, it becomes a more cute pose. Draw your arms so that the backs of your elbows are combined.

◆ High five

The appearance of raising arms and touching each other's hands is perfect for a happy situation. Be careful to draw at a height where the girls' hands will hit each other.

It is also o to bend the arm that does not give a high five and make it cute.

◆ Dance

This is an example of two girls holding hands and taking steps. The facial expressions of the hands around the shoulders and hips, the eyes staring at each other, and the braids fluttering are depicted, creating a romantic atmosphere.

Cute As shown in the tip point on page 140, poses that are difficult to take in reality are moving.

Good to combine a boyish girl and a girly girl

Illustrator introduction

Okaya

Okaya

@okaya_mrh

I love drawing girls, so I enjoyed drawing them!

Achun

@Attyuntyun915

I was particular about the details and pursued the charming girl I wanted. Even if you change the balance a little, the impression will change, so I realized the difficulty and fun of drawing a cute and attractive girl again ...!

Ume

@umemaru002

My name is Umemaru. Each gesture of a female child is cute, so I wish I could draw cutely up to the tips of my fingers and feet. I hope you find it useful!

Too much

Sugiya

Eco @ sge51
